

## CONTENTS

<b>Chapter 1. Problems of Dynamic Linear Fracture Mechanics</b>	1
§ 1. Problems of Stability and Fracture Under High-Speed Loading	1
§ 2. Outline of Linear Fracture Mechanics	2
§ 3. Theoretical Contradictions of Fracture Mechanics	3
<b>Chapter 2. Experimental Methods of Dynamic Fracture Research</b>	6
§ 1. The Dynamic Photoelastic Method	6
§ 2. The Method of Caustics	9
§ 3. On an Asymptotic Representation of the Stress Field Near the Crack Tip	12
<b>Chapter 3. Effects of High-Rate Fracture of Brittle Materials</b>	16
§ 1. Fracture of 'Intact' Materials	16
§ 2. Study of Dynamic Crack-Growth Resistance of a Brittle Fracture	18
§ 3. Crack Behaviour Under Threshold Loading	20
<b>Chapter 4. Some Non-Classical Approaches. New Criterion of Brittle Fracture</b>	24
§ 1. On the Neuber-Novozhilov Criterion	24
§ 2. The Shockey-Kalthoff Minimal-Time Criterion	25
§ 3. The Nikiporovski-Shemyakin Pulse Criterion	26
§ 4. The Structural-Temporal Criterion of Brittle-Medium Fracture	28
§ 5. On the Discrete Nature of Dynamic Fracture of Solids	30
§ 6. On the Relaxation Nature of the Incubation Time	35
§ 7. On Choice of the Parameters of Structural-Temporal Criterion	37
<b>Chapter 5. 'Intact' Fracture</b>	39
§ 1. Cleavage Fracture in Solids: Dynamic Strength of Materials	39
§ 2. Temporal Dependence of Strength	41
§ 3. Fracture Zone Behavior Under Cleavage	43
§ 4. On the Relationship of Quasistatic and Dynamic Mechanisms of Solid Fracture	46
§ 5. On Surface Erosion Under Hard Particle Impact	47

<b>Chapter 6. Stress Fields in Problems of Dynamic Fracture Mechanics</b>	52
§ 1. On a Stress State Asymptotic Description Near a Crack Tip under Dynamic Loading	52
§ 2. Wave Stress Pulse Interaction with a Longitudinal Shear Crack	53
§ 3. On the Stress State Near the Tip of a Rapidly Growing Crack	56
§ 4. On the Influence of Regular Terms of the Stress-Field Asymptotic Representation	58
<b>Chapter 7. Dynamic Fracture Near the Crack Tip</b>	61
§ 1. Threshold Pulses of Impact Loading	61
§ 2. On Loading-Rate Dependence of Dynamic Fracture Viscosity	65
§ 3. Minimum and Maximum Pulses. Limit Characteristics of Material Dynamic Fracture	69
§ 4. On Testing Principles of Material Dynamic Strength Properties	72
<b>Chapter 8. Determination of Fracture Direction Under Asymmetric-Impact Action</b>	74
§ 1. Experimental Scheme and Fracture 'Mode Change' Effect	74
§ 2. Asymmetrical-Impact Problem	76
§ 3. Stress-Intensity Factors	77
§ 4. Fracture-Direction Change	81
<b>Chapter 9. On Material Yield Modeling under High-Rate Loading</b>	84
§ 1. Experimental Studies of Material Yield Under High-Rate Loading	84
§ 2. Classical Description Methods of Material Dynamic Properties	85
§ 3. New Yield Criterion	86
§ 4. Constant-Rate Loading	87
