
Contents

Section I: Basic Physiology

Local Control of Coronary Blood Flow and Adenosine	3
<i>F.S. Villanueva</i>	
Basic Mechanisms of Atherosclerosis: From Inflammation to Infection	11
<i>L. Capron, B. Wyplosz</i>	

Section II: Applied Physiology

Myocardial Ischemic Preconditioning	23
<i>D.M. Van Winkle</i>	
Coronary Circulation in Sepsis	36
<i>J.-F. Dhainaut, N. Marin, J.D. Chiche</i>	
Role of Inflammatory Response and Thrombosis in Acute Coronary Syndromes	46
<i>A. Fernández Ortiz</i>	
Basic Aspects of Fibrinolysis and Thrombolysis	62
<i>H.R. Lijnen, D. Collen</i>	

Section III: Functional Assessment of the Coronary Circulation

Quantitative Echocardiographic Evaluation of Cardiac Function	75
<i>J. Gorcsan III</i>	
Prognosis in Unstable Angina	90
<i>J. Figueras</i>	

Assessment of Myocardial Viability	99
<i>A. Flotats, I. Carrió</i>	

Functional Assessment of the Coronary Physiology: The Role of Magnetic Resonance	114
<i>J.F. Toussaint</i>	

Intracoronary Ultrasound Imaging	127
<i>J.-C. Tardif, J. Grégoire</i>	

Section IV: Therapeutic and Clinical Applications

Non-Antithrombotic Treatment of Acute Coronary Syndromes: Role of Beta-Blockers, Calcium Channel Blockers, and Nitrates	141
<i>X. Bosch</i>	

Coronary Circulation and Myocardial Ischaemia: Thrombolysis	156
<i>P. Sleight</i>	

Interventional Cardiology in the Treatment of Coronary Disease	163
<i>C. Spaulding, R. Cador, S. Weber</i>	

Enhancement of Coronary Blood Flow as Myocardial Salvage Therapy	178
<i>D. Karila-Cohen</i>	

Subject Index	191
---------------------	-----

Coronary Circulation and Myocardial Ischemia

Pinsky, M.R.; Artigas, A.; Dhainaut, J.-F. (Eds.)

2000, X, 193 p., Hardcover

ISBN: 978-3-540-62584-1
