Are We at the Dawn of Quantum-Gravity Phenomenology?

<i>Giovanni Amelino-Camelia</i>	1
1 Introduction	1
2 First the Conclusions: What Has This Phenomenology Achieved?	3
3 Addendum to Conclusions: Any Hints to Theorists from Experiments?	6
4 Interferometry and Fuzzy Space-Time	8
5 Gamma-Ray Bursts and In-vacuo Dispersion	15
6 Other Quantum-Gravity Experiments	20
7 Classical-Space-Time-Induced Quantum Phases in Matter Interferometry	24
8 Estimates of Space-Time Fuzziness from Measurability Bounds	25
9 Relations with Other Quantum Gravity Approaches	36
10 Quantum Gravity, No Strings Attached	39
11 Conservative Motivation and Other Closing Remarks	44

Classical and Quantum Physics of Isolated Horizons: A Brief Overview

<i>Abhay Ashtekar</i>	50
1 Motivation	50
2 Key Issues	52
3 Summary	55
4 Discussion	65

Old and New Processes of Vorton Formation

<i>Brandon Carter</i>	71
-----------------------------	----

Anti-de Sitter Supersymmetry

<i>Bernard de Wit, Ivan Herger</i>	79
1 Introduction	79
2 Supersymmetry and Anti-de Sitter Space	80
3 Anti-de Sitter Supersymmetry and Masslike Terms	83
4 The Quadratic Casimir Operator	85
5 Unitary Representations of the Anti-de Sitter Algebra	87
6 The Oscillator Construction	92
7 The Superalgebra $\text{OSp}(1 4)$	95

8	Conclusions	98
	References	99

Combinatorial Dynamics and Time in Quantum Gravity

<i>Stuart Kauffman, Lee Smolin</i>	101
1 Introduction	101
2 Combinatorial Descriptions of Quantum Spacetime	104
3 The Problem of the Classical Limit and its Relationship to Critical Phenomena	108
4 Is There Quantum Directed Percolation?	111
5 Discrete Superspace and its Structure	112
6 Some Simple Models	114
7 The Classical Limit of the Frozen Models	115
8 Dynamics Including the Parameters	116
9 A New Approach to the Problem of Time	117

Non-commutative Extensions of Classical Theories in Physics

<i>Richard Kerner</i>	130
1 Deformations of Space-Time and Phase Space Geometries	130
2 Why the Coordinates Should not Commute at Planck's Scale	133
3 Non-commutative Differential Geometry	134
4 Non-commutative Analog of Kaluza-Klein and Gauge Theories	137
5 Minkowskian Space-Time as a Commutative Limit	142
6 Quantum Spaces and Quantum Groups	149
7 Conclusion	155
References	155

Conceptual Issues in Quantum Cosmology

<i>Claus Kiefer</i>	158
1 Introduction	158
2 Lessons from Quantum Theory	159
3 Quantum Cosmology	167
4 Emergence of a Classical World	176
5 Acknowledgements	184
References	185

Single-Exterior Black Holes

<i>Jorma Louko</i>	188
1 Introduction	188
2 Kruskal Manifold and the \mathbb{MP}^3 Geon	189
3 Vacua on Kruskal and on the \mathbb{RP}^3 Geon	192
4 Entropy of the \mathbb{RP}^3 Geon?	194
5 AdS_3 , the Spinless Nonextremal BTZ Hole, and the \mathbb{RP}^2 Geon	195
6 Vacua on the Conformal Boundaries	198
7 Holography and String Theory	200
8 Concluding Remarks	201
References	201

Dirac-Bergmann Observables for Tetrad Gravity

<i>Luca Lusanna</i>	203
---------------------------	-----

Meaning of Noncommutative Geometry and the Planck-Scale Quantum Group

<i>Shahn Majid</i>	227
1 Introduction	227
2 The Meaning of Noncommutative Geometry	231
3 Fourier Theory	242
4 Bicrossproduct Model of Planck-Scale Physics	251
5 Deformed Quantum Enveloping Algebras	260
6 Noncommutative Differential Geometry and Riemannian Manifolds	268
References	274

Loop Quantum Gravity and the Meaning of Diffeomorphism Invariance

<i>Carlo Rovelli, Marcus Gaul</i>	277
1 Introduction	277
2 Basic Formalism of Loop Quantum Gravity	281
3 Quantization of the Area	300
4 The Physical Contents of Quantum Gravity and the Meaning of Diffeomorphism Invariance	303
5 Dynamics, True Observables and Spin Foams	311
6 Open Problems and Future Perspectives	322

Black Holes in String Theory

<i>Kostas Skenderis</i>	325
1 Introduction	325
2 String Theory and Dualities	329
3 Brane Solutions	335
4 Black Holes in String Theory	341

Gravitational waves and massless particle fields

<i>Jan Willem van Holten</i>	365
1 Planar Gravitational Waves	365
2 Einstein-Scalar Waves	368
3 Einstein-Dirac Waves	370
4 Einstein-Maxwell Waves	372

Towards Quantum Gravity

Proceedings of the XXXV International Winter School on

Theoretical Physics Held in Polanica, Poland, 2-11

February 1999

Kowalski-Glikman, J. (Ed.)

2000, XII, 376 p., Hardcover
