

Preface

The Fifth International Colloquium on Grammatical Inference (ICGI-2000) was held in Lisbon on September 11–13th, 2000. ICGI-2000 was the fifth in a series of successful biennial international conferences in the area of grammatical inference. Previous conferences were held in Essex, U.K.; Alicante, Spain; Montpellier, France; and Ames, Iowa, USA.

This series of meetings seeks to provide a forum for the presentation and discussion of original research on all aspects of grammatical inference. Grammatical inference, the process of inferring grammar from given data, is a field that is not only challenging from a purely scientific standpoint but also finds many applications in real world problems.

Despite the fact that grammatical inference addresses problems in a relatively narrow area, it uses techniques from many domains, and intersects a number of different disciplines. Researchers in grammatical inference come from fields as diverse as machine learning, theoretical computer science, computational linguistics, pattern recognition and artificial neural networks.

From a practical standpoint, applications in areas such as natural language acquisition, computational biology, structural pattern recognition, information retrieval, text processing and adaptive intelligent agents have either been demonstrated or proposed in the literature.

ICGI-2000 was held jointly with CoNLL-2000, the Computational Natural Language Learning Workshop and LLL-2000, the Second Learning Language in Logic Workshop. The technical program included the presentation of 24 accepted papers (out of 35 submitted) as well as joint sessions with CoNLL and LLL. A tutorial program organized by Gabriel Pereira Lopes took place after the meetings and included tutorials by Raymond Mooney, Gregory Grefenstette, Walter Daelemans, António Ribeiro, Joaquim Ferreira da Silva, Gael Dias, Nuno Marques, Vitor Rossio, João Balsa and Alexandre Agostini. The joint realization of these events represents a unique opportunity for researchers in these related fields to interact and exchange ideas.

I would like to thank Claire Nédellec, Claire Cardie, Walter Daelemans, Colin de la Higuera and Vasant Honavar for their help in several aspects of the organization; the members of the technical program committee and the reviewers for their careful evaluation of the submissions; the members of the local organizing committee, Ana Teresa Freitas and Ana Fred, for their help in setting up the event; and Ana de Jesus for her invaluable secretarial support.

September 2000

Arlindo Oliveira
Technical Program Chair

Technical Program Committee

Pieter Adriaans	Syllogic/University of Amsterdam, The Netherlands
Michael Brent	Johns Hopkins University, USA
Walter Daelemans	Tilburg University, The Netherlands
Pierre Dupont	University de St. Etienne, France
Dominique Estival	Syrinx Speech Systems, Australia
Ana Fred	Lisbon Technical University, Portugal
Jerry Feldman	ICSI, Berkeley, USA
Lee Giles	NEC Research Institute, USA
Colin de la Higuera	EURISE, University de St. Etienne, France
Vasant Honavar	Iowa State University, USA
Laurent Miclet	ENSSAT, France
G. Nagaraja	Indian Institute of Technology, India
Jacques Nicolas	IRISA, France
Arlindo Oliveira	INESC/IST, Portugal
Jose Oncina Carratala	Universidade de Alicante, Spain
Rajesh Parekh	Allstate Research and Planning Center, USA
Lenny Pitt	University of Illinois at Urbana-Champaign, USA
Yasubumi Sakakibara	Tokyo Denki University, Japan
Arun Sharma	University of New South Wales, Australia
Giora Slutzki	Iowa State University, USA
Esko Ukkonen	University of Helsinki, Finland
Stefan Wermter	University of Sunderland, UK
Enrique Vidal	University Politecnica de Valencia, Spain
Thomas Zeugmann	Kyushu University, Japan

Organizing Committee

Conference Chair:	Arlindo Oliveira, INESC/IST
Tutorials:	Gabriel Pereira Lopes, Universidade Nova de Lisboa
Local Arrangements:	Ana Fred, Lisbon Technical University
Social Program:	Ana Teresa Freitas, INESC/IST
Secretariat:	Ana de Jesus, INESC

Additional Reviewers

Daniel Gildea
Mitch Harris
Satoshi Kobayashi
Eric Martin
Franck Thollard
Takashi Yokomori

Grammatical Inference: Algorithms and Applications
