## PART I: TOOLS TO STUDY CONNEXINS

1 Investigation of Connexin Gene Expression Patterns by <i>In Situ</i> Hybridization Techniques <b>Magali Théveniau-Ruissy, Sébastien Alcoléa, Irène Marics, Daniel Gros, Antoon F. M. Moorman, and Wouter H. Lamers</b> .....	1
2 Sodium Dodecyl Sulfate-Freeze-Fracture Immunolabeling of Gap Junctions <b>Irene Dunia, Michel Recouvreur, Pierre Nicolas, Nalin M. Kumar, Hans Bloemendal, and E. Lucio Benedetti</b> .....	33
3 Purification of Gap Junctions <b>Gina E. Sosinsky and Guy A. Perkins</b> .....	57
4 Culturing of Mammalian Cells Expressing Recombinant Connexins and Two-Dimensional Crystallization of the Isolated Gap Junctions <b>Mark Yeager and Vinzenz M. Unger</b> .....	77
5 Connexins/Connexons: <i>Cell-Free Expression</i> <b>Matthias M. Falk</b> .....	91
6 Biochemical Analysis of Connexon Assembly <b>Judy K. VanSlyke and Linda S. Musil</b> .....	117
7 Expression and Imaging of Connexin-GFP Chimeras in Live Mammalian Cells <b>Dale W. Laird, Karen Jordan, and Qing Shao</b> .....	135
8 Analysis of Connexin Expression in Brain Slices by Single-Cell Reverse Transcriptase Polymerase Chain Reaction <b>Laurent Venance</b> .....	143
9 Use of Retroviruses to Express Connexins <b>Jean X. Jiang</b> .....	159

10	Spatiotemporal Depletion of Connexins Using Antisense Oligonucleotides <b>Colin R. Green, Lee yong Law, Jun Sheng Lin, and David L. Becker</b> .....	175
11	Transfection and Expression of Exogenous Connexins in Mammalian Cells <b>Dieter Manthey and Klaus Willecke</b> .....	187
PART II: ASSAYS FOR FUNCTION		
12	Assaying the Molecular Permeability of Connexin Channels <b>Paolo Meda</b> .....	201
13	Applying the <i>Xenopus</i> Oocyte Expression System to the Analysis of Gap Junction Proteins <b>I. Martha Skerrett, Mary Merritt, Lan Zhou, Hui Zhu, FengLi Cao, Joseph F. Smith, and Bruce J. Nicholson</b> .....	225
14	Mutagenesis to Study Channel Structure <b>Gerhard Dahl and Arnold Pfahnl</b> .....	251
15	Dual Patch Clamp <b>Harold V.M. Van Rijen, Ronald Wilders, Martin B. Rook, and Habo J. Jongsma</b> .....	269
16	Determining Ionic Permeabilities of Gap Junction Channels <b>Richard D. Veenstra</b> .....	293
17	Fluorescence Recovery After Photobleaching <b>Jean Déléze, Bruno Delage, Olfa Hentati-Ksibi, Franck Verrecchia, and Jean Claude Hervé</b> .....	313
18	Capture of Transjunctional Metabolites <b>Gary S. Goldberg and Paul D. Lampe</b> .....	329
PART III: PHYSIOLOGY AND BIOLOGY OF CONNEXINS		
19	The Study of Connexin Hemichannels (Connexons) in <i>Xenopus</i> Oocytes <b>E. Brady Trexler and Vytas K. Verselis</b> .....	341
20	Exploring Hemichannel Permeability In Vitro <b>Andrew L. Harris and Carville G. Bevans</b> .....	357
21	Inducing <i>De Novo</i> Formation of Gap Junction Channels <b>Feliksas F. Bukauskas</b> .....	379

22	Recording and Analysis of Putative Direct Electrical Interactions in the Mammalian Brain <b>Taufik A. Valiante, Jose L. Perez Velazquez, and Peter L. Carlen</b> .....	395
23	Intercellular Calcium Signaling and Flash Photolysis of Caged Compounds: <i>A Sensitive Method to Evaluate Gap Junctional Coupling</i> <b>Luc Leybaert and Michael J. Sanderson</b> .....	407
24	Biochemical Analysis of Connexin Phosphorylation <b>Bonnie J. Warn-Cramer, Wendy E. Kurata, and Alan F. Lau</b> .....	431
25	How to Close a Gap Junction Channel: <i>Efficacies and Potencies of Uncoupling Agents</i> <b>Renato Rozental, Miduturu Srinivas, and David C. Spray</b> .....	447
	Index .....	477
