
Contents

Preface	v
Contributors	xiii
PART 1 CYTOGENETICS	
1 Cytogenetics Analysis <i>Avery A. Sandberg and Zhong Chen</i>	3
2 FISH Analysis <i>Avery A. Sandberg and Zhong Chen</i>	19
3 Comparative Genomic Hybridization for the Analysis of Leukemias and Lymphomas <i>Michael Baudis and Martin Bentz</i>	43
4 Spectral Karyotyping (SKY) of Hematologic Malignancies <i>Eva Hilgenfeld, Hesus Padilla-Nash, Oskar A. Haas, Hubert Serve, Evelin Schröck, and Thomas Ried</i>	65
PART 2 POLYMERASE CHAIN REACTION	
5 Molecular Genetic Methods in Diagnosis and Treatment <i>Pamela Ward and Alan Kinniburgh</i>	83
6 Detecting Monoclonal Immunoglobulin and T-Cell Receptor Gene Rearrangements in B- and T-Cell Malignancies by Polymerase Chain Reaction <i>Pamela J. Sykes</i>	117
7 Quantifying Residual Leukemia by “Clone-Specific” Polymerase Chain Reaction <i>Michael J. Brisco</i>	133
8 <i>NPM-ALK</i> Reverse Transcriptase–Polymerase Chain Reaction for Detecting the t(2;5) of Non-Hodgkin’s Lymphoma <i>Sheila A. Shurtleff, James R. Downing, and Stephan W. Morris</i>	157

PART 3 FLOW CYTOMETRY

9	Diagnostic Flow Cytometry in Hematologic Malignancies Gerald E. Marti, Maryalice Stetler-Stevenson, and Thomas Fleisher	179
10	Flow Cytometric Analysis of Hematologic Neoplasia Raul C. Braylan and John B. Anderson	217
11	<i>In Situ</i> Hybridization in Flow Cytometry Victoria L. Mosiman and Charles L. Goolsby	231
12	Quantitative Fluorescence Cytometry Robert F. Vogt, Jr., Abe Schwartz, Gerald E. Marti, Wanda E. Whitfield, and L. Omar Henderson	255

PART 4 SPECIAL HISTOPATHOLOGY STAINS

13	Methods in Leukocyte Cytochemistry Mark G. Hanly	277
14	Immunohistochemistry in Leukemias and Lymphomas Marina Jaramillo, Catherine Rangel, and Thomas Grogan	301

PART 5 MOLECULAR GENETICS AND CYTOKINES

15	Apoptosis: <i>Molecular Regulation of Cell Death and Hematologic Malignancies</i> Vincenzo Chiarugi, Marina Cinelli, Lucia Magnelli, and Persio Dello Sbarba	323
16	Cytokine Receptors: <i>Qualitative and Quantitative Analysis</i> Heddy Zola	339
	Index	353
