I INTRODUCTION	
1 The Need for New Approaches to Antimalarial Chemotherapy <i>Philip J. Rosenthal and Louis H. Miller</i>	3
2 The History of Antimalarial Drugs <i>Steven R. Meshnick and Mary J. Dobson</i>	15
3 Transport and Trafficking in <i>Plasmodium</i> -Infected Red Cells <i>Kasturi Haldar and Thomas Akompong</i>	27
4 The <i>Plasmodium</i> Food Vacuole <i>Ritu Banerjee and Daniel E. Goldberg</i>	43
5 Clinical and Public Health Implications of Antimalarial Drug Resistance <i>Piero L. Olliaro and Peter B. Bloland</i>	65
II ESTABLISHED ANTIMALARIAL DRUGS AND COMPOUNDS UNDER CLINICAL DEVELOPMENT	
6 Chloroquine and Other Quinoline Antimalarials <i>Leann Tilley, Paul Loria, and Mick Foley</i>	87
7 8-Aminoquinolines <i>Ralf P. Brueckner, Colin Ohrt, J. Kevin Baird, and Wilbur K. Milhous</i>	123
8 Mechanisms of Quinoline Resistance <i>Grant Dorsey, David A. Fidock, Thomas E. Wellems, and Philip J. Rosenthal</i>	153
9 Folate Antagonists and Mechanisms of Resistance <i>Christopher V. Plowe</i>	173
10 Artemisinin and Its Derivatives <i>Steven R. Meshnick</i>	191

11	Atovaquone–Proguanil Combination <i>Akhil B. Vaidya</i>	203
12	The Antimalarial Drug Portfolio and Research Pipeline <i>Piero L. Olliaro and Wilbur K. Milhous</i>	219
III	NEW COMPOUNDS, NEW APPROACHES, AND NEW TARGETS	
13	Novel Quinoline Antimalarials <i>Paul A. Stocks, Kaylene J. Raynes, and Stephen A. Ward</i>	235
14	New Antimalarial Trioxanes and Endoperoxides <i>Gary H. Posner, Mikhail Krasavin, Michael McCutchen, Poonsakdi Ploypradith, John P. Maxwell, Jeffrey S. Elias, and Michael H. Parker</i>	255
15	Antibiotics and the Plasmodial Plastid Organelle <i>Barbara Clough and R. J. M. (Iain) Wilson</i>	265
16	Fresh Paradigms for Curative Antimetabolites <i>Pradipsinh K. Rathod</i>	287
17	Iron Chelators <i>Mark Loyevsky and Victor R. Gordeuk</i>	307
18	Protease Inhibitors <i>Philip J. Rosenthal</i>	325
19	Inhibitors of Phospholipid Metabolism <i>Henri Joseph Vial and Michèle Calas</i>	347
20	Development of New Malaria Chemotherapy by Utilization of Parasite-Induced Transport <i>Annette M. Gero and Alexander L. Weis</i>	367
	Index	385

Antimalarial Chemotherapy

Mechanisms of Action, Resistance, and New Directions
in Drug Discovery

Rosenthal, P.J. (Ed.)

2001, XI, 396 p., Hardcover

ISBN: 978-0-89603-670-3
