

CONTENTS

CHAPTER 1 - INTRODUCTION

1.1	Finite-part Singular Integral Equations.....	1
1.2	Multidimensional Singular Integral Equations.....	6
1.3	Non-linear Singular Integral Equations	12

CHAPTER 2 - FINITE-PART SINGULAR INTEGRAL EQUATIONS

2.1	Introduction.....	17
2.2	Finite-part Singular Integral Representation Analysis in L_p Spaces.	18
2.3	Systems of Finite-Part Singular Integral Equations in L_p Spaces.	30
2.4	Generalization of the Sokhotski-Plemelj formulae for the Solution of Finite-Part Singular Integrals.	40
2.5	Singular Integral Approximation Methods in General Hilbert Spaces....	50
2.6	Numerical Methods for Systems of Singular Integral Equations in General Hilbert Spaces.	59
2.7	Numerical Integration Rules for Finite-Part Singular Integrals.....	70
2.8	Numerical Integration Rules for Finite-Part Singular Integrals and Integral Equations with Logarithmic Singularities	98
2.9	Finite-Part Singular Integro-differential Equations	105
2.10	Approximations of Singular Integral Equations on Lyapounov Contours in Banach Spaces.....	109
2.11	Finite-part Singular Integral Approximations in Hilbert Spaces	120

CHAPTER 3 - FINITE-PART SINGULAR INTEGRAL EQUATIONS IN ELASTICITY AND FRACTURE MECHANICS

3.1	Introduction.....	133
3.2	Non-Symmetric Cross-Shaped Crack in an Infinite Plane	134
3.3	Symmetric Cross-Shaped Crack in an Infinite Plane.....	136
3.4	Elastic Stress Analysis in a Circular Ring with Curvilinear Cracks	138
3.5	Cracks Normal to a Bimaterial Interface.....	145
3.6	Crack Parallel to the Free Boundary of an Elastic Isotropic Semiplane	150
3.7	Crack Parallel to the Free Boundary of an Isotropic Semi-Infinite Solid	152

3.8	Crack in a Bimaterial Infinite and Isotropic Solid under Antiplane Shear.....	157
3.9	Straight Crack in an Infinite, Isotropic Solid.....	161
3.10	Periodic Array of Cracks along a Straight Line in an Infinite and Isotropic Solid.....	165
3.11	Periodic Array of Parallel Straight Cracks in an Infinite and Isotropic Solid.....	167

CHAPTER 4 - SINGULAR INTEGRAL EQUATIONS IN AERODYNAMICS

4.1	Introduction.....	173
4.2	Planar Airfoils in Two-dimensional Aerodynamics	174

CHAPTER 5 - MULTIDIMENSIONAL SINGULAR INTEGRAL EQUATIONS

5.1	Introduction.....	187
5.2	Multidimensional Singular Integral Equations in Lebesgue Spaces L_p	191
5.3	Two dimensional Singular Integral Equations Exact Solutions.....	197
5.4	Numerical Evaluation of the Two-dimensional Singular Integral Equations	203
5.5	Numerical Evaluation of the Three-dimensional Singular Integral Equations	212

CHAPTER 6 - MULTIDIMENSIONAL SINGULAR INTEGRAL EQUATIONS IN ELASTICITY AND FRACTURE MECHANICS OF ISOTROPIC SOLIDS

6.1	Introduction.....	219
6.2	Two-dimensional Elastic Stress Analysis of Isotropic Solids	220
6.3	Application to the Determination of the Stress Field in the Neighbourhood of a Circular Hole under Internal Pressure in an Infinite and Isotropic Solid	225
6.4	Three-dimensional Elastic Stress Analysis of Isotropic Solids	227
6.5	Application to the determination of the Elastic Stress Analysis of a thick Cylinder Subjected to an Internal Pressure.....	231
6.6	Application to the Determination of the Stress Intensity Factors near the Edge of a Rectangular Crack under Tensile Pressure in an Isotropic Solid.....	238
6.7	Linear Viscoelasticity of Isotropic Solids	242
6.8	Application of Linear Viscoelasticity	244

CHAPTER 7 - MULTIDIMENSIONAL SINGULAR INTEGRAL EQUATIONS IN RELATIVISTIC ELASTIC STRESS ANALYSIS FOR MOVING FRAMES

7.1	Introduction.....	251
7.2	Relative Stress Tensor Formulation for Moving Frames	252
7.3	Elastic Stress Analysis for Stationary and Moving Frames.....	263
7.4	Relativistic Thermoelastic Stress Analysis for Moving Frames	269

CHAPTER 8 - MULTIDIMENSIONAL SINGULAR INTEGRAL EQUATIONS IN ELASTICITY AND FRACTURE MECHANICS OF ANISOTROPIC SOLIDS

8.1	Introduction.....	275
8.2	General Anisotropic Elastic Stress Analysis	277
8.3	Fundamental Solutions of Anisotropic Stress Field Analysis.....	281
8.4	Three-Dimensional Singular Integral Approximation Method.....	288
8.5	Application to the Determination of the Fracture Behaviour of a Circular Hole subjected to a Uniform Boundary Shear Traction in an Infinite and Orthotropic Solid	290
8.6	Application to the Determination of the Fracture Behaviour of a Circular Hole in the Centre of a Rectangular Orthotropic Plate, subjected to Deformation by Tangential Forces	294
8.7	Stress Field near the Crack Tip in an Anisotropic Solid	297

CHAPTER 9 - MULTIDIMENSIONAL SINGULAR INTEGRAL EQUATIONS IN PLASTICITY OF ISOTROPIC SOLIDS

9.1	Introduction.....	305
9.2	Two-dimensional Plastic Stress Analysis of Isotropic Solids.....	307
9.3	Application to the Determination of the Plastic Behaviour of a Perforated Tension Strip in Plane Stress.....	311
9.4	Application to the Determination of the Plastic Behaviour of a Thick Sphere and a Thick Cylinder in Plane Strain.....	314
9.5	Application of two-dimensional Plasticity in a Circular Rocky Tunnel	317
9.6	Application to the Determination of the Plastic Behaviour of a Square Block Compressed by two Opposite Perfectly Rough Rigid Punches in Plane Strain	319
9.7	Three-dimensional Plastic Stress Analysis of Isotropic Solids.....	321
9.8	Fracture Behaviour of Double Notched Tensile Specimen	328
9.9	Three-dimensional Thermoelastoplastic Stress Analysis of Isotropic Solids	331

9.10	Thermoelastic Stress Analysis Application for a Hollow Cylinder	334
------	-----------------------------------------------------------------------	-----

CHAPTER 10 - NON-LINEAR SINGULAR INTEGRAL EQUATIONS

10.1	Introduction.....	343
10.2	Existence and Uniqueness Theorems for Non-Linear Singular Integral Equations over Finite Sets of Contours in Banach Spaces	344
10.3	Existence and Uniqueness Theorems for Non-Linear Singular Integral Equations over a System of Arcs in Banach Spaces	353
10.4	Non-linear Finite-part Singular Integral Equations Uniqueness Theorems in Banach Spaces.....	367
10.5	Non-linear Singular Integrodifferential Equations Existence Theory ...	375

CHAPTER 11 - NUMERICAL EVALUATION METHODS FOR NON-LINEAR SINGULAR INTEGRAL EQUATIONS

11.1	Introduction.....	381
11.2	Approximation Methods for Non-linear Programming Problems	382
11.3	Non-linear Singular Integral Approximations in Banach Spaces by the Collocation Method.....	388
11.4	Non-linear Singular Integral Approximations in Banach Spaces by the Quadrature Method.....	394
11.5	Non-linear Singular Integrodifferential Approximation Theory by the Collocation Method.....	397

CHAPTER 12 - NON-LINEAR SINGULAR INTEGRAL EQUATIONS IN FLUID MECHANICS

12.1	Introduction.....	409
12.2	Profiles of Turbomachines in Steady Flow of Incompressible Fluids...	410
12.3	Non-linear Unsteady Inviscid Flowfields Analysis	415
12.4	Velocity and Pressure Coefficient Field for Linear Vortex Distribution	419
12.5	Velocity and Pressure Coefficient Field for Linear Source Distribution	425
12.6	Velocity and Pressure Coefficient Field for Constant Vortex Distribution	429
12.7	Velocity and Pressure Coefficient Field for Constant Source Distribution	433
12.8	Lists of Computer Programs for Fluid Mechanics (airfoil without velocity).....	437
12.9	Unsteady Cascade Aeroelasticity applied in Turbomachines.....	446

12.10 Non-linear Unsteady Inviscid Aerodynamic Analysis	453
12.11 Velocity and Pressure Coefficient Field for Linear Vortex Distribution (Airfoil with Velocity)	460
12.12 Velocity and Pressure Coefficient Field for Linear Source Distribution (Airfoil with Velocity)	464
12.13 Velocity and Pressure Coefficient Field for Constant Vortex Distribution (Airfoil with Velocity)	469
12.14 Velocity and Pressure Coefficient Field for Constant Source Distribution (Airfoil with Velocity)	473
12.15 Lists of Computer Programs for Aerodynamics (Airfoil with Velocity)	477

CHAPTER 13 - NON-LINEAR INTEGRO-DIFFERENTIAL EQUATIONS IN STRUCTURAL ANALYSIS

13.1 Introduction	491
13.2 Non-linear Integro-differential Equations used in Orthotropic Shallow Spherical Shell Analysis	491
13.3 Non-linear Integro-differential Equations in Sandwich Plates Stress Analysis	499

CHAPTER 14 - NON-LINEAR SINGULAR INTEGRAL EQUATIONS IN ELASTODYNAMICS

14.1 Introduction	509
14.2 Seismic Wave Equations Analysis by Hilbert Transformations	510
14.3 Non-linear Stationary and Dynamic Viscoplasticity	517
14.4 Application to the Determination of the Limit Load for a Rigidly Plastic Solid	528

CHAPTER 15 - CONCLUSIONS

533

APPENDIX - MATHEMATICAL DEFINITIONS
