

Table of Contents

Specification and Verification of a Formal System for Structurally Recursive Functions	1
<i>Andreas Abel</i>	
A Predicative Strong Normalisation Proof for a λ -Calculus with Interleaving Inductive Types	21
<i>Andreas Abel and Thorsten Altenkirch</i>	
Polymorphic Intersection Type Assignment for Rewrite Systems with Abstraction and β -Rule	41
<i>Steffen van Bakel, Franco Barbanera, and Maribel Fernández</i>	
Computer-Assisted Mathematics at Work (The Hahn-Banach Theorem in Isabelle/Isar)	61
<i>Gertrud Bauer and Markus Wenzel</i>	
Specification of a Smart Card Operating System	77
<i>Gustavo Betarte, Cristina Cornes, Nora Szasz, and Alvaro Tasistro</i>	
Implementation Techniques for Inductive Types in Plastic	94
<i>Paul Callaghan and Zhaohui Luo</i>	
A Co-inductive Approach to Real Numbers	114
<i>Alberto Ciaffaglione and Pietro Di Gianantonio</i>	
Information Retrieval in a Coq Proof Library Using Type Isomorphisms ..	131
<i>David Delahaye</i>	
Memory Management: An Abstract Formulation of Incremental Tracing ..	148
<i>Healfdene Goguen, Richard Brooksby, and Rod Burstall</i>	
The Three Gap Theorem (Steinhaus Conjecture)	162
<i>Micaela Mayero</i>	
Formalising Formulas-as-Types-as-Objects	174
<i>Qiao Haiyan</i>	
Author Index	195

Types for Proofs and Programs

International Workshop, TYPES'99, Lökeberg, Sweden,

June 12-16, 1999, Selected Papers

Coquand, T.; Dybjer, P.; Nordström, B.; Smith, J. (Eds.)

2000, VIII, 197 p., Softcover

ISBN: 978-3-540-41517-6
