

Table of Contents

Graph Languages

Some Remarks on the Generative Power of Collage Grammars and Chain-Code Grammars	1
<i>Frank Drewes</i>	
Tree Languages Generated by Context-Free Graph Grammars	15
<i>Joost Engelfriet and Sebastian Maneth</i>	
Neighborhood Expansion Grammars	30
<i>John L. Pfaltz</i>	
Neighborhood-Preserving Node Replacements	45
<i>Konstantin Skodinis and Egon Wanke</i>	

Graph Theory

Complexity Issues in Switching of Graphs	59
<i>Andrzej Ehrenfeucht, Jurriaan Hage, Tero Harju and Grzegorz Rozenberg</i>	
The Power of Local Computations in Graphs with Initial Knowledge	71
<i>Emmanuel Godard, Yves Métivier and Anca Muscholl</i>	

Categorical Approaches

Double-Pullback Graph Transitions: A Rule-Based Framework with Incomplete Information	85
<i>Hartmut Ehrig, Reiko Heckel, Mercè Llabrés, Fernando Orejas, Julia Padberg and Grzegorz Rozenberg</i>	
Double-Pushout Approach with Injective Matching	103
<i>Annegret Habel, Jürgen Müller and Detlef Plump</i>	
Node Replacement in Hypergraphs: Translating NCE Rewriting into the Pullback Approach	117
<i>Hélène Jacquet and Renate Klempien-Hinrichs</i>	
Pushout Complements for Arbitrary Partial Algebras	131
<i>Mercè Llabrés and Francesc Rosselló</i>	

Concurrency and Distribution

Unfolding of Double-Pushout Graph Grammars is a Coreflection	145
<i>Paolo Baldan, Andrea Corradini and Ugo Montanari</i>	

Local Views on Distributed Systems and Their Communication	164
<i>Ingrid Fischer, Manuel Koch and Gabriele Taentzer</i>	

Dynamic Change Management by Distributed Graph Transformation: Towards Configurable Distributed Systems	179
<i>Gabriele Taentzer, Michael Goedicke and Torsten Meyer</i>	

A Framework for NLC and ESM: Local Action Systems	194
<i>Nico Verlinden and Dirk Janssens</i>	

Artificial Intelligence

Redundancy and Subsumption in High-Level Replacement Systems	215
<i>Hans-Jörg Kreowski and Gabriel Valiente</i>	

Knowledge Representation and Graph Transformation	228
<i>Stefan Schuster</i>	

Utilizing Constraint Satisfaction Techniques for Efficient Graph Pattern Matching	238
<i>Michael Rudolf</i>	

Visual Languages

Conceptual Model of the Graphical Editor GENGED for the Visual Definition of Visual Languages	252
<i>Roswitha Bardohl and Hartmut Ehrig</i>	

From Formulae to Rewriting Systems	267
<i>Paolo Bottoni, Francesco Parisi-Presicce and Marta Simeoni</i>	

Hypergraphs as a Uniform Diagram Representation Model	281
<i>Mark Minas</i>	

Specification Concepts

Story Diagrams: A New Graph Rewrite Language Based on the Unified Modeling Language and Java	296
<i>Thorsten Fischer, Jörg Niere, Lars Torunski and Albert Zündorf</i>	

A Fully Abstract Model for Graph-Interpreted Temporal Logic	310
<i>Fabio Gadducci, Reiko Heckel and Manuel Koch</i>	

More About Control Conditions for Transformation Units	323
<i>Sabine Kuske</i>	

Integrity Constraints in the Multi-paradigm Language PROGRES	338
<i>Manfred Münch, Andy Schürr and Andreas J. Winter</i>	

Modularity and Refinement

A Framework for Adding Packages to Graph Transformation Approaches .	352
<i>Giorgio Busatto, Gregor Engels, Katharina Mehner and Annika Wagner</i>	
Refinements of Graph Transformation Systems via Rule Expressions	368
<i>Martin Große-Rhode, Francesco Parisi-Presicce and Marta Simeoni</i>	
Simple Modules for GRACE	383
<i>Reiko Heckel, Berthold Hoffmann, Peter Knirsch and Sabine Kuske</i>	
UML Packages for PROgrammed Graph REwriting Systems	396
<i>Andy Schürr and Andreas J. Winter</i>	
Incremental Development of Safety Properties in Petri Net Transformations	410
<i>Julia Padberg, Maike Gajewsky and Kathrin Hoffmann</i>	

Software Engineering

Using Graph Transformation Techniques for Integrating Information from the WWW	426
<i>Lukas C. Faulstich</i>	
A Model Making Automation Process (MMAP) Using a Graph Grammar Formalism	442
<i>Curtis E. Hrischuk</i>	
Graph-Based Models for Managing Development Processes, Resources, and Products	455
<i>Carl-Arndt Krapp, Sven Krüppel, Ansgar Schleicher and Bernhard Westfechtel</i>	
Deriving Software Performance Models from Architectural Patterns by Graph Transformations	475
<i>Dorina C. Petriu and Xin Wang</i>	
Author Index	489

Theory and Application of Graph Transformations
6th International Workshop, TAGT'98 Paderborn,
Germany, November 16-20, 1998 Selected Papers
Ehrig, H.; Engels, G.; Kreowski, H.-J.; Rozenberg, G.
(Eds.)

2000, X, 506 p., Softcover

ISBN: 978-3-540-67203-6
