Foreword..... v

Preface vii

Contributors xiii

1 Microbiology and Laboratory Diagnosis
Keith Cartwright 1

2 Isolation, Culture, and Identification of Meningococci
from Clinical Specimens
Per Olcén and Hans Fredlund 9

3 PCR Diagnosis
Malcolm Guiver and Ray Borrow 23

4 Detection of Meningococcal Antigen by Latex Agglutination
**Michael A. Sobanski, Rosemary A. Barnes,
and W. Terence Coakley** 41

5 Meningococcal Serology
Stephen J. Gray, Ray Borrow, and Edward B. Kaczmarek 61

6 Antibiotic Susceptibility Testing
Colin Block 89

7 Molecular Approach for the Study of Penicillin Resistance
in *Neisseria Meningitidis*
Luisa Arreaza and Julio A. Vázquez..... 107

8 Overview: *Epidemiology, Surveillance and Population Biology*
Martin C. J. Maiden and Norman T. Begg..... 121

9 Serological Characterization
**Betsy Kuipers, Germie van den Dobbelaars,
Elisabeth Wedege, and Loek van Alphen** 131

10 Pulsed-Field Gel Electrophoresis
Mark Achtman and Giovanna Morelli 147

11 Nucleotide Sequencing of Antigen Genes of *Neisseria Meningitidis*
Rachel Urwin 157

| | | |
|----|---|-----|
| 12 | Multi-Locus Sequence Typing Keith A. Jolley | 173 |
| 13 | Capsular Operons Ulrich Vogel, Heike Claus, and Matthias Frosch | 187 |
| 14 | Molecular Analysis of the Meningococcal LPS Expression Michael P. Jennings, Andrew W. Berrington, and E. Richard Moxon | 203 |
| 15 | Genome Sequencing and Annotation Alex C. Jeffries, Nigel J. Saunders, and Derek W. Hood | 215 |
| 16 | Representational Difference Analysis Lucas D. Bowler, Aldert Bart, and Arie van der Ende | 231 |
| 17 | Managing Outbreaks: <i>The Public Health Response</i> James M. Stuart | 257 |
| 18 | Global Trends in Meningococcal Disease Dominique A. Caugant | 273 |
| 19 | Epidemiology, Surveillance, and Population Biology: <i>Carriage Studies</i> Keith Cartwright | 293 |
| 20 | Surveillance of Meningococcal Disease in Europe Norman Noah | 313 |
| 21 | Global Surveillance for Meningococcal Disease Nancy E. Rosenstein | 333 |
| 22 | Epidemiology of Meningococcal Disease in North America Andrew J. Pollard, David Scheifele, and Nancy Rosenstein | 341 |
| 23 | Computational Methods for Meningococcal Population Studies Keith A. Jolley and Rachel Urwin | 357 |
| 24 | Clinical Studies and Host-Pathogen Interactions F. Andrew I. Riordan and Andrew J. Pollard | 375 |
| 25 | Clinical Scoring Systems in Meningococcal Disease Marino Festa and Bert Derkx | 411 |
| 26 | Quantitative Detection of Bacterial Lipopolysaccharides in Clinical Specimens Petter Brandtzaeg, Reidun Øvstebø, and Peter Kierulf | 427 |
| 27 | Isolation and Analysis of Radiolabeled Meningococcal Endotoxin Peter C. Giardina, Jerrold A. Weiss, Brad W. Gibson, and Michael A. Apicella | 441 |

| | | |
|----|---|-----|
| 28 | Cytokine Measurement <i>in vivo</i> and <i>in vitro</i> Marcel van Deuren and Petter Brandtzaeg | 459 |
| 29 | Cytokine Bioassays Nina-Beate Liabakk, Anders Waage, Egil Lien, Jørgen Stenvik, and Terje Espevik | 487 |
| 30 | Molecular Analysis of Gene-Polymorphisms Affecting the Host Response to Infection Rudi G.J. Westendorp and Tom W.J. Huizinga | 499 |
| 31 | Coagulation Studies Jan A. Hazelzet, C. Erik Hack, and Ronald de Groot | 513 |
| 32 | Complement Pathways and Meningococcal Disease: <i>Diagnostic Aspects</i> Anders G. Sjöholm, Lennart Truedsson, and Jens C. Jensenius | 529 |
| 33 | Evaluation of New Treatments for Meningococcal Disease Simon Nadel, Iain Macintosh, and Michael Levin | 549 |
| 34 | Studies on the Effect of Neisserial Porins on Apoptosis of Mammalian Cells Paola Massari and Lee M. Wetzler | 587 |
| 35 | Molecular Recognition Mechanisms of Meningococci: <i>Identifying Receptor-Ligand Pairs Involved in Microbe-Host Interactions</i> Mumtaz Virji and Laura Serino | 599 |
| 36 | Experimental Nasopharyngeal Colonization by <i>Neisseria Meningitidis</i> Using Explant Organ Culture Robert C. Read and Linda Goodwin | 621 |
| 37 | Invasion of the Central Nervous System by <i>Neisseria Meningitidis</i> Colin Tinsley and Xavier Nassif | 635 |
| 38 | Interactions of Meningococci with Endothelium Robert S. Heyderman and Nigel J. Klein | 649 |
| 39 | A Promoter Probe Plasmid Based on Green Fluorescent Protein: <i>a Strategy for Studying Meningococcal Gene Expression</i> Steven A.R. Webb, Paul R. Langford, J. Simon Kroll | 663 |
| 40 | Signature Tagged Mutagenesis Sharmila Bakshi, Yao-Hui Sun, Ronald Chalmers, and Christoph M. Tang | 679 |
| | Index | 693 |
