

# Contents

<b>1. Response of a Nonlinear System</b> .....	1
Problems .....	4
<b>2. Continuous Dynamical Systems</b> .....	5
2.1 Phase Space and Attractors .....	5
2.2 Fixed Points and Linearisation .....	11
2.3 Relation Between Nonlinear and Linear Systems .....	17
2.4 Poincaré Map .....	20
2.5 Lyapunov Exponents and Chaos .....	23
2.6 Spectral Analysis .....	27
2.7 Description of Different Attractors .....	31
2.8 Reconstruction of Attractor from Time Series .....	31
Problems .....	35
<b>3. Discrete Dynamical Systems</b> .....	39
3.1 Introductory Example .....	39
3.2 One-Dimensional Maps .....	40
3.3 Bifurcations of One-Dimensional Maps .....	48
3.4 One-Dimensional Maps and Higher-Dimensional Systems .....	49
Problems .....	52
<b>4. Fractals</b> .....	53
4.1 The Cantor Set .....	53
4.2 Fractal Dimensions .....	56
4.3 Fractal Sets .....	59
4.4 Smale Horseshoe .....	61
4.5 Fractal Basin Boundaries .....	64
Problems .....	67
<b>5. Routes to Chaos</b> .....	69
5.1 Period-Doubling .....	69
5.2 Quasiperiodic Route .....	71
5.3 Intermittency .....	74

5.4	Duffing's Oscillator: Discrete Dynamics Approach .....	77
5.5	Condition for Chaos by Period Doubling Route.....	80
	Problems .....	85
<b>6.</b>	<b>Applications .....</b>	<b>87</b>
6.1	Chaos in Systems with Dry Friction.....	87
6.2	Chaos in Chemical Reactions .....	94
6.3	Elastica and Spatial Chaos .....	97
6.4	Electronic Circuits and Chaos .....	99
6.5	Chaos in Model of El Nino Events .....	105
<b>7.</b>	<b>Controlling Chaos .....</b>	<b>111</b>
7.1	Controlling Methods .....	111
7.1.1	Control Through Feedback .....	111
7.1.2	Control by System Design .....	115
7.1.3	Selection of Controlling Method .....	119
7.2	Synchronisation of Chaos .....	120
7.2.1	Pecora and Carroll's Approach .....	120
7.2.2	Synchronisation by Continuous Control .....	122
7.3	Secure Communication .....	127
7.4	Estimation of the Largest Lyapunov Exponent Using Chaos Synchronisation .....	131
	<b>References .....</b>	<b>137</b>
	<b>Index .....</b>	<b>141</b>

Chaos for Engineers

Theory, Applications, and Control

Kapitaniak, T.

2000, XII, 144 p. 32 illus., Softcover

ISBN: 978-3-540-66574-8
