

Contents

Introduction	1
1. Translational Relaxation of Heavy Particles	5
References	11
2. Rotational Relaxation of Molecules	13
References	21
3. Vibrational Relaxation of Molecules	23
3.1 Estimation of Vibrational Relaxation Times	23
3.2 Vibrational Kinetics of Harmonic Oscillators	26
3.2.1 Vibrational Relaxation of Diatomic Molecules in an Inert Gas: V-T Exchange	26
3.2.2 One-Component Systems: V-V Exchanges	29
3.2.3 Binary Mixture of Diatomic Molecules: V-T , V-V and V-V' Exchanges	31
3.2.4 Polyatomic Molecules	34
3.3 Vibrational Kinetics of Anharmonic Oscillators	36
3.3.1 V-T Relaxation in an Inert Gas	37
3.3.2 V-V Exchanges. The Treanor Distribution	38
3.3.3 V-V and V-T Exchanges. Moderate Deviation from Equilibrium	39
3.3.4 Resonant V-V Relaxation Under High Excitation Conditions	41
3.3.5 Time-Dependent Relaxation at High Excitation	45
3.4 Vibrational Kinetics in the Presence of Chemical Reactions of Vibrationally Excited Molecules	47
References	54
4. Kinetics of Free Electrons	59
4.1 The Boltzmann Equation	59
4.2 EEDF in Discharges Sustained by an Electric Field	66
4.3 EEDF in Discharges Excited by an Electron Beam	74
References	79

5. Energetic and Spectroscopic Parameters of Atmospheric Species	85
References	93
6. Rates of Translational and Rotational Relaxation	95
6.1 Translational Relaxation and Diffusion Coefficients	95
6.2 Rotational Relaxation	99
References	103
7. Rate Coefficients for Vibrational Relaxation	105
7.1 Rate Coefficients of V-T Relaxation	105
7.2 Rate Coefficients of V-V and V-V' Processes	112
References	116
8. Electron Rate Coefficients	119
8.1 Integral Scattering Cross-Sections	119
8.2 Electron Rate Coefficients and Power Balance in Plasmas Maintained by an Electric Field	123
8.3 Electron Loss Processes in the Plasma Bulk	139
8.4 Electron Rate Coefficients and Energy Balance in the Ionosphere Plasma	142
8.5 Excitation, Dissociation and Ionization of N ₂ , O ₂ and O Species by an Electron Beam	145
References	149
9. Electronic State Relaxation Rates	155
9.1 Radiative Lifetimes	155
9.2 Relaxation in Collisions with Atoms and Molecules	158
References	163
10. Rate Coefficients of Chemical Reactions	167
10.1 Reactions of Neutral Species	167
10.2 Ion-Molecule Reactions	178
10.3 Vibrational Excitation of Reaction Products	185
References	187
11. Interactions of Gas Phase Species with Surfaces	193
11.1 Balance Equations and Boundary Conditions at Walls	193
11.2 Wall Loss Probabilities γ	196
11.3 Kinetic Model for Surface Processes	199
11.4 Molecular Dynamics Approach	206
References	207

12. Discharges in Pure N₂ and O₂	209
12.1 Discharge and Post-Discharge in N ₂	209
12.2 Discharge in O ₂	215
12.2.1 The Positive Column in Electronegative Gases	216
12.2.2 Chemical and Charge Kinetics in O ₂ Discharges	221
References	224
13. Discharges in N₂–O₂ Mixtures	229
13.1 Modelling of Low Pressure N ₂ –O ₂ Discharges	229
13.1.1 General Description of the Model	231
13.1.2 Kinetics of Free Electrons	231
13.1.3 Vibrational Kinetics	232
13.1.4 Kinetics of Electronic States and Chemical Kinetics	232
13.1.5 Interaction with the Wall	232
13.1.6 Gas and Wall Temperatures	233
13.2 Modelling of High Pressure N ₂ –O ₂ Discharges	241
13.2.1 Cleaning of Polluted Atmospheric Gases	241
13.2.2 N ¹⁴ and N ¹⁵ Isotope Separation	246
References	248
14. Kinetic Processes in the Ionosphere	251
14.1 Probabilities and Rates of Dissociation and Ionization	252
14.2 Chemical and Charge Kinetics	254
14.3 Vibrational Kinetics	257
References	264
15. Interaction of Space Vehicles with Atmospheric Gases	269
15.1 Free Molecular Regime	269
15.2 Hydrodynamic Regime. Vibrational and Chemical Kinetics During Space Shuttle Reentry	273
References	282
16. Acoustic and Shock Waves in Non-equilibrium Gases	287
16.1 Propagation of Small Perturbations in Non-equilibrium Gases	287
16.2 Nonlinear Hydrodynamic Waves in Non-equilibrium Gases	290
16.3 Propagation of Shock Waves in Non-equilibrium Gases	292
References	295
Index	299

Plasma Kinetics in Atmospheric Gases

Capitelli, M.; Ferreira, C.M.; Gordiets, B.F.; Osipov, A.I.

2000, X, 300 p., Hardcover

ISBN: 978-3-540-67416-0
