

Table of Contents

Introduction	1
<i>Malcolm P. Atkinson</i>	
1 Persistent Languages: Introduction and Overview	5
<i>Ron Morrison</i>	
1.1 Language Design: Introduction and State of the Art	9
<i>Antonio Albano</i>	
1.1.1 Higher-Order Persistent Polymorphic Programming in Tycoon	13
<i>Florian Matthes</i>	
1.1.2 Fibonacci: A Programming Language for Object Databases	60
<i>Antonio Albano, Giorgio Ghelli, Remo Orsini</i>	
1.1.3 The Napier88 Persistent Programming Language and Environment	98
<i>Ron Morrison, Richard Connor, Graham Kirby, David Munro, Malcolm P. Atkinson, Quintin Cutts, Fred Brown, Alan Dearle</i>	
1.2 Linguistic Reflection: Introduction and State of the Art	155
<i>Ron Morrison</i>	
1.2.1 Type-Safe Linguistic Reflection: A Generator Technology	158
<i>David Stemple, Leo Fegaras, Robin Stanton, Tim Sheard, Paul C. Philbrow, Richard Cooper, Malcolm P. Atkinson, Ron Morrison, Graham Kirby, Richard Connor, Suad Alagić</i>	
1.2.2 Type-Safe Linguistic Run-time Reflection: A Practical Perspective	189
<i>Richard Cooper, Graham Kirby</i>	
1.3 Type Systems: Introduction and State of the Art	193
<i>Richard Connor, Giorgio Ghelli</i>	
1.3.1 A Calculus for Overloaded Functions with Subtyping	196
<i>Giuseppe Castagna, Giorgio Ghelli, Giuseppe Longo</i>	
1.3.2 Protection in Persistent Object Systems	234
<i>Ron Morrison, Fred Brown, Richard Connor, Quintin Cutts, Graham Kirby, Alan Dearle, John Rosenberg, David Stemple</i>	
1.3.3 Subtyping and Assignment in Database Programming Languages	238
<i>Richard Connor, David McNally, Ron Morrison</i>	
1.4 Bulk Types and Iterators: Introduction and State of the Art	241
<i>Florian Matthes</i>	

1.4.1	The Joy of Sets	245
	<i>Richard Connor, Malcolm P. Atkinson, Sonia Berman, Quintin Cutts, Graham Kirby, Ron Morrison</i>	
1.4.2	Bulk Types: Built-In or Add-On?	257
	<i>Florian Matthes, Joachim W. Schmidt</i>	
1.4.3	Extensible Objects for Database Evolution: Language Features and Implementation Issues	262
	<i>Antonio Albano, Milena Diotallevi, Giorgio Ghelli</i>	
1.5	Concurrency and Transactions: Introduction and State of the Art	283
	<i>Ron Morrison</i>	
1.5.1	Specifying Flexible Concurrency Control Schemes: an Abstract Operational Approach	286
	<i>David Stemple, Ron Morrison</i>	
1.5.2	Persistent Threads	290
	<i>Florian Matthes, Joachim W. Schmidt</i>	
2	Persistent Support Systems: Introduction and Overview	297
	<i>Florian Matthes</i>	
2.1	Architecture and Abstract Machines: Introduction and State of the Art	303
	<i>Malcolm P. Atkinson</i>	
2.1.1	Persistent Foundations for Scalable Multi-Paradigmal Systems	310
	<i>Malcolm P. Atkinson</i>	
2.1.2	The DBPL Project: Advances in Modular Database Programming	341
	<i>Joachim W. Schmidt, Florian Matthes</i>	
2.1.3	The PamCase Machine	346
	<i>Quintin Cutts, Richard Connor, Ron Morrison</i>	
2.1.4	Tycoon: A Scalable and Interoperable Persistent System Environment	365
	<i>Florian Matthes, Gerald Schröder, Joachim W. Schmidt</i>	
2.2	Object Store Design: Introduction and State of the Art	383
	<i>Fausto Rabitti</i>	
2.2.1	An Open System Architecture for a Persistent Object Store	387
	<i>Fred Brown, Giovanni Mainetto, Florian Matthes, Rainer Müller, David McNally</i>	
2.2.2	Overview of PIOS: a Physically Independent Object Server	391
	<i>Giuseppe Amato, Salvatore Biscari, Giovanni Mainetto, Fausto Rabitti</i>	

2.2.3 Efficient Incremental Garbage Collection for Client-Server Object Database Systems	427
<i>Laurent Amsaleg, Michael Franklin, Olivier Gruber</i>	
2.2.4 Towards a Unified Model of Untyped Object Stores: Experience with the Tycoon Store Protocol	431
<i>Florian Matthes, Rainer Müller, Joachim W. Schmidt</i>	
2.2.5 Measuring Persistent Object Systems	434
<i>Malcolm P. Atkinson, Anthony Birnie, Niall Jackson, Paul C. Philbrow</i>	
2.3 Implementation Techniques: Introduction and State of the Art ..	439
<i>Ron Morrison</i>	
2.3.1 Concurrent Shadow Paging in the Flask Architecture	442
<i>David Munro, Richard Connor, Ron Morrison, Stephan Scheuerl, David Stemple</i>	
2.3.2 Locking in OODBMS Clients Supporting Nested Transactions ..	446
<i>Laurent Daynès, Olivier Gruber, Patrick Valduriez,</i>	
2.3.3 Query Processing in PIOS	462
<i>Fausto Rabitti, Leonardo Benedetti, Federico Demi</i>	
2.3.4 Optimization of Nested Queries in Object Bases	481
<i>Sophie Cluet, Guido Moerkotte</i>	
2.3.5 Integrating Query and Program Optimization Using Persistent CPS Representations	496
<i>Andreas Gawecki, Florian Matthes</i>	
2.3.6 An ad hoc Approach to the Implementation of Polymorphism ...	502
<i>Ron Morrison, Alan Dearle, Richard Connor, Fred Brown</i>	
3 Using Persistent Languages: Introduction and Overview	505
<i>Ray Welland</i>	
3.1 Persistent Programming Environments: Introduction and State of the Art	507
<i>Ray Welland</i>	
3.1.1 Exploiting Persistent Linkage in Software Engineering Environments	511
<i>Ron Morrison, Richard Connor, Quintin Cutts, Vivienne Dunstan, Graham Kirby</i>	
3.1.2 Using Persistence Technology to Control Schema Evolution	515
<i>Richard Connor, Quintin Cutts, Graham Kirby, Ron Morrison</i>	
3.1.3 Unifying Interaction with Persistent Data and Program	519
<i>Richard Connor, Quintin Cutts, Graham Kirby, Vivienne Dunstan, Ron Morrison</i>	

3.1.4	The Persistent Workshop: Programming Environment for Napier88	523
	<i>Dag Sjøberg, Ray Welland, Malcolm P. Atkinson, Paul C. Philbrow, Cathy Waite, Stewart Macneill</i>	
3.1.5	The Glasgow Persistent Libraries	527
	<i>Malcolm P. Atkinson, Ray Welland, Paul C. Philbrow, Cathy Waite, Richard Cooper, Darryn Lavery, Alan Froggatt, Claudia Herzig, Stewart Macneill, Miguel Mira da Silva, Greig Montgomery, Alex Pirmohamed, Tony Printezis</i>	
3.1.6	Visualising Persistent Stores	540
	<i>Gilbert Cockton, Darryn Lavery</i>	
3.2	Data Modelling: Introduction and State of the Art	549
	<i>Richard Cooper</i>	
3.2.1	Application Development using Data Modelling	553
	<i>Richard Cooper</i>	
3.2.2	The STYLE Workbench: Systematics of Typed Language Environments	570
	<i>Ingrid Wetzel, Florian Matthes, Joachim W. Schmidt</i>	
3.2.3	Using Extensible Grammars for Data Modelling	584
	<i>Florian Matthes, Joachim W. Schmidt, Jens Wahlen</i>	
3.3	Interoperability: Introduction and State of the Art	599
	<i>Florian Matthes</i>	
3.3.1	Querying the File	602
	<i>Serge Abiteboul, Sophie Cluet, Tova Milo</i>	
3.3.2	Updating the File	621
	<i>Serge Abiteboul, Sophie Cluet, Tova Milo</i>	
3.3.3	Lean Languages and Models: Towards an Interoperable Kernel for Persistent Object Systems	623
	<i>Joachim W. Schmidt, Florian Matthes</i>	
	List of Contributors	629

Fully Integrated Data Environments
Persistent Programming Languages, Object Stores, and
Programming Environments

Atkinson, M.P.; Welland, R. (Eds.)

2000, X, 629 p., Hardcover

ISBN: 978-3-540-65772-9
