

Contents

Preface	v
Terminology and Notation	1
1 Modeling Random Experiments	5
1.1 Theory and Problems	5
1.2 Hints	10
1.3 Solutions	11
2 Classical Probability Spaces	15
2.1 Theory and Problems	15
2.2 Hints	18
2.3 Solutions	21
3 Fields	27
3.1 Theory and Problems	27
3.2 Hints	30
3.3 Solutions	32
4 Finitely Additive Probability	39
4.1 Theory and Problems	39
4.2 Hints	42
4.3 Solutions	45
5 Sigma Fields	55

5.1	Theory and Problems	55
5.2	Hints	59
5.3	Solutions	61
6	Countably Additive Probability	69
6.1	Theory and Problems	69
6.2	Hints	75
6.3	Solutions	78
7	Conditional Probability and Independence	87
7.1	Theory and Problems	87
7.2	Hints	94
7.3	Solutions	99
8	Random Variables and Their Distributions	117
8.1	Theory and Problems	117
8.2	Hints	127
8.3	Solutions	133
9	Expectation and Variance	155
9.1	Theory and Problems	155
9.2	Hints	164
9.3	Solutions	167
10	Conditional Expectation	183
10.1	Theory and Problems	183
10.2	Hints	191
10.3	Solutions	195
11	Characteristic Functions	213
11.1	Theory and Problems	213
11.2	Hints	217
11.3	Solutions	221
12	Limit Theorems	233
12.1	Theory and Problems	233
12.2	Hints	240
12.3	Solutions	243
	Bibliography	253
	Index	255

Probability Through Problems

Capinski, M.; Zastawniak, T.J.

2001, VIII, 260 p., Hardcover

ISBN: 978-0-387-95063-1
