# Contents

Preface .....	v
Contributors .....	ix
1 Purification of Kinesin from the Brain <b>Sergei A. Kuznetsov and Vladimir I. Gelfand</b> .....	1
2 RT-PCR for the Identification of Developmentally Regulated Novel Members of the Kinesin-like Superfamily <b>Niovi Santama</b> .....	9
3 Expression Cloning with Pan Kinesin Antibodies <b>Laura M. Ginkel and Linda Wordeman</b> .....	21
4 Expression of Kinesin in <i>Escherichia coli</i> <b>Maryanne F. Stock and David D. Hackney</b> .....	43
5 Plasmids for Expression of Chimeric and Truncated Kinesin Proteins <b>Kimberly W. Waligora and Sharyn A. Endow</b> .....	49
6 Preparation of Recombinant Kinesin Superfamily Proteins Using the Baculovirus System <b>Nobutaka Hirokawa and Yasuko Noda</b> .....	57
7 Assays for Kinesin Microtubule-Stimulated ATPase Activity <b>David D. Hackney and Wei Jiang</b> .....	65
8 An Improved Microscope for Bead and Surface-Based Motility Assays <b>Nick Carter and Rob Cross</b> .....	73
9 Use of Photonic Force Microscopy to Study Single-Motor-Molecule Mechanics <b>Sylvia Jeney, Ernst-Ludwig Florin, and J. K. Heinrich Hörber</b> .....	91
10 Assays for Microtubule-Destabilizing Kinesins <b>Arshad Desai and Claire E. Walczak</b> .....	109
11 Green Fluorescent Protein as a Tag for Molecular Motor Proteins <b>Sharyn A. Endow</b> .....	123

12	In Vitro Reconstitution of Endosome Motility Along Microtubules <b>Erik Nielsen, Fedor Severin, Anthony A. Hyman, and Marino Zerial</b> .....	133
13	Approaches to Study Interactions Between Kinesin Motors and Membranes <b>Gerardo Morfini, Ming-Ying Tsai, Györgyi Szebenyi, and Scott T. Brady</b> .....	147
14	Microinjection Methods for Analyzing the Functions of Kinesins in Early Embryos <b>Robert L. Morris, Heather M. Brown, Brent D. Wright, David J. Sharp, William Sullivan, and Jonathan M. Scholey</b> .....	163
15	The Use of Dominant Negative Mutants to Study the Function of Mitotic Motors in the In Vitro Spindle Assembly Assay in <i>Xenopus</i> Egg Extracts <b>Haralabia Boleti, Eric Karsenti, and Isabelle Vernos</b> .....	173
16	A Dominant Negative Approach for Functional Studies of the Kinesin II Complex <b>Vladimir I. Gelfand, Nathalie Le Bot, M. Carolina Tuma, and Isabelle Vernos</b> .....	191
17	Identification of Kinesin-Associated Proteins <b>Lisa C. Lindesmith, Janardan Kumar, and Michael P. Sheetz</b> .....	205
18	Assaying Spatial Organization of Microtubules by Kinesin Motors <b>François Nédélec and Thomas Surrey</b> .....	213
19	Crystallization of Kinesin <b>Manfred Thormählen, Jens Müller, and Eckhard Mandelkow</b> .....	223
20	Structural Analysis of the Microtubule–Kinesin Complex by Cryo-Electron Microscopy <b>Fabienne Beuron and Andreas Hoenger</b> .....	235
	Index .....	255
