
Contents

Preface	v
Contributors	ix
1 Stabilization of Protein Structure Kenneth P. Murphy	1
2 Protein Stabilization by Naturally Occurring Osmolytes D. Wayne Bolen	17
3 The Thermodynamic Linkage Between Protein Structure, Stability, and Function Ernesto Freire	37
4 Measuring the Conformational Stability of a Protein by Hydrogen Exchange Beatrice M.P. Huyghues-Despointes, C. Nick Pace, S. Walter Englander, and J. Martin Scholtz	69
5 Modeling the Native State Ensemble Vincent J. Hilser	93
6 Conformational Entropy in Protein Folding: A Guide to Estimating Conformational Entropy via Modeling and Computation Trevor P. Creamer	117
7 Turn Scanning: <i>Experimental and Theoretical Approaches to the Role of Turns</i> Carl Frieden, Enoch S. Huang, and Jay W. Ponder	133
8 Laser Temperature-Jump Methods for Studying Folding Dynamics James Hofrichter	159
9 Kinetics of Conformational Fluctuations by EX1 Hydrogen Exchange in Native Proteins T. Sivaraman and Andrew D. Robertson	193
10 Molecular Dynamics Simulations of Protein Unfolding/Folding Valerie Daggett	215
Index	249

Protein Structure, Stability, and Folding

Murphy, K.P. (Ed.)

2001, IX, 252 p., Hardcover

ISBN: 978-0-89603-682-6

A product of Humana Press
