Section I Introduction 1

1 Introduction

S. Halle and N.C. Stenseth	3
1.1 Two States of Life.....	3
1.2 Diel Patterns and the Biological Clock	4
1.3 Doing the Right Thing at the Right Time	6
1.4 The History of an Idea.....	8
1.5 Why Do We Know That Little?	10
1.6 Why Small Mammals?	12
1.7 About this Book.....	14
References	16

Section II Theoretical Considerations 19

Theoretical Considerations – Introduction

S. Halle and N.C. Stenseth.....	21
---------------------------------	----

2 Activity Patterns and the Biological Clock in Mammals

T.J. Bartness and H.E. Albers.....	23
2.1 Introduction	23
2.2 The Circadian Clock	24
2.3 Circadian Clocks in Mammals.....	26
2.3.1 General Features.....	26
2.3.2 Temperature Effects on the Circadian Clock.....	27
2.3.3 Physiological Influences on the Circadian Clock.....	28
2.4 Entrainment of Rhythms by Light and Other Signals.....	28
2.4.1 Light.....	28
2.4.2 Food Availability	29
2.4.3 Non-photoc Zeitgebers.....	30
2.4.4 Social Factors.....	31

6.3.1	Data Collection.....	123
6.3.2	Start and End of Activity.....	124
6.3.3	Total Activity Time per 24-h Day	125
6.3.4	Time Budget.....	125
6.3.5	Relationships Between Predators and Prey Activity.....	126
6.4	Discussion and Conclusions	126
	References	129
7	Squirrels – Medium-Sized Granivores in Woodland Habitats	
	L. A. Wauters	131
7.1	Introduction	131
7.2	The Daily Activity Pattern.....	131
7.2.1	General Pattern and Seasonal Variation	131
7.2.2	Geographical Variation.....	133
7.3	Foraging Behaviour and the Activity Pattern	134
7.3.1	Foraging and Activity of Red Squirrels in Coniferous Woods	134
7.3.1.1	Winter (December-February).....	134
7.3.1.2	Spring (March-May)	135
7.3.1.3	Summer (June-August)	135
7.3.1.4	Autumn (September-November)	136
7.3.2	Habitat Effects	136
7.4	Activity Pattern and Intraspecific Competition.....	138
7.4.1	Sex Differences Between Adults.....	139
7.4.2	Age Differences	141
7.5	Conclusions	141
	References	142
8	Activity Patterns of Kangaroo Rats – Granivores in a Desert Habitat	
	M. Daly, P.R. Behrends, and M.I. Wilson	145
8.1	Introduction	145
8.2	Nocturnality	146
8.3	Mating Effort and Aboveground Activity.....	149
8.4	Activity Levels and Predation Risk.....	149
8.4.1	Moonlight Avoidance, Crepuscular Compensation, and Predation Risk.....	151
8.4.2	Does Predation Maintain Heterogeneity of Activity Profiles?	153
8.4.3	Sex Differential Predation Risk? A Methodological Caveat	154
8.5	An Unresolved Question	156
	References	156

9	Gerbils and Heteromyids – Interspecific Competition and the Spatio-Temporal Niche	
	Y. Ziv and J.A. Smallwood.....	159
9.1	Introduction.....	159
9.2	Gerbils and Daily Temporal Partitioning.....	161
9.3	Heteromyids and Seasonal Temporal Partitioning.....	166
9.4	Concluding Remarks and Synthesis.....	169
9.4.1	Temporal Partitioning and Its Relation to Species Coexistence...	170
9.4.2	Synthesis.....	172
	References	173
10	Wood Mice – Small Granivores/Insectivores with Seasonally Variable Patterns	
	J.R. Flowerdew	177
10.1	Introduction.....	177
10.2	Seasonal Patterns of Activity	177
10.3	Environmental and Physiological Influences on Activity Patterns.....	181
10.3.1	Environmental Influences	181
10.3.2	Physiological Influences	182
10.4	Intra- and Interspecific Influences on Activity	183
10.4.1	Intraspecific Influences.....	183
10.4.2	Interspecific Influences.....	184
10.5	Discussion	185
	References	187
11	Voles – Small Graminivores with Polyphasic Patterns	
	S. Halle	191
11.1	Microtine Rodents, a Special Case of Diel Activity Patterns.....	191
11.2	A Historical Perspective.....	193
11.3	The Temporal Structure of Microtine Activity.....	195
11.3.1	The Ultradian Component.....	196
11.3.1.1	General Features.....	196
11.3.1.2	Activity Synchronisation at the Population Level.....	198
11.3.2	The Circadian Component.....	201
11.3.3	The Seasonal Component.....	203
11.3.4	A Long-Term Component?	206
11.4	Ecological Factors Affecting Microtine Activity Behaviour.....	209
11.5	Conclusion	212
	References	213

12	Djungarian Hamsters – Small Graminivores with Daily Torpor	
	T. Ruf and G. Heldmaier	217
12.1	Djungarian Hamsters: Through Cold Winters on Hairy Feet.....	217
12.2	Measurements of Locomotion, Temperature and Metabolic Rate.....	219
12.3	Model Calculations.....	220
12.4	Adjustment of Locomotor Activity Patterns to Environmental Changes.....	221
12.5	Energy Requirements For Activity – The Impact of Cold Load ...	224
12.6	Locomotion and Daily Torpor: Interactions.....	225
12.7	Budgeting of Time and Energy Under Natural Conditions	228
12.8	Constraints, Unknowns, and Alternative Strategies	231
	References	232
13	Shrews – Small Insectivores with Polyphasic Patterns	
	J.F. Merritt and S.H. Vessey	235
13.1	Introduction.....	235
13.2	Methods.....	236
13.3	Factors Influencing Activity Rhythms	242
13.3.1	Food	242
13.3.2	Light, Weather, and Seasonal Factors	244
13.3.3	Sex and Reproduction	246
13.3.4	Optimal Foraging and Competitors	247
13.4	Conclusions.....	248
	References	248
14	Bats – Flying Nocturnal Mammals	
	H.G. Erkert	253
14.1	Introduction.....	253
14.2	Flight Activity Patterns under Natural Conditions.....	255
14.2.1	Recording Methods	255
14.2.2	Timing of Flight Activity	256
14.2.3	Activity Patterns	259
14.2.4	Effect of Environmental Factors on the Timing and Pattern of Flight Activity.....	261
14.2.4.1	Light.....	261
14.2.4.2	Ambient Temperature.....	264
14.2.4.3	Precipitation and Wind.....	265
14.2.4.4	Food Abundance	265
14.2.5	Effect of Endogenous Factors on the Timing and Pattern of Flight Activity.....	266
14.3	Activity Patterns in the Laboratory	267
14.4	Conclusions.....	268
	References	269

Section IV Conclusion..... 273

15	Chronoecology: New Light Through Old Windows – A Conclusion	
	S. Halle and N.C. Stenseth	275
15.1	A New Term – And a New View	275
15.2	Activity Patterns and Evolutionary Ecology	276
15.3	Chronoecology and the Biological Clock	277
15.4	Chronoecology and the Energy Household	278
15.5	Chronoecology – Where Ecology Comes In.....	280
15.5.1	Predation.....	280
15.5.2	Interspecific Competition	281
15.5.3	Intraspecific Organisation.....	282
15.6	Future Challenges in Chronoecology.....	283
	References	284

Appendix..... 285

Measuring and Analysing Activity of Small Mammals in the Laboratory and in the Field

	S. Halle and D. Weinert.....	285
1	Methodology – Reality Constraints to Wishful Thinking.....	285
2	Recording Activity – Free Choice Among Drawbacks.....	286
2.1	Activity Cages.....	286
2.2	Enclosures.....	288
2.3	Field Studies	289
2.3.1	Trapping.....	290
2.3.2	Automatic Recording with Passage Counters	291
2.3.3	Radiotelemetry	292
2.4	Activity Recording – A Conclusion	293
3	Analysis of Biological Time Series – Possibilities and Limitations....	293
3.1	Data Collection.....	295
3.2	Graphic Presentation of Data.....	295
3.3	Pretreatment of Data	298
3.4	Mathematical Methods of Time Series Analyses	299
3.4.1	Cosinor Analysis	299
3.4.2	Chi ² -Periodogram.....	302
3.4.3	Fourier Analysis	303
3.4.4	Maximum Entropy Spectral Analysis (MESA).....	304
3.5	Time Series Analysis – A Conclusion	305
4	Activity Indices – Special Solutions For Noisy Field Data	306
	References	309

Subject Index..... 313
