

Table of Contents

Microporous and other Framework Materials with Zeolite-Type Structures

Subvolume A: Tetrahedral Frameworks of Zeolites, Clathrates, and Related Materials

1	Introduction	1
1.1	General	1
1.2	Mathematical principles	4
1.3	Specific aims of this volume	9
2	Mathematical description, classification and invention of nets	11
2.1	Mathematical description	11
2.2	Invention of (4,2)-3D nets	12
2.3	Number and connectivity of known nets	13
3	Chemical background	14
4	Mathematical characterization of a crystal structure	15
5	Concise history of relevant mathematics	16
6	Mathematical reference books	16
7	Various mathematical concepts and tools	17
8	Polyhedra & related concepts	19
9	Circle and sphere packing	20
10	One-dimensional units	21
11	Two-dimensional units	21
12	Three-dimensional nets: topology	21
13	Three-dimensional nets: geometry & chemical stability of related materials	22
14	Three-dimensional nets: relation to minimal surfaces	24
15	Challenges	25
16	Compilation of units	26
16.1	General description	26
16.2	Systematic enumeration of subunits	27
16.3	Polyhedral units	65
16.4	2D nets	132
16.5	1D units	180
17	References	251
18	Acknowledgements	266

Tetrahedral Frameworks of Zeolites, Clathrates and
Related Materials

Smith, J.V.

2000, X, 266 p. 3 illus. With CD-ROM., Hardcover

ISBN: 978-3-540-61743-3
