

Table of Contents

Introduction	XIII
Introduction to Continuous Wavelet Analysis	1
<i>Matthias Holschneider (Institut de Physique du Globe de Paris)</i>	
Building Your Own Wavelets at Home	72
<i>Wim Sweldens (Bell Laboratories) and Peter Schröder (California Institute of Technology)</i>	
Factoring Wavelet Transforms into Lifting Steps	131
<i>Ingrid Daubechies (Princeton University) and Wim Sweldens (Bell Laboratories)</i>	
Spherical Wavelets: Efficiently Representing Functions on a Sphere	158
<i>Peter Schröder (California Institute of Technology) and Wim Sweldens (Bell Laboratories)</i>	
Least-squares Geopotential Approximation by Windowed Fourier Transform and Wavelet Transform	189
<i>Willi Freeden and Volker Michel (University of Kaiserslautern)</i>
