

Table of Contents

CHAPTER I. INSTRUMENTATION DEVELOPMENTS

I.1. <i>Wavenumber Spectrum Estimation from Irregularly Spaced Data: Application to PIV Data Processing</i> W. Hübner, C. Tropea and J. Volkert	3
I.2. <i>PIV Error Correction</i> D.P. Hart	19
I.3. <i>Effect of Sensor Geometry on the Performance of PIV Interrogation</i> J. Westerweel	37
I.4. <i>Micron-Resolution Velocimetry Techniques</i> C.D. Meinhart, S.T. Wereley, and J.G. Santiago	57
I.5. <i>PIV in Two-Phase Flows: Simultaneous Bubble Sizing and Liquid Velocity Measurements</i> I. Dias and M.L. Reithmuller	71
I.6. <i>Measuring Water Temperatures by Means of Linear Raman Spectroscopy</i> J. Karl, M. Ottmann, and D. Hein	87
I.7. <i>A New Approach to Eliminate the Measurement Volume Effect in PDA Measurements</i> H.-H. Qiu and C.T. Hsu	103
I.8. <i>Concentration Measurement by Molecular Absorption Using Narrow Band Tunable Infrared Laser</i> T. Kawaguchi, K. Hishida, and M. Maeda	113

CHAPTER II. TURBULENT SHEAR FLOWS

- II.1. *The Kármán Vortex Street – LDV and PIV Measurements Compared with CFD*
O. Pust and C. Lund 129
- II.2. *A Flow Structure at Reattachment Region of a Two-Dimensional Backward-Facing Step by Using Advanced Multi-Point LDV*
N. Furuichi, T. Hachiga, K. Hishida, and M. Kumada 143
- II.3. *PIV Measurements of Turbulence Statistics in the Three-Dimensional Flow Over a Surface-Mounted Obstacle*
J.M.M. Sousa, C. Freek, and J.C.F. Pereira 157
- II.4. *Turbulence Analysis of the BFS with Iterative Multigrid PIV Image Processing*
F. Scarano and M.L. Riethmuller 177
- II.5. *Characterization of a Bluff Body Wake Using LDV and PIV Techniques*
Ö. Karatekin, F.Y. Wang, and J.M. Charbonnier 193
- II.6. *Reynolds Number Dependence of Near Wall Turbulent Statistics in Channel Flows*
M. Fischer, F. Durst and J. Jovanovic 209
- II.7. *Weakly Interacting Two Parallel Plane Jets*
J.C.S. Lai and A. Nasr 223

CHAPTER III. AERODYNAMICS

- III.1. *Instantaneous Doppler Global Velocimetry Measurements of a Rotor Wake: Lessons Learned*
J.F. Meyers, G.A. Fleming, S.A. Gorton, and J.D. Berry 243
- III.2. *LDV-Measurements on a High-Lift Configuration with Separation Control*
F. Tinapp and W. Nitsche 261

- III.3. *Flow Field in the Vicinity of a Thick Cambered Trailing Edge*
G. Pailhas, Ph. Savage, Y. Touvet, and E. Coustols 269
- III.4. *Instantaneous Flow Field Measurements for Propeller Aircraft and Rotorcraft Research*
M. Raffel, F. de Gregorio, K. Pengel, C.E. Willert, C. Kähler,
T. Dewhirst, K. Ehrenfeld, and J. Kompenhans 277

CHAPTER IV. MIXERS AND ROTATING FLOWS

- IV.1. *Analysis of Orderliness in Higher Instabilities Toward the Occurrence of Chaos in a Taylor-Couette Flow System*
N. Ohmura, K. Matsumoto, T. Aoki, and K. Kataoka 299
- IV.2. *Experimental Investigations on Nonlinear Behaviour of Baroclinic Waves*
B. Sitte and C. Egbers 315
- IV.3. *Dissipation Estimation Around a Rushton Turbine Using Particle Image Velocimetry*
K.V. Sharp, K.C. Kim, and R. Adrian 337
- IV.4. *Visualization of the Trailing Vortex System Produced by a Pitched Blade Turbine Using a Refractive Index Matched Automated LDA-Technique*
M. Schafer, P. Wachter, F. Durst, and M. Yianneskis 355
- IV.5. *Phase-Resolved Three-Dimensional LDA Measurements in the Impeller Region of a Turbulently Stirred Tank*
J.J. Derksen, M.S. Doelman, and H.E.A. van den Akker 369

CHAPTER V. COMBUSTION AND ENGINES

- V.1. *On the Extension of a Laser-Doppler Velocimeter to the Analysis of Oscillating Flames*
E.C. Fernandes and M.V. Heitor 383
- V.2. *Liquid-Fuelled Flames with Imposed Air Oscillations*
Y. Hardalupas, A. Selbach, and J.H. Whitelaw 403

- V.3. *Application of New Light Collecting Probe with High Spatial Resolution to Spark-Ignited Spherical Flames*
S. Tsushima, F. Akamatsu, and M. Katsuki 417
- V.4. *Laser Ignition of Single Magnesium Particles*
J.F. Zevenbergen, A.E. Dahoe, A.A. Pekalski, and B. Scarlett 431
- V.5. *PIV Measurements During Combustion in a Reciprocating Internal Combustion Engine*
D.L. Reuss and M. Rosalik 441
- V.6. *In-Cylinder Measurements of Mixture Composition for Investigation of Residual Gas Scavenging*
P. Miles 457
- V.7. *Laser Diagnostics of Nitric Oxide Inside a Two-Stroke DI Diesel Engine*
N. Dam, W. Meerts, and J.J. ter Meulen 473
- V.8. *Investigation of Oil Transport Mechanisms on the Piston Second Land of a Single Cylinder Diesel Engine, Using Two-Dimensional-Laser-Induced Fluorescence*
B. Thirouard and D.P. Hart 487
- V.9. *Simultaneous Planar OH and Temperature Measurements for the Detection of Lifted Reaction Zones in Premixed Bluff-Body Stabilized Flames*
D. Most, V. Holler, A. Soika, F. Dinkelacker, and A. Leipertz 505

CHAPTER VI. TWO-PHASE FLOWS

- VI.1. *Molten Metal Atomization by Inert Gases: Off-Line and On-Line Metal Powder Characterization by PDA*
G. Brenn, J. Raimann, G. Wolf, J. Domnick, and F. Durst 523
- VI.2. *Effect of Variable Liquid Properties on the Flow Structure within Shear-Driven Wall Films*
A. Elsässer, W. Samenfink, J. Ebner, K. Dullenkopf, and S. Wittig 545
- VI.3. *Some Aspects of Electrohydrodynamic Spraying in Cone-Jet Mode*
K. Ohba, P.H. Son, and Y. Dakemoto 565

VI.4. <i>The Velocity Field in an Air-Blasted Liquid Sheet</i> A. Lozano, I. García Pallacín, F. Barreras and C. Dopazo	575
VI.5. <i>Measurements of Film Characteristics Along a Stationary Taylor Bubble Using Laser Induced Fluorescence</i> J.P. Kockx, R. Delfos, and R.V.A. Oliemans	587
VI.6. <i>Experimental Analysis of a Confined Bluff Body Flow Laden with Solid Particles</i> T. Ishima, J. Borée, P. Fanouillère, and I. Flour	605
VI.7. <i>3-D Measurements of Bubble Motion and Wake Structure in Two-Phase Flows Using 3-D Scanning Particle-Image-Velocimetry (3-D SPIV) and Stereo-Imaging</i> Ch. Brücker	621
Author Index	637

Laser Techniques Applied to Fluid Mechanics
Selected Papers from the 9th International Symposium
Lisbon, Portugal, July 13-16, 1998
Adrian, R.J.; Durao, D.; Durst, F.; Heitor, M.V.; Maeda,
M.; Whitelaw, J.H. (Eds.)
2000, XI, 639 p., Hardcover
ISBN: 978-3-540-66738-4
