

Table of Contents

Preface	V
Prologue	VII
1. Foundations of Action Theories	1
1.1 Purpose	1
1.2 A Basic Action Theory	3
1.3 Bibliographic Remarks	13
2. The Ramification Problem	17
2.1 Indirect Effects of Actions	17
2.2 Minimizing Change	19
2.3 Categorizing Fluents	23
2.4 Causal Relationships	27
2.4.1 Causal Relationships and Their Application	27
2.5 Influence Information	35
2.6 Non-minimal Successor States	43
2.7 Triggered vs. Coupled Effects	51
2.8 Implicit Qualifications vs. Indirect Effects	57
2.9 A Fluent Calculus Axiomatization	59
2.9.1 Reifying States	60
2.9.2 Axiomatizing Action Laws and Causal Relationships ..	66
2.9.3 Defining Transition Models	71
2.9.4 Encoding Observations	74
2.10 Bibliographic Remarks	75
3. The Qualification Problem	85
3.1 Abnormal Action Disqualifications	85
3.2 Minimizing Abnormal Disqualifications	87
3.3 Causing Abnormal Action Disqualifications	92
3.4 Conditions for Abnormal Action Disqualifications	97
3.5 Degrees of Abnormality	101
3.6 A Fluent Calculus Axiomatization	104
3.6.1 Axiomatizing Qualification	104
3.6.2 Introducing Nonmonotonicity	107
3.7 Bibliographic Remarks	112

4. Qualified Ramifications 119

 4.1 State Constraints with Exceptions 119

 4.2 Disqualified Causal Relationships 120

 4.3 Causing Exceptions to State Constraints 123

 4.4 Bibliographic Remarks 124

Acknowledgments 125
