
Contents

Preface	v
Contributors	xi
1 Purification of 20S Proteasomes Jill R. Beyette, Timothy Hubbell, and John J. Monaco	1
2 Use of Proteasome Inhibitors to Examine Processing of Antigens for Major Histocompatibility Complex Class I Presentation Luis C. Antón, Jack R. Bennink, and Jonathan W. Yewdell	17
3 Tracing the Route Taken by Peptides and Major Histocompatibility Complex Class I Molecules in Presentation of Exogenous Antigens Christopher C. Norbury	33
4 Functional Analysis of Antigen Processing and Major Histocompatibility Complex Class II-Restricted Presentation John D. Lich and Janice S. Blum	49
5 Quantitation of Major Histocompatibility Complex Antigen Endocytosis Using Capture ELISA Diane N. Turvy and Janice S. Blum	57
6 In Vitro Generation of Functional Human and Murine Dendritic Cells Seema S. Ahuja	67
7 Genetic Engineering of Dendritic Cells Using Retrovirus-Based Gene Transfer Techniques Seema S. Ahuja	79
8 Use of Vaccinia Virus Expression Vectors to Investigate Antigen Processing and Presentation E. John Wherry, Deepa Rajagopal, and Laurence C. Eisenlohr	89

9	Sindbis Virus-Based Vectors for the Study of Class I Antigen Presentation In Vitro and In Vivo John M. Polo and Cornelia C. Bergmann	111
10	Precision Genotyping of Human Leukocyte Antigen-A, -B and -C Loci via Direct DNA Sequencing Mary Ellexson-Turner, David Sidebottom, Sean Turner, Tara Bennett, and William H. Hildebrand	129
11	Photolabeling the Transporter Associated with Antigen Processing Vashti G. Lacaille and Matthew J. Androlewicz	143
12	Application of One-Dimensional Isoelectric Focusing to Separate Different Major Histocompatibility Complex Class I Alleles and Determine Their Allelic Interactions with Transporter Associated with Antigen Processing (TAP) Anne Neisig and Jacques Neefjes	153
13	Analysis of Major Histocompatibility Complex Class I Interactions with Endoplasmic Reticulum Proteins Hêth R. Turnquist and Joyce C. Solheim	165
14	Methods of Purification of Heat Shock Protein-Peptide Complexes for Use as Vaccines Against Cancers and Infectious Diseases Pramod K. Srivastava and Navdeep S. Jaikaria	175
15	Random Peptide Libraries: A Tool for Analyzing the Peptide Specificity of Major Histocompatibility Complex Class I Molecules James Stevens and Geoffrey W. Butcher	187
16	Neural Network Method for Predicting Peptides that Bind Major Histocompatibility Complex Molecules Kamalakar Gulukota and Charles DeLisi	201
17	Analysis of T-Cell Response Using Altered Peptide Ligands Florence Boisgérault, Natalie Anosova, Eugenia V. Fedoseyeva, Robert C. Tam, and Gilles Benichou	211
18	Assays of Thymic Selection: Fetal Thymus Organ Culture and an In Vitro Thymocyte Dulling Assay Kristin A. Hogquist	219

19 Protocol for Diversion of a CD4⁺ Response
to the T-Helper 2 Cell Pathway
Francesca Galbiati and Luciano Adorini 233

20 Quantitating Presentation of MHC Class I-Restricted Antigens
Weisan Chen, Jack R. Bennink, and Jonathan W. Yewdell 245

21 Identification of CD8⁺ T-Cell-Stimulating Antigen Genes
in cDNA Libraries
**Lisa M. Mendoza, Subramaniam Malarkannan,
and Nilabh Shastri** 255

22 Generation of Antigen-Specific, *LacZ*-Inducible
T-Cell Hybrids
**Subramaniam Malarkannan, Lisa M. Mendoza,
and Nilabh Shastri** 265
