

Contents

Introduction

Chapter 1

General Aspects of Nonradioactive Analysis of Biomolecules

CHRISTOPH KESSLER 1

Part A Standard Nonradioactive Labeling Systems

Chapter 2

Overview of Nonradioactive Labeling Systems

CHRISTOPH KESSLER 41

The DIG (Digoxigenin:Anti-Digoxigenin) System

Chapter 3

Overview on the Digoxigenin:Anti-Digoxigenin (DIG) System

CHRISTOPH KESSLER 59

Chapter 4

Labeling and Detection of Nucleic Acids

HANS-JOACHIM HÖLTKE, KELLY KING, CATHY HOOVER,
IRMGARD OBERMAIER, BARBARA RÜGER, KLAUS MÜHLEGGGER,
AND CHRISTOPH KESSLER 61

Chapter 5

Labeling and Detection of Proteins and Glycoproteins

ANTON HASELBECK AND WOLFGANG HÖSEL 94

The Biotin (Biotin:Streptavidin) System

Chapter 6

Labeling and Detection of Nucleic Acids

AYOUB RASHTICHIAN AND JESSE MACKEY 111

Chapter 7	
Labeling of Proteins During <i>In Vitro</i> Translation	
THOMAS METZLER AND HANS-JOACHIM HOELTKE	137

Chapter 8	
Labeling and Detection of Proteins and Glycoproteins	
EDWARD A. BAYER AND MEIR WILCHEK	155

5-BrdU, AAF, Gold Labeling

Chapter 9	
<i>In Vivo</i> Labeling of DNA Probes with 5-BrdU	
JEAN-LUC GUESDON	168

Chapter 10	
AAF-labeling of DNA and Oligonucleotides	
JEAN-LUC GUESDON, JACQUES AURIOLA, AND DANIELÈ CHEVRIER	180

Chapter 11	
Colloidal Gold as a Marker in Molecular Biology: The Use of Ultra-Small Gold Conjugates	
PETER F. E. M. VAN DE PLAS AND JAN L. M. LEUNISSEN	193

Direct Enzyme Label

Chapter 12	
Direct Peroxidase Labeling of Hybridization Probes and Chemiluminescence Detection	
IAN DURRANT	206

Chapter 13	
The SNAP System	
JAMES E. MARICH AND JERRY L. RUTH	216

Part B Specialized Nonradioactive Detection Systems

Chapter 14	
Overview on Nonradioactive Detections Systems	
CHRISTOPH KESSLER	227

Chapter 15	
Overview of Colorimetric, Chemiluminometric, and Fluorimetric Detection Systems	
HANS-JOACHIM GUDER, DIETER HEINDL, AND HANS-PETER JOSEL	240
Colorimetric Systems	
Chapter 16	
Indigo/Tetrazolium Dyes	
HANS-JOACHIM GUDER, DIETER HEINDL, AND HANS-PETER JOSEL	249
Chapter 17	
Azo Dyes	
PETER SCHÜSSLER, CHRISTOPH G. GREVELDING, AND WERNER KUNZ	253
Luminescence Systems	
Chapter 18	
Chemiluminescent Detection with Horseradish Peroxidase and Luminol	
DIETER HEINDL, HANS-PETER JOSEL	258
Chapter 19	
Chemiluminescence: Properties of 1,2-Dioxetane Chemiluminescence	
IRENA BRONSTEIN AND LARRY KRICKA	262
Chapter 20	
Electrochemiluminescence: Ruthenium Complexes	
JOHN H. KENTEN	271
Chapter 21	
Bioluminescence: D-Luciferin as Substrate	
DUSICA GABRIJELCIC-GEIGER, WERNER MISKA, AND REINHARD ERICH GEIGER	276
Fluorescence Systems	
Chapter 22	
Labeling of Biomolecules with Fluorophores	
DIETER HEINDL, HANS-PETER JOSEL	284

Chapter 23	
Time-Resolved Fluorescence	
ELEPHTERIOS P. DIAMANDIS AND THEODORE K. CHRISTOPOULOS	289

Part C Amplification Systems for Sensitivity Enhancement

Chapter 24	
Overview of Amplification Systems	
CHRISTOPH KESSLER	297

PCR Target Amplification

Chapter 25	
Amplification of Nucleic Acids by Polymerase Chain Reaction: Overview on Basic Principles	
ARNDT ROLFS, ULRICH FINCKH, AND PETER BAUER	311

Chapter 26	
PCR: Overview on Application Formats in Research and Clinical Diagnosis	
GERD HABERHAUSEN	327

Chapter 27	
PCR Amplification for the Generation of DIG-Labeled Probes	
BARBARA RÜGER AND RÜDIGER RÜGER	335

Chapter 28	
<i>In Situ</i> PCR Amplification of cDNA	
GERARD J. NUOVO	343

Strand Displacement Amplification (SDA) Target Amplification

Chapter 29	
SDA Target Amplification	
CATHERINE A. SPARGO, CHERYL H. DEAN, COLLEEN M. NYCZ, AND G. TERRANCE WALKER	356

Chapter 30	
<i>In Situ</i> Strand Displacement Amplification	
ROBERT A. REID AND G. TERRANCE WALKER	367

Transcription-Mediated Amplification (TMA) Target Amplification

Chapter 31

Isothermal Amplification of RNA

by Transcription-Mediated Amplification (TMA)

STEVEN T. BRENTANO, AND SHERROL H. MCDONOUGH 374

Ligase Chain Reaction (LCR) Amplification

Chapter 32

Ligase Chain Reaction

GEORG H. SHIMER AND KEITH BACKMAN 381

Signal Amplification

Chapter 33

Branched DNA (bDNA) Technology

MICKEY URDEA AND LINDA WUESTEHUBE 388

Chapter 34

rDNA Amplification: Application of 16S rDNA-Based Methods for Bacterial Identification

FREDERICK A. RAINEY AND ERKO STACKEBRANDT 396

Chapter 35

PRINS: Primed *In Situ* Labeling and Hybridization in one Step

JØRN KOCH 407

Part D Application Formats

Chapter 36

Overview on Amplification Formats

CHRISTOPH KESSLER 419

Chapter 37

Overview on Factors Influencing Nucleic Acid Hybridization

CHRISTOPH KESSLER 437

Blot Formats: Nucleic Acids

Chapter 38

Dot, Southern, and Northern Blots

BARBARA RÜGER 443

Chapter 39	
PNA Pre-Gel Hybridization – An Alternative to Southern Blotting	
MICHAEL EGHOLM AND HEATHER PERRY-O'KEEFE	464
Chapter 40	
Multilocus DNA Fingerprinting Using Nonradioactively Labeled Oligonucleotide Probes Specific for Simple Repeat Elements	
JÖRG T. EPPLER AND JUDITH MÁTHÉ	468
Blot Formats: Proteins and Glycoproteins	
Chapter 41	
Detection of Proteins and Glycoproteins on Western Blots	
ANTON HASELBECK AND WOLFGANG HÖSEL	475
<i>In Situ</i> Formats	
Chapter 42	
PNA as Specific Probe for <i>In Situ</i> Hybridization to Metaphase Chromosomes	
BODIL LOMHOLT, SUNE FREDERIKSEN, AND PETER E. NIELSEN . . .	478
Chapter 43	
A Highly Sensitive Method for Detecting Peroxidase in <i>In Situ</i> Hybridization or Immunohistochemical Assays	
JAMES G. LAZAR AND FLOYD E. TAUB	484
Chapter 44	
Non-Fluorescent Differentiation of Viral and Chromosomal Nucleic Acids in Individual Nuclei	
SHIRLEY A. SOUTHERN AND C. SIMON HERRINGTON	494
Chapter 45	
Virus Detection in Biopsy Specimens	
VEIJO HUKKANEN AND PIIRKKO HEINO	505
Chapter 46	
Mapping of Polytene Chromosomes	
CHRISTIANE KRAEMER AND ERWIN R. SCHMIDT	516
Chapter 47	
Fluorescence <i>In Situ</i> Hybridization on Banded Chromosomes	
N. ARNOLD, M.B. UPENDER, T. RIED, J. WIENBERG, AND D. C. WARD	524

Chapter 48

Spectral Karyotyping: New Tools for Multicolor Chromosome Analysis

IRIT BAR-AM, MEENA AUGUSTUS, GEORGE MACNAMARA,
THOMAS RIED, AND EVELIN SCHRÖCK 539

Chapter 49

Chromosome Analysis by Multiplex-FISH (M-FISH)

MICHAEL SPEICHER 556

Chapter 50

Whole Mount *In Situ* Hybridization for the Detection
of mRNA in *Drosophila* Embryos

DIETHARD TAUTZ 573

Chapter 51

Double Labeling of mRNA and Proteins in *Drosophila* Embryos

BARBARY COHEN AND STEPHAN M. COHEN 581

Quantitative Formats

Chapter 52

Detection of DNA/RNA Target/Probe Complexes
with DNA/RNA-Specific Antibodies

FRANCOIS COUTLÉE, ROBERT H. YOLKEN, AND RAPHAEL P. VISCIDI 594

Chapter 53

Molecular Beacons: Hybridization Probes for Detection of Nucleic
Acids in Homogeneous Solutions

SANJAY TYAGI, SALVATORE A. E. MARRAS, JACQUELINE A. M. VET,
AND FRED RUSSELL KRAMER 606

Chapter 54

Detection of DIG-Labeled Amplicons
on Streptavidin-Coated Microtiter Plates

STEFANIE KÖHLER, VOLKER SCHLÜTER, AND RUDOLF SEIBL 617

Chapter 55

A Fluorogenic PCR-Based Assay for the Rapid Detection of *Salmonella*

CHRISTINE PASZKO-KOLVA AND CARL YAMASHIRO 622

Chapter 56	
PCR-Coupled Activation of Intercalating Dyes	
TAKAHIKO ISHIGURO	631
Chapter 57	
Simultaneous SDA and Fluorescence Polarization Detection	
PATRICIA A. SPEARS AND G. TERRANCE WALKER	640
Sequencing Formats	
Chapter 58	
Large-Scale Genomic Sequencing Using Four Color Fluorescent Detection – Principles and Protocols	
MATTHIAS PLATZER, GERALD NYAKATURA, AND ANDRÉ ROSENTHAL	648
Chapter 59	
DIG DNA Sequencing with Chemiluminescent or Dye Substrates	
GREGOR SAGNER	675
Chapter 60	
DNA Sequencing: Chemiluminescent Detection with the 1,2 Dioxane CSPD	
CHRIS S. MARTIN AND IRENA BRONSTEIN	689
Chapter 61	
Direct-Blotting-Electrophoresis (DBE) for DNA Sequencing	
THOMAS M. POHL	695
Chapter 62	
Sequence Analysis of Nucleic Acids by Mass Spectrometry	
DIRK VAN DEN BOOM, CHRISTIAN JURINKE, DONG-JING FU, AND HUBERT KÖSTER	701
Array Formats	
Chapter 63	
Mismatch Analysis by PNA Arrays	
ANE LESTER, ALBERT GEIGER, JÖRG KLEIBER, AND HENRIK ØRUM	713
Chapter 64	
Oligonucleotide Arrays for the Detection of <i>ras</i> Mutations	
ROBERT S. MATSON	724

Chapter 65	
Use of Oligonucleotide Arrays for Gene Expression Monitoring	
MICHAEL C. BYRNE AND MARYANN Z. WHITLEY	738
Subject Index	745

Appendix: Reference List for Nonradioactive Digoxigenin (DIG) System

On the Internet:

<http://www.springer.de/books/toc/3540646019-ac.pdf>

or

via the Springer Book Catalogue <http://www.springer.de>

► *search* Catalogue

Author: Kessler (*Publication Year:* 2000)

go to the book's side and klick on Table of Contents (PDF). The Contents will be displayed, klick on Appendix to open the Appendix file with the list of references.

For viewing the reference list in pdf-format you have to use the Acrobat Reader which you can download free of charge from the Internet.
