|---|-----|
| Preface | vii |
| Introduction | 1 |
| Chapter 1. Elliptic problems | 7 |
| 1.1 The Dirichlet problem for the Laplace equation in an annulus | 7 |
| 1.2 Examples of Dirichlet problems in an annulus | 10 |
| 1.3 The interior and exterior Dirichlet problems | 11 |
| 1.4 The Poisson integral for the disc. Complex form. Solution of the Dirichlet problem when the boundary condition is a rational function $R(\sin \varphi, \cos \varphi)$ | 14 |
| 1.5 The interior and exterior Dirichlet problems | 18 |
| 1.6 Boundary value problems for the Poisson equation in a disc and in an annulus | 19 |
| 1.7 Boundary value problems for the Laplace and Poisson equations in a rectangle | 22 |
| 1.8 Boundary value problems for the Laplace and Poisson equations in a bounded cylinder | 27 |
| 1.9 Boundary value problems for the Laplace and Poisson equations in a ball | 33 |
| 1.10 Boundary value problems for the Helmholtz equations | 43 |
| 1.11 Boundary value problem for the Helmholtz equation in a cylinder | 44 |
| 1.12 Boundary value problems for the Helmholtz equation in a disc | 46 |
| 1.13 Boundary value problems for the Helmholtz equation in a ball | 49 |
| 1.14 Guided electromagnetic waves | 54 |
| 1.15 The method of conformal mappings (for the solution of boundary value problems in the plane) | 55 |
| 1.16 The Green function method | 60 |
| 1.17 Other methods | 68 |
| 1.18 Problems for independent study | 73 |
| 1.19 Answers | 76 |
| Chapter 2. Hyperbolic problems | 81 |
| 2.1 The travelling-wave method | 81 |
| 2.2 The method of selection of particular solutions | 93 |
| 2.3 The Fourier integral transform method | 96 |
| 2.4 The Laplace integral transform method | 111 |
| 2.5 The Hankel integral transform method | 115 |
| 2.6 The method of standing waves. Oscillations of a bounded string | 121 |

| | | |
|--|---|------------|
| 2.7 | Some examples of mixed problems for the equation of oscillations of a string | 124 |
| 2.8 | The Fourier method. Oscillations of a rectangular membrane | 130 |
| 2.9 | The Fourier method. Oscillations of a circular membrane | 136 |
| 2.10 | The Fourier method. Oscillations of a beam | 141 |
| 2.11 | The perturbation method | 145 |
| 2.12 | Problems for independent study | 149 |
| 2.13 | Answers | 155 |
| Chapter 3. Parabolic problems | | 161 |
| 3.1 | The Fourier integral transform method | 161 |
| 3.2 | The Laplace integral transform method | 170 |
| 3.3 | The Fourier method (method of separation of variables) | 174 |
| 3.4 | A modification of the method of separation of variables for solving the Cauchy problem | 190 |
| 3.5 | Problems for independent study | 197 |
| 3.6 | Answers | 202 |
| References | | 205 |
| Index | | 207 |
