## Preface

<b>1</b>	<b>Introduction</b>	<b>1</b>
<b>2</b>	<b>Systems of Classification</b>	<b>5</b>
2.1	Empirical Classification	6
2.1.1	Lithological	6
2.1.2	Major Element Geochemistry	8
2.1.3	Mineralogical	9
2.1.3.1	The Magnetite–Ilmenite Series	9
2.1.3.2	Zircon	10
2.2	Typological Systems	10
2.3	Geochemical–Tectonic	12
2.4	Comments on the Question of Source Related Nomenclatures	14
2.5	Additional Nomenclatural Terms	15
2.5.1	Tectonic	15
2.5.2	Orogenic	15
2.5.3	Structural	15
<b>3</b>	<b>Granite Geology</b>	<b>17</b>
3.1	The Nomenclature of Plutons and Batholiths	17
3.2	The Anatomy of Batholiths	17
3.3	The Structure of Plutons	19
3.4	Granite Units, Super–Units and Suites	19
3.5	Granite Belts and Provinces	20
3.6	Contacts	20
3.7	Magmatic Textures	21
3.7.1	Equilibrium Textures	21
3.7.2	Disequilibrium Textures	23
3.8	Layering and Schlieren	28
3.9	Residual Fluids	32
3.10	Aplites, Pegmatites and Granite Veins	33
3.11	Enclaves in Granites	34

---

3.12	The Question of Coeval Felsic and Mafic Magmas . . . . .	35
3.13	Mafic Microgranular Enclaves . . . . .	36
3.14	Restite . . . . .	38
3.15	High Level Interaction of Felsic and Mafic Material . . . . .	41
3.16	Dark Margins at Igneous Contacts in Granites . . . . .	43
3.17	Mafic Dykes . . . . .	44
3.18	Emplacement of Plutons . . . . .	45
3.18.1	Stoping . . . . .	46
3.18.2	Diapirism and Ballooning . . . . .	47
3.18.3	Emplacement along Strike-Slip Faults . . . . .	48
3.18.4	Feeder Dykes and Pipes . . . . .	50
3.19	Deformation . . . . .	50
3.19.1	Field Recognition of Deformational Structures . . . . .	53
3.20	Core Complexes . . . . .	54
3.21	Vein Complexes . . . . .	55
3.22	Migmatites . . . . .	56
3.23	Metamorphic Aureoles . . . . .	58
3.24	Mineralisation . . . . .	59
3.24.1	Endogenous Mineralisation . . . . .	60
3.24.2	Exogenous Mineralisation . . . . .	61
3.24.3	Skarns . . . . .	61
3.24.4	Breccias and Breccia Pipes . . . . .	61
3.24.5	Porphyry Copper Deposits . . . . .	62
3.24.6	Alteration Zones . . . . .	62
3.24.7	Epithermal Veins . . . . .	62
3.24.8	Flow Domes . . . . .	63
3.24.9	Field Recognition . . . . .	63
3.25	Terrains . . . . .	63
3.26	Polarity . . . . .	64
<b>4</b>	<b>Characteristics of Granite Typologies . . . . .</b>	<b>67</b>
4.1	Origin of the Concept . . . . .	67
4.2	The I–M Type Family . . . . .	68
4.2.1	M–Types . . . . .	70
4.2.2	Cordilleran I–Types . . . . .	71
4.2.3	Post Collisional Uplift–Molasse Associated I–Types . . . . .	73
4.3	The A–type Association . . . . .	75
4.3.1	A–Types . . . . .	76
4.4	The S–Type Family . . . . .	78
4.4.1	S–Types . . . . .	81

<b>5</b>	<b>Field Mapping</b>	<b>83</b>
5.1	Reconnaissance Mapping, Preparation for Field Work	83
5.2	Use of the Description Sheet	84
5.3	Mapping by Textures	87
5.4	Field Procedures	88
5.5	Mapping in Jungles	89
5.6	Mapping in Deserts	91
5.7	Collection of Samples	92
<b>6</b>	<b>Handling the Data</b>	<b>95</b>
6.1	Selecting Samples	95
6.2	Essential Geochemistry	96
6.2.1	Classification	96
6.2.2	Comparison	97
6.2.3	Differentiation	98
6.3	Typology	98
6.4	Tectonic Setting	98
6.5	Isotope Studies	99
6.5.1	The Potassium/Argon Method	99
6.5.2	The Rubidium/Strontium Method	100
6.5.3	The Niodymium/Samarium Method	100
6.5.4	The Uranium/Lead Method	101
<b>7</b>	<b>Integrating the Data</b>	<b>103</b>
7.1	Storage of Specimens	103
7.2	The Workplace	103
7.3	The Portrayal of Granites on Geological Maps	104
7.4	Writing the Report	105
7.4.1	Geology	106
7.4.2	Geochemical	106
7.4.3	Isotopic	106
7.4.4	Summary and Conclusions	107
7.5	Archiving the Data and Material	107
<b>8</b>	<b>The Granite Controversy and its Aftermath</b>	<b>109</b>
<b>9</b>	<b>Epilogue</b>	<b>117</b>

The Geology and Mapping of Granite Batholiths

Cobbing, J.

2000, XI, 141 p. 26 illus., Softcover

ISBN: 978-3-540-67684-3
