

Contents

1	Loeb Measures	1
1.1	Introduction	1
1.2	Nonstandard Analysis	2
1.2.1	The hyperreals	2
1.2.2	The nonstandard universe	7
1.2.3	\aleph_1 -saturation	10
1.2.4	Nonstandard topology	11
1.3	Construction of Loeb Measures	13
1.3.1	Example: Lebesgue measure	16
1.3.2	Example: Haar measure	17
1.3.3	Example: Wiener measure	17
1.3.4	Loeb measurable functions	19
1.4	Loeb Integration Theory	20
1.5	Elementary Applications	23
1.5.1	Lebesgue integration	23
1.5.2	Peano's Existence Theorem	24
1.5.3	Itô integration and stochastic differential equations	27
2	Stochastic Fluid Mechanics	29
2.1	Introduction	29
2.1.1	Function spaces	30
2.1.2	Functional formulation of the Navier–Stokes equations	31
2.1.3	Definition of solutions to the stochastic Navier–Stokes equations	32
2.1.4	Nonstandard topology in Hilbert spaces	33
2.2	Solution of the Deterministic Navier–Stokes Equations	34
2.2.1	Uniqueness	36
2.3	Solution of the Stochastic Navier–Stokes Equations	37
2.3.1	Stochastic flow	39
2.3.2	Nonhomogeneous stochastic Navier–Stokes equations	40
2.4	Stochastic Euler Equations	40
2.5	Statistical Solutions	42
2.5.1	The Foias equation	42
2.5.2	Construction of statistical solutions using Loeb measures	43

2.5.3	Measures by nonstandard densities	44
2.5.4	Construction of statistical solutions using nonstandard densities	45
2.5.5	Statistical solutions for stochastic Navier–Stokes equations	46
2.6	Attractors for Navier–Stokes Equations	46
2.6.1	Introduction	46
2.6.2	Nonstandard attractors and standard attractors	48
2.6.3	Attractors for 3-dimensional Navier–Stokes equations .	49
2.7	Measure Attractors for Stochastic Navier–Stokes Equations ..	50
2.8	Stochastic Attractors for Navier–Stokes Equations	52
2.8.1	Stochastic attractors	52
2.8.2	Existence of a stochastic attractor for the Navier–Stokes equations	53
2.9	Attractors for 3-dimensional Stochastic Navier–Stokes Equations	55
3	Stochastic Calculus of Variations	61
3.1	Introduction	61
3.1.1	Notation	63
3.2	Flat Integral Representation of Wiener Measure	64
3.3	The Wiener Sphere	66
3.4	BM on the Wiener Sphere and the Infinite Dimensional O–U Process	69
3.5	Malliavin Calculus	72
3.5.1	Notation and preliminaries	73
3.5.2	The Wiener–Itô chaos decomposition	75
3.5.3	The derivation operator	77
3.5.4	The Skorohod integral	79
3.5.5	The Malliavin operator	83
4	Mathematical Finance Theory	85
4.1	Introduction	85
4.2	The Cox–Ross–Rubinstein Models	86
4.3	Options and Contingent Claims	88
4.3.1	Pricing a claim	90
4.4	The Black–Scholes Model	92
4.5	The Black–Scholes Model and Hyperfinite CRR Models	94
4.5.1	The Black–Scholes formula	95
4.5.2	General claims	95
4.6	Convergence of Market Models	96
4.7	Discretisation Schemes	98
4.8	Further Developments	99
4.8.1	Poisson pricing models	99
4.8.2	American options	99

4.8.3	Incomplete markets	100
4.8.4	Fractional Brownian motion	100
4.8.5	Interest rates	101
