

Contents

1	Introduction	1
2	Life Cycle Assessment	3
2.1	Life Cycle Assessment as an Instrument of Technology Assessment	3
2.2	Definition and Phases	5
2.3	Goal and Scope Definition.....	7
2.4	Inventory Analysis.....	7
2.5	Impact Assessment	9
2.5.1	General Framework and Impact Categories	9
2.5.2	Methods for Selected Impact Categories	12
2.5.2.1	Extraction of Abiotic Resources	13
2.5.2.2	Climate Change.....	14
2.5.2.3	Acidification.....	15
2.5.2.4	Nutrification	18
2.5.2.5	Human Toxicity	19
2.5.2.6	Photo-Oxidant Formation.....	38
2.6	Interpretation	40
3	Site-Dependent Impact Indicators for Human Health Effects of Airborne Pollutants	41
3.1	Introduction	41
3.2	Statistical Calculation of Class Averages	43
3.3	Classification of Emission Sites in Terms of Population Density	46
3.3.1	Classification Scheme	46
3.3.2	Radial Population Density Distribution.....	47
3.4	Atmospheric Dispersion of Pollutants	51
3.4.1	Dispersion of Primary Pollutants in the Short Range	51
3.4.1.1	Gaussian Dispersion Model	51
3.4.1.2	Generic Meteorological Data	52
3.4.1.3	Pollutant Concentrations	55

3.4.2	Long-Range Transport of Primary Pollutants and Formation of Secondary Pollutants	57
3.4.2.1	Windrose Trajectory Model	57
3.4.2.2	Pollutant Concentrations and Population Exposures.....	59
3.4.2.3	Analytical Estimates.....	60
3.5	Validity of the Statistical Assumptions.....	62
3.6	Results and Discussion	65
3.6.1	Traffic Emissions	65
3.6.2	Influence of the Emission Height	68
3.6.3	Variability of the Impacts within the Generic Spatial Classes ..	70
3.6.4	Relevance of Various Distance Ranges and of Street Canyons	72
3.6.5	Secondary Aerosols	77
3.6.6	Default Values for Other Countries.....	77
3.7	Summary and Conclusions	79
4	Life Cycle Assessment of Natural Gas Vehicles: Inventory Analysis.....	81
4.1	Goal and Scope Definition.....	81
4.1.1	Introduction to the Case Study	81
4.1.2	System Boundaries	83
4.1.3	Selection of Pollutants and Impact Categories	85
4.1.4	Functional Unit.....	87
4.2	Fuel Supply Chains.....	88
4.2.1	Natural Gas.....	88
4.2.1.1	Input Data.....	88
4.2.1.2	Emissions and Cumulative Energy Demand	92
4.2.1.3	Spatial Disaggregation	94
4.2.2	Diesel and Petrol	101
4.2.2.1	Input Data.....	101
4.2.2.2	Emissions and Cumulative Energy Demand	105
4.2.2.3	Spatial Disaggregation	107
4.2.3	Comparison of the Upstream Emissions.....	114
4.3	Buses.....	116
4.3.1	Vehicle Operation.....	116
4.3.2	Combination of Upstream and Vehicle Emissions	122
4.4	Cars.....	123
4.4.1	Vehicle Operation.....	123
4.4.2	Combination of Upstream and Vehicle Emissions	125
5	Life Cycle Assessment of Natural Gas Vehicles: Impact Assessment and Interpretation.....	127
5.1	Impact Assessment	127
5.1.1	Site-Dependent Assessment of Human Health Impacts	127
5.1.1.1	Upstream Processes.....	127
5.1.1.2	Damage Factors for Vehicle Emissions	128

5.1.1.3 Buses	131
5.1.1.4 Cars	133
5.1.2 Generic Assessment for Other Impact Categories.....	135
5.1.2.1 Buses	135
5.1.2.2 Cars	139
5.2 Interpretation	141
6 Summary and Outlook.....	149
References.....	153
Appendix.....	161

Life Cycle Assessment of Natural Gas Vehicles
Development and Application of Site-Dependent Impact
Indicators

Nigge, K.-M.

2000, XVI, 167 p., Hardcover

ISBN: 978-3-540-67273-9
