

Table of Contents

Foreword	V
Preface	VII
List of Participants	XVII

Social Dynamics

Recurrence in Physical and Social Systems	3
<i>W. Weidlich</i>	
Econophysics: What Can Physicists Contribute to Economics?	15
<i>H.E. Stanley, L.A. Nunes Amaral, P. Gopikrishnan, V. Plerou, B. Rosenow</i>	
Catastrophe Effects and Optimal Extensions of Transportation Flows in the Developing Urban System: A Review	31
<i>M. Sonis</i>	
Evolutionary Models of Innovation Dynamics	43
<i>W. Ebeling, A. Scharnhorst</i>	
Universality of Group Decision Making	57
<i>S. Galam</i>	
Formation of Opinions under the Influence of Competing Agents – a Mean Field Approach	69
<i>K. Kacperski, J.A. Holyst</i>	
Search for Intelligence by Motion Analysis ;-)	81
<i>I.M. János</i>	
Anticipatory Traffic Forecast Using Multi-Agent Techniques	87
<i>J. Wahle, A.L. Bazzan, F. Klügl, M. Schreckenberg</i>	
Modal Split and Social Dilemmas	93
<i>R. Berkemer</i>	
Synthesising Brillouin Information-Thermodynamic Approach with the Social Synergetics Weidlich-Haag Model	99
<i>J.Z. Hubert</i>	

Biology, Internet, Transport Theory

Evolution of Molecular Phenotypes – A Physicist’s View of Darwin’s Principle	109
<i>P. Schuster</i>	
Stochastic Resonance and Brownian Machinery: New Results – New Applications – New Goals	133
<i>P. Hänggi</i>	
Studies of Bacterial Cooperative Organization	135
<i>I. Golding, I. Cohen, E. Ben-Jacob</i>	
Collective Motion and Optimal Self-Organisation in Self-Driven Systems . .	147
<i>T. Vicsek, A. Czirók, D. Helbing</i>	
Active Brownian Particles with Internal Energy Depot	161
<i>F. Schweitzer</i>	
Associative Memory of a Pulse-Coupled Noisy Neural Network with Delays: The Lighthouse Model	173
<i>H. Haken</i>	
Application of Neural Networks for Predictive and Control Purposes	181
<i>B. Schürmann</i>	
Optimizing Traffic in Virtual and Real Space	193
<i>D. Helbing, B.A. Huberman, S.M. Maurer</i>	
Is Boltzmann’s Equation Physically Insufficient?	205
<i>S. Grossmann</i>	
Fractional Evolution Equations and Irreversibility	215
<i>R. Hilfer</i>	
Dynamical Theory of Steady State Selection in Open Driven Diffusive Systems	227
<i>G.M. Schütz</i>	
Application of a Deterministic Scheme for the Boltzmann Equation in Modelling Shock Wave Focusing	233
<i>P. Kowalczyk, T. Platkowski, W. Waluś</i>	
Nonlinear Waves and Moving Clusters on Rings	239
<i>U. Erdmann, J. Dunkel, W. Ebeling</i>	
Freezing by Heating in a Pedestrian Model	245
<i>D. Helbing, I.J. Farkas, T. Vicsek</i>	

Traffic Data and Applications

Phase Transitions in Traffic Flow	253
<i>B.S. Kerner</i>	
An Integrated Model of Transport and Urban Evolution (ITEM) – Traffic and City Development in Emergent Nations	285
<i>G. Haag</i>	
Statistical Analysis of Freeway Traffic	307
<i>L. Neubert, L. Santen, A. Schadschneider, M. Schreckenberg</i>	
Nonlinear Control of Stop-and-Go Traffic	315
<i>R. Sollacher, H. Lenz</i>	
Online Simulation and State Estimation for a Traffic Flow Model	321
<i>J. Meier</i>	
Traffic News by Dynamic Fuzzy Classification	327
<i>C. Schnörr</i>	
Evaluation of Single Vehicle Data in Dependence of the Vehicle-Type, Lane, and Site	333
<i>B. Tilch, D. Helbing</i>	
Forecasting of Traffic Congestion	339
<i>B.S. Kerner, H. Rehborn, M. Aleksic</i>	
Empirical Phase Diagram of Traffic Flow on Highways with On-Ramp	345
<i>H.Y. Lee, H.-W. Lee, D. Kim</i>	
On-Line Simulation of the Freeway Network of North Rhine-Westphalia ...	351
<i>O. Kaumann, K. Froese, R. Chrobok, J. Wahle, L. Neubert, M. Schreckenberg</i>	
Traffic Data Collection Using Image Processing Technology	357
<i>P. Molnár, T.R. Collins</i>	

Modelling of Traffic Flow

Microscopic Simulation of Congested Traffic	365
<i>M. Treiber, A. Hennecke, D. Helbing</i>	
Order Parameter as an Additional State Variable of Unstable Traffic Flow	377
<i>I.A. Lubashevsky, R. Mahnke</i>	

XIV Contents

Macroscopic Simulation of Open Systems and Micro-Macro Link	383
<i>A. Hennecke, M. Treiber, D. Helbing</i>	
Relating Car-Following and Continuum Models of Road Traffic	389
<i>P. Berg, A. Woods</i>	
Microscopic Randomness in <i>Follow-the-Leader</i> Dynamics	395
<i>H. Lehmann</i>	
“Car-SPH”: A Lagrangian Particle Scheme for the Solution of the Macroscopic Traffic Flow Equations	401
<i>S. Rosswog, P. Wagner</i>	
An Exactly Solvable Two-Way Traffic Model with Ordered Sequential Update	407
<i>M. E. Fouladvand, H.-W. Lee</i>	
Exact Traveling Cluster Solutions of Differential Equations with Delay for a Traffic Flow Model	413
<i>K. Hasebe, A. Nakayama, Y. Sugiyama</i>	
Stable and Metastable States in Congested Traffic	419
<i>E. Tomer, L. Safonov, S. Havlin</i>	
Detailed Microscopic Rules to Simulate Multilane Freeway Traffic	425
<i>A. Kittel, A. Eidmann, M. Goldbach</i>	
CA Models for Traffic Flow: Comparison with Empirical Single-Vehicle Data	431
<i>W. Knospe, L. Santen, A. Schadschneider, M. Schreckenberg</i>	
A New Cellular Automata Model for City Traffic	437
<i>A. Schadschneider, D. Chowdhury, E. Brockfeld, K. Klauck, L. Santen, J. Zittartz</i>	
Stochastic Boundary Conditions in the Nagel-Schreckenberg Traffic Model	443
<i>S. Cheybani, J. Kertész, M. Schreckenberg</i>	
A Stochastic Multi-Cluster Model of Freeway Traffic	449
<i>J. Kaupuzs, R. Mahnke</i>	

Granular Dynamics

Jamming Patterns and Blockade Statistics in Model Granular Flows	457
<i>E. Clément, G. Reydellet, F. Rioual, B. Parise, V. Fanguet, J. Lanuza, E. Kolb</i>	
Kinetics of Granular Gases	469
<i>I. Goldhirsch</i>	
Particle Segregation in the Context of the Species Momentum Balances . . .	481
<i>B.Ö. Arnarson, J.T. Jenkins</i>	
Avalanche Parameters: Dependence on the Size of the Granular Packing . .	489
<i>M.A. Aguirre, N. Nerone, A. Calvo, I. Ippolito, D. Bideau</i>	
Ripple Formation in a Saltation-Avalanche Model	495
<i>S. Galam, N. Vandewalle, H. Caps</i>	
Particle Diffusion and Segregation in Rotating Cylinders	499
<i>G.H. Ristow</i>	
Molecular Dynamics Simulation of Cohesive Granular Materials	505
<i>A. Schinner, H.-G. Matuttis</i>	
A Model for Slowly Moving Granular Matter	511
<i>K.P. Haderler, C. Kuttler</i>	
Pressure Distribution of a Two-Dimensional Sandpile	517
<i>S. Inagaki</i>	

Traffic and Granular Flow '99

Social, Traffic, and Granular Dynamics

Helbing, D.; Herrmann, H.J.; Schreckenberg, M.; Wolf,
D.E. (Eds.)

2000, XXIII, 522 p. 20 illus. in color., Hardcover

ISBN: 978-3-540-67091-9
