

Contents

1. Introduction	1
2. Classical Structure and Renormalization	5
2.1 Bosonic NLSM: Definition and Examples	5
2.2 Covariant Background-Field Method	10
2.3 Regularization and Quantum Ambiguities	18
2.4 NLSM Renormalization Group β -Functions	22
2.4.1 One-Loop Results	23
2.4.2 Two-Loop Results	24
2.4.3 Three-Loop Results	31
2.5 Buscher Duality and the Freedman-Townsend Model	42
2.6 Gauging NLSM Isometries	48
2.7 Skyrme NLSM of Pions and Nucleons	50
3. Supersymmetric NLSM	57
3.1 $N = 1$ NLSM Action and Background-Field Method	58
3.2 The Supersymmetric NLSM β -Functions	63
3.2.1 One-Loop Results	63
3.2.2 Two-Loop Results	64
3.2.3 Three-Loop Results	66
3.2.4 Four-Loop Results	68
3.3 NLSM on Homogeneous Spaces	80
3.4 Gauging NLSM Isometries	83
3.4.1 $N = 1$ NLSM in 4d, and Kähler Geometry	83
3.4.2 Gauging Isometries of 4d, $N = 1$ NLSM	87
4. NLSM and Extended Superspace	91
4.1 Complex Geometry and NLSM	93
4.1.1 ABC of Complex Geometry	94
4.1.2 4d, $N = 2$ NLSM in $N = 1$ Superspace	96
4.1.3 Triholomorphic Isometries of $N = 2$ NLSM	98
4.1.4 Gauging $N = 2$ NLSM Isometries in $N = 1$ Superspace	101
4.2 Special Geometry and Renormalization	103
4.2.1 $N = 2$ Susy and Restricted Chiral Superfields in 4d	103

4.2.2	Dimensional Reduction and 2d, $N = 4$ Special NLSM .	109
4.2.3	UV-Finiteness Versus Non-Renormalizability	113
4.3	NLSM in Projective Superspace	118
4.3.1	$N = 2$ Tensor Multiplet and Its Generalizations in 4d .	119
4.3.2	Reduction to 4d, $N = 1$ Superspace and Components .	122
4.3.3	Quaternionic Geometry and Extended Supersymmetry	130
4.3.4	Perturbation Theory in Extended Superspace	138
4.4	Hyper-Kähler Metrics and Harmonic Superspace	141
4.4.1	Four-Dimensional Hyper-Kähler Metrics	142
4.4.2	Harmonic Superspace	150
4.4.3	Hyper-Kähler NLSM in HSS	155
4.4.4	Gauging $N = 2$ NLSM Isometries in HSS	161
5.	NLSM and 2d Conformal Field Theory	165
5.1	WZNW Models and Their Symmetries	165
5.1.1	2d Conformal Invariance	165
5.1.2	AKM Symmetries and SS Construction	172
5.1.3	WZNW Models and Topological Quantization	176
5.2	Super-WZNW Models and Their Symmetries	180
5.2.1	Superconformal and Super-AKM Algebras	181
5.2.2	$N = 1$ and $N = 2$ Supersymmetric WZNW Models . .	186
5.3	Coset Construction and Gauged WZNW Models	194
5.3.1	Goddard-Kent-Olive Construction	194
5.3.2	Gauged WZNW Models	197
6.	NLSM and Strings	203
6.1	Bosonic String NLSM	203
6.1.1	NLSM Approach to String LEEA	205
6.1.2	Zamolodchikov's c -Theorem	209
6.2	Conformally Invariant NLSM and Black Holes	211
6.2.1	Witten's Black Hole	212
6.2.2	Exact String Black Hole Geometry	215
6.2.3	T-duality of Strings and NLSM	218
6.3	Non-Chiral Fermionic Strings in Curved Spacetime	221
6.3.1	$N = 1$ Neveu-Schwarz-Ramond NLSM	222
6.3.2	$N = 2$ Fermionic String NLSM	226
6.3.3	Anomalies of Bosonic and Fermionic Strings	230
6.4	$N = (2, 2)$ String Amplitudes and Integrability	237
6.4.1	Closed and Open $(2, 2)$ Strings	238
6.4.2	Mixed $(2, 2)$ String Amplitudes	240

7. Chiral (1,0) NLSM and Heterotic Strings	245
7.1 Anomalies of Heterotic NLSM in (1, 0) Superspace	245
7.1.1 (1, 0) Superspace	245
7.1.2 Background-Field Method in the Heterotic NLSM	249
7.1.3 Supergravitational and Superconformal Anomalies	257
7.2 Chiral Coset Construction of Heterotic Strings	270
7.2.1 Non-Abelian (1, 0) Supersymmetric Chiral Bosons	272
7.2.2 Non-Chiral (1, 0) Supersymmetric Coset Models	279
7.2.3 Chiral (1, 0) Supersymmetric Coset Models	281
7.2.4 Anomalies of (1, 0) Supersymmetric Coset Models	284
7.2.5 Anomaly-Free Solutions	290
7.2.6 No Siegel Anomaly in the $D = 4$ Heterotic NLSM	292
8. LEEA in 4d, $N = 2$ Gauge Field Theories	295
8.1 Motivation and Setup	296
8.2 4d, $N = 2$ Gauge LEEA in the Coulomb Branch	300
8.2.1 On Instanton Calculations	301
8.2.2 Seiberg-Witten Curve	302
8.2.3 Next-to-Leading Order Correction to the SW Action	304
8.3 Hypermultiplet LEEA in 4d	307
8.3.1 Hypermultiplet LEEA in the Coulomb Branch	308
8.3.2 $N = 2$ Reduction from HSS to PSS	315
8.3.3 Exact Hypermultiplet LEEA in the Higgs Branch	316
8.3.4 Atiyah-Hitchin Metric and Elliptic Curve	319
8.3.5 Hypermultiplet LEEA in the Presence of FI Term	321
8.4 Brane Technology	323
8.4.1 11d Supergravity and Its BPS Solutions	324
8.4.2 NS and D Branes in Ten Dimensions	327
8.4.3 Intersecting Branes	331
8.4.4 LEEA in the World-Volume of Type-IIA BPS Branes	332
8.4.5 M-Theory Resolution	336
8.4.6 SW Solution and M5-Brane Dynamics	338
8.5 On Supersymmetry Breaking and Confinement	342
9. Generalizations of NLSM	347
9.1 Dynamical Generation of Particles	
in 4d, $N = 2$ ALE NLSM	347
9.1.1 4d, $N = 2$ NLSM with ALE Metric	349
9.1.2 Quantized ALE $N = 2$ NLSM and Composite Particles	352
9.1.3 Relation to M-Theory and Brane Technology	358
9.2 D-Brane Actions as NLSM	362
9.2.1 D-Brane Actions in Components	362
9.2.2 Born-Infeld Action	365
9.2.3 $N = 1$ Supersymmetric Born-Infeld Action	369
9.2.4 $N = 2$ Supersymmetric Born-Infeld Action	372

XII Contents

9.3	Fourth-Order NLSM	377
9.3.1	Bosonic 4d NLSM with Higher Derivatives	378
9.3.2	4d, $N = 1$ NLSM with Higher Derivatives	384
9.3.3	4d, $N = 2$ NLSM with Higher Derivatives	392
9.4	Extended 4d Supergravities and U-Duality	396

Quantum Non-linear Sigma-Models

From Quantum Field Theory to Supersymmetry,
Conformal Field Theory, Black Holes and Strings

Ketov, S.V.

2000, XII, 420 p., Hardcover

ISBN: 978-3-540-67461-0
