

Table of Contents

1 Fundamentals

1.1	Communication Technologies	1.4	Print Quality
1.1.1	Print Media	1.4.1	Color/Color Theory
1.1.1.1	Books	1.4.2	Color Image Composition
1.1.1.2	Magazines	1.4.3	Halftone Process
1.1.1.3	Newspapers	1.4.4	Quality Control/Measurement Techniques
1.1.1.4	Brochures	1.4.4.1	Color Measurement
1.1.1.5	Other Printed Media	1.4.4.2	Color Register
1.1.2	Electronic Media	1.4.4.3	Measurement of Gloss
1.1.3	Multimedia	1.4.5	Surface Finishing Techniques
1.1.4	Distribution and Market Volume	1.4.5.1	Characteristics of Surface Finishing
1.1.5	For the Future: Trends and Scenarios	1.4.5.2	Surface Finishing Techniques
1.1.5.1	Changes in the Traditional Printing Sector	1.5	Print Media Materials
1.1.5.2	Integration of New Media	1.5.1	Substrates
1.2	Production of Print Media	1.5.2	Printing Inks
1.2.1	Layout, Typography, Graphic Design	1.5.2.1	Structure and Requirements
1.2.1.1	Type	1.5.2.2	Offset Printing Inks
1.2.1.2	Typography	1.5.2.3	Gravure Printing Inks
1.2.1.3	Graphic Design	1.5.2.4	Flexographic Printing Inks
1.2.2	Prepress	1.5.2.5	Letterpress Printing Inks
1.2.3	Printing	1.5.2.6	Screen Printing Inks
1.2.4	Postpress/Finishing	1.5.2.7	Pad Printing Inks
1.2.5	Digital Production Equipment in the Workflow	1.5.2.8	Inks for Non-Impact Printing Technologies
1.2.6	Premedia	1.5.3	Varnishes
1.2	Printing Technologies	1.6	Printing Presses and Printing Systems
1.3.1	Overview of Printing Technologies	1.6.1	General Structure
1.3.2	Printing Technologies with a Printing Master	1.6.2	Designs for Multicolor Printing
1.3.2.1	Letterpress/Flexographic Printing	1.6.2.1	Sheet-Fed Printing Presses
1.3.2.2	Gravure Printing	1.6.2.2	Web-Fed Presses
1.3.2.3	Lithography/Offset Printing	1.6.2.3	Packaging Printing Presses
1.3.2.4	Screen Printing	1.7	Drying Methods
1.3.3	Printing Technologies without a Master (NIP Technologies)	1.7.1	Physical Drying (Absorption)
1.3.3.1	Electrophotography	1.7.1.1	Infrared (IR) Drying
1.3.3.2	Ink Jet	1.7.1.2	Evaporative Drying
1.3.3.3	Printing Systems based on Non-Impact Printing Technologies	1.7.1.3	Problems in Practical Operation
		1.7.2	Chemical Drying
		1.7.2.1	Oxidation
		1.7.2.2	UV Drying
		1.7.2.3	Electron Beam (EB) Drying
		1.7.3	Auxiliary Drying Techniques

1.7.3.1	Powder Spraying	2.1.4.3	Register Measurement and Control
1.7.3.2	Silicon Application	2.1.4.4	Inspection of the Printed Image
1.7.4	Measuring Techniques	2.1.4.5	In-line Print Quality Measurement and Control Systems
1.8	Products of Print Finishing	2.1.4.6	The State of the Art in Remote Control, Measurement and Control Systems
1.9	Aspects of Management and Business Models	2.1.5	Automation in Print Media Production
1.9.1	Production Options and Business Models	2.1.5.1	Wash-Up Procedures
1.9.1.1	The Value-Added Chain (Production Depth and Product Range)	2.1.5.2	Plate Changing
1.9.1.2	Financing and Distribution Models	2.1.5.3	Sheet Size and Paper Travel
1.9.1.3	Media Business as a Technical Service	2.1.5.4	Ink Feed Presetting in the Printing Unit
1.9.2	Coordination of Workflows	2.1.5.5	Ink and Dampening Solution Supply
1.9.2.1	Lean Production and Lean Management	2.1.5.6	Makeready for Print Production
1.9.2.2	Tracking	2.1.6	Press Examples and Production Systems
1.9.2.3	Quality Assurance	2.1.6.1	Sheet-Fed Presses
1.9.3	Production Layout	2.1.6.2	Web-Fed Presses
1.9.3.1	Material Flow	2.1.7	Potential for Further Development
1.9.3.2	Capacity Planning	2.1.7.1	Print Quality
1.9.3.3	Personnel Deployment and Supply of Utilities	2.1.7.2	Offset Printing
		2.1.7.3	Drying
		2.1.7.4	Automation
2	Printing Technologies with Permanent Printing Master	2.2	Gravure Printing
2.1	Offset Printing	2.2.1	Process
2.1.1	Basic Principles	2.2.1.1	Gravure Cylinder Manufacture
2.1.1.1	Process	2.2.1.2	Gravure Cylinder Imaging
2.1.1.2	Printing Plates, Printing Ink, Dampening Solution	2.2.1.3	Storage and Changing of Gravure Cylinders
2.1.1.3	Inking Unit, Dampening Unit, Printing Unit	2.2.1.4	Impression Roller
2.1.1.4	Print Quality	2.2.1.5	Inking Unit and Doctor Blade
2.1.2	Sheet-Fed Offset Printing	2.2.1.6	Drying
2.1.2.1	Paper Travel	2.2.1.7	Circumferential and Lateral Register
2.1.2.2	Feeders	2.2.1.8	Magazine Turner Bars Superstructure
2.1.2.3	Printing Units	2.2.1.9	Gravure Printing Folders
2.1.2.4	Sheet Reversal/Perfecting	2.2.1.10	Reel Stands
2.1.2.5	Delivery	2.2.2	Examples of Press Configurations
2.1.2.6	Drying	2.2.3	Gravure Printing in the Packaging Industry
2.1.2.7	Print Enhancement and In-Line Finishing	2.2.4	Further Development Potential
2.1.2.8	Press Architecture (Special Designs)	2.3	Letterpress Printing
2.1.3	Web Offset Printing	2.3.1	Process
2.1.3.1	Press/System Concepts (Components)	2.3.2	Letterpress Printing (Process and Applications)
2.1.3.2	Web Travel (Infeed and Further Processing)	2.3.3	Flexography
2.1.3.3	Printing Unit	2.3.3.1	Process
2.1.3.4	Folders, Print Product Variations	2.3.3.2	Printing Unit
2.1.3.5	Newspaper Printing	2.3.3.3	Examples of Presses
2.1.4	Remote Control, Measurement and Control Systems	2.3.4	Further Development Potential
2.1.4.1	Press Remote Control Systems	2.4	Screen Printing
2.1.4.2	Color Measurement and Control Systems	2.4.1	Process
		2.4.1.1	Platemaking
		2.4.1.2	Printing Process
		2.4.2	Applications
		2.4.2.1	Screen Printing on Flat Surfaces
		2.4.2.2	Screen Printing on Curved Surfaces

2.4.3	Examples of Machinery	3.1.7.4	Gravure Printing
2.4.3.1	Equipment and Machinery for Flat-bed Screen Printing	3.1.7.5	Screen Printing
2.4.3.2	Screen Printing Machinery for Printing on Curved Surfaces	3.1.8	Color Management
2.4.3.3	Rotary Screen Printing Presses	3.1.8.1	Processes for the Correction of Tone and Color Values
2.4.4	Further Development Potential	3.1.8.2	Offset-Gravure Conversion
2.5	Special Printing and Product Specific Applications	3.2	Digital Prepress
2.5.1	Security Printing	3.2.1	Structure of Digital Printing Products
2.5.1.1	Bank Notes	3.2.1.1	Technological Capabilities and Workflows
2.5.1.2	Postage Stamps, Stamps	3.2.1.2	Digital Description of the Printed Page
2.5.1.3	Documents	3.2.1.3	Digital Screening Processes
2.5.2	Business Form Printing	3.2.2	Quality Requirements
2.5.3	Label Printing	3.2.2.1	Input and Output Resolution
2.5.4	Pad Transfer Printing	3.2.2.2	Transferable Tonal Range
2.5.4.1	Printing Process	3.2.2.3	Dot Shape
2.5.4.2	Cliché Making	3.2.2.4	Tonal Value Influences in Printing
2.5.4.3	Pad, Ink, Substrate Fixture	3.2.2.5	Color Management Profiles
2.5.4.4	Multicolor Printing, Applications	3.2.2.6	Image-Dependent Effects and Corrections
3	Prepress	3.2.3	Digital Photography
3.1	Conventional Prepress	3.2.3.1	Origins of Digital Photography
3.1.1	Word Processing, Typesetting	3.2.3.2	Image Scanning with Digital Cameras
3.1.1.1	Typesetting Procedure	3.2.3.3	Demands on the Resolution
3.1.1.2	Manuscript	3.2.3.4	Special Features of Digital Cameras
3.1.1.3	Text Input	3.2.3.5	Digital Photography and Color Management
3.1.1.4	Word Processing and Composition	3.2.4	Digitizing Originals (Scanner)
3.1.2	Text Output for the Production of Film/Plate	3.2.4.1	Scanner Designs and Models
3.1.2.1	Designs of Output Devices	3.2.4.2	Drum Scanners
3.1.2.2	Requirements on Films	3.2.4.3	Flat-Bed Scanners
3.1.3	Photomechanical Image Processing/Reproduction	3.2.4.4	Digitizing and Redigitizing
3.1.3.1	Use and Importance of Analog Reproduction	3.2.5	Sheet Assembly and Imposition
3.1.3.2	Principles, Tasks of Photomechanical Reproduction	3.2.5.1	Page Make-up and Sheet Assembly
3.1.3.3	Materials	3.2.5.2	Full-Sheet Output
3.1.3.4	Machines and Devices Used in Reproduction Technology	3.2.5.3	Imposition through Software
3.1.3.5	Production of Film Copy for Single-Color Printing	3.2.5.4	Imposition Workflows
3.1.3.6	Production of Film Copy for Multicolor Printing	3.2.6	Raster Image Processor (RIP)
3.1.4	Electronic Reproduction Technology (Repro Scanner)	3.2.7	Storage Media
3.1.5	Assembly	3.2.8	Networks
3.1.5.1	Page Make-Up	3.2.8.1	Network Concepts and Components
3.1.5.2	Sheet Assembly	3.2.8.2	Working with Networks
3.1.6	Proofs/Test Print	3.2.9	Data Formats
3.1.7	Platemaking and Quality Control	3.2.10	Color Management
3.1.7.1	General	3.2.10.1	The Image Reproduction Process Using Color Management
3.1.7.2	Offset Printing	3.2.10.2	Production of Color Profiles
3.1.7.3	Letterpress Printing, Flexography	3.2.10.3	Structure of Color Profiles
		3.2.10.4	Connection of Color Profiles
		3.2.10.5	Rendering Intent
		3.2.10.6	Color Management and the Production of Proofs
		3.2.10.7	Color Management for Images on the Internet
		3.2.10.8	Color Management and Standardization

3.2.11	Digital Proof
3.2.11.1	Digital Proofing Processes
3.2.11.2	Soft Proof
3.2.11.3	Hard Proof
3.2.11.4	Color Management Concepts
3.2.11.5	Preflight Check
3.2.12	Film Production and Platemaking
3.2.12.1	Computer to Film Systems
3.2.12.2	Computer to Plate Systems
3.2.12.3	Computer to Film and Computer to Plate in the Prepress Workflow

4 Computer to ... Technologies

4.1	Survey of the Technologies
4.1.1	Computer to Film
4.1.2	Computer to Plate
4.1.3	Computer to Press (Direct Imaging and Computer to Print)
4.1.4	The Use of Computer to ... Technologies and Networking for the Production of Print Media
4.2	Computer to Film
4.2.1	Principles and Equipment
4.2.2	Film Material
4.3	Computer to Plate/to Cylinder/to Screen ..
4.3.1	Introduction
4.3.2	Technology of Computer to Plate Systems for Offset Printing
4.3.2.1	Design Principles
4.3.2.2	Imaging Methods and Plate Punching
4.3.2.3	Computer to Plate Systems for Offset Printing
4.3.3	Computer to Plate for Flexographic Printing
4.3.4	for Gravure Printing
4.3.5	Computer to Screen (Screen Printing)
4.3.6	Computer to Plate Workflow
4.3.7	Rise in Quality as a Result of Computer to Plate Computer to Cylinder
4.3.8	Productivity and Economic Efficiency
4.3.9	Printing Plates for Digital Imaging
4.3.10	Trends with Computer to Plate
4.4	Computer to Press/Direct Imaging
4.4.1	Computer to Press/Direct Imaging with Removal of the Master for each Print Job
4.4.1.1	Computer to Press/Direct Imaging Printing Systems
4.4.1.2	Expansion and Comparison of Systems
4.4.2	Computer to Press/Direct Imaging Printing Systems with Re-imageable Master

4.4.2.1	Concepts for Re-imageable Masters with Material Application/Ablation
4.4.2.2	Re-imageable Plate Systems without Material Application
4.5	Computer to Print
4.5.1	Printing Systems based on Electrophotography
4.5.2	Printing Systems based on Ionography, Magnetography, and Ink Jet
4.5.3	Design Principles of Computer to Print Systems
4.5.4	Digital Printing

5 Printing Technologies without a Printing Plate (NIP Technologies)

5.1	Principles and Basic Components
5.1.1	Computer to Press/to Print Technology
5.1.2	Non-Impact Printing Technologies (Overview)
5.1.3	Printing Process and Functional Components in NIP Technologies
5.1.4	Digitally Controlled Image Creation in NIP Technologies
5.1.5	System Concepts/Architectural Arrangement of Computer to Print System
5.1.6	Inks for Non-Impact Printing Processes
5.1.7	Components for Computer to Print Systems
5.2	Electrophotography
5.2.1	The Principle of Electrophotography
5.2.2	Imaging Equipment
5.2.3	Inking Unit (Developing Unit) and Toner
5.2.4	Fixing and Cleaning
5.2.5	Conception of the Printing Unit
5.3	Ionography
5.3.1	Printing Unit
5.3.2	Imaging System and the Principle of Ionography
5.3.3	Printing Unit Concepts and Printing Systems based on Ionography
5.4	Magnetography
5.4.1	The Principle of Magnetography
5.4.2	Imaging System
5.4.3	Examples of Applications/Printing Systems
5.5	Ink Jet
5.5.1	Overview of Ink Jet Technologies and Processes

5.5.2	Continuous Ink Jet	7.2.1	Cutting and Die-Cutting
5.5.3	Drop on Demand Ink Jet Technologies	7.2.1.1	Characterization of the Processes
5.5.4	The Structure of Ink Jet Arrays	7.2.1.2	Cutting with Guillotine Cutters
5.5.5	Printing Systems based on Ink Jet Technology for Multicolor Printing (Selection)	7.2.1.3	Cutting Webs
		7.2.1.4	Die-Cutting
5.6	Thermography	7.2.2	Folding
5.6.1	Overview of Thermography Technologies	7.2.2.1	Characterization of the Process
5.6.2	Thermal Transfer Printing Systems	7.2.2.2	Folding with Folding Machines
5.6.3	Thermal Sublimation Printing Systems	7.2.2.3	Folding Bookbinding Sheets
5.7	Electrography	7.2.3	Forwarding
5.8	Photography	7.2.3.1	Characterization of the Process
5.9	“X-Graphy”	7.2.3.2	Forwarding Process in Industrial Finishing
5.9.1	TonerJet Printing Technology	7.2.4	Assembling into Blocks
5.9.2	Elcography	7.2.4.1	Characterization of the Process
5.9.3	Direct Imaging Printing Technology	7.2.4.2	Gathering
5.9.4	Assessment of New Types of NIP Technologies	7.2.4.3	Gathering into Single-Layer Blocks
6	Hybrid Printing Systems	7.2.5	Binding Blocks
6.1	Overview of Printing Methods and Technologies	7.2.5.1	Characterization of the Process
6.2	Combination Variants of Hybrid Printing Systems	7.2.5.2	Thread-Stitching Books
6.3	System Concepts and Examples of Implementations	7.2.5.3	Perfect Binding
6.3.1	Hybrid Printing Systems combining Conventional Printing Technologies	7.2.5.4	Thread-Sealing
6.3.2	Hybrid Printing Systems combining NIP Technologies	7.2.5.5	Wire-Stitching
6.3.3	Hybrid Printing Systems combining Conventional and NIP Technologies	7.2.6	Trimming
6.3.4	Hybrid Printing Systems combining Computer to Press/Direct Imaging with NIP Technologies	7.2.6.1	Characterization of the Process
6.3.5	Hybrid Print Systems combining Conventional Printing Technologies with Computer to Press Technologies	7.2.6.2	Trimming Book Blocks and Brochures
6.4	Hybrid Techniques for In-Line and Off-line Print Production	7.2.7	Edge Treatment on Books and Brochures
7	Print Finishing Processes	7.2.7.1	Characterization of the Process
7.1	Classification of Print Finishing Processes	7.2.7.2	Process Sections of Block Edge Treatments
7.2	Process Steps and Procedure for Print Finishing	7.2.8	Case Making
		7.2.8.1	Characterization of the Process
		7.2.8.2	Producing Book Covers
		7.2.9	Book Finishing
		7.2.9.1	Characterization of the Process
		7.2.9.2	The Process Sections of Book Finishing
		7.2.10	Packaging
		7.2.10.1	Characterization of the Process
		7.2.10.2	Packaging of Books and Brochures
		7.3	Process Structuring in Print Finishing
		7.3.1	Basic Principles of Process Structuring
		7.3.1.1	Workflow Production in Print Finishing
		7.3.1.2	Interlinking Modules in Print Finishing
		7.3.1.3	Temporary Storage of Folded Sheets
		7.3.2	Production Lines in Paper Finishing (Examples)
		7.3.2.1	Cutting Lines for Labels
		7.3.2.2	Production Lines for Mailings and Folded Products
		7.3.2.3	Newspaper Mailroom
		7.3.2.4	Mailroom for Magazines
		7.3.2.5	Binding Lines for Multi-Layer Brochures
		7.3.2.6	Production Lines for Hard Covers
		7.3.2.7	Finishing Short Print Runs

7.3.2.8	Bag Production Systems
7.3.2.9	Folding Boxes

8 Material and Data Flow

8.1	Material Conveyance Logistics
8.1.1	Logistics around the Press
8.1.1.1	The Supply of Printing Plates
8.1.1.2	Paper Reel Logistics
8.1.1.3	Ink, Dampening Solution, and Air Supply
8.1.1.4	Waste Disposal
8.1.1.5	Paper Pile Logistics for Sheet-fed Offset Presses
8.1.2	Logistics in Printing Companies
8.1.2.1	Procurement Logistics in Printing Companies
8.1.2.2	Inventory Management in Printing Companies
8.1.2.3	Production Logistics in Printing Companies
8.1.3	Logistics in Publishing Houses
8.2	Networking and Data Flow in Print Production
8.2.1	Network Concepts and Interfaces
8.2.2	Digital Workflow
8.2.2.1	Digital Workflow in Prepress
8.2.2.2	Digital Workflow and Digital Printing (Computer to Press)
8.2.2.3	Digital Workflow: Advantages, Challenges, and Possibilities
8.2.3	CIP3 for the Computer-Integrated Manufacturing (CIM) of Printed Products
8.2.4	Production Management Monitoring Systems
8.2.4.1	Purpose, Applications
8.2.4.2	Production Monitoring Systems

9 Production Strategies for Print Media

9.1	Production Concepts
9.1.1	Strategic Orientation of Printing Companies
9.1.2	Centralized and Distributed Production
9.1.2.1	Centralized Production at One Site
9.1.2.2	Distributed Production at Several Sites
9.1.2.3	Integrated Production, Interlinking of Systems
9.1.3	Print on Demand
9.1.4	Personalization
9.2	Production Systems

10 Comparison of Printing and Production Technologies for Print Media

10.1	Introduction
10.2	Overview of Methods and Technologies for the Production of Print Media
10.3	Production Methods and Strategies
10.4	Criteria for the Selection of Printing Technologies and Production Methods
10.5	Performance Criteria of Printing Systems and Trends in Print Media Production
10.5.1	Quality and Productivity/Run Length
10.5.2	Productivity
10.5.3	Production Costs per Print Page
10.5.4	Trends in Print Media Production

11 Electronic Media and Multimedia

11.1	Media Concepts
11.2	Data Types, Data Structures and their Applications
11.2.1	Text
11.2.2	Graphics
11.2.3	Image
11.2.4	Audio
11.2.5	Video
11.2.6	Animation
11.2.7	Virtual Reality (VR)
11.2.8	Augmented Reality
11.2.9	Multimedia
11.2.10	Document
11.3	Data Carriers
11.3.1	Hard Disk Storage Units
11.3.2	Rewritable Removable Storage Units
11.3.3	CD-ROM and DVD-ROM
11.3.4	Magnetic Tapes
11.4	Networks
11.4.1	Internet
11.4.2	Intranet, Extranet
11.4.3	Broad Band Networks
11.5	Data Compression
11.5.1	Compressed Data Archives
11.5.2	Compression Processes for Image Data Files
11.5.3	Compression Processes for Audio
11.5.4	Compression Processes for Video

11.6	Output Devices for Electronic Media and Multimedia	13.2	Environment, Safety, Standardization
11.6.1	Screen Output	13.2.1	Environmental Protection in the Printing Industry
11.6.2	Projection Equipment	13.2.1.1	Introduction
11.6.3	Stereo Output	13.2.1.2	Environmental Protection in Offset Printing
11.6.4	Projection directly to the Eyes	13.2.1.3	Environmental Protection in Gravure Printing
11.7	Multimedia Applications	13.2.1.4	Environmental Protection in Letterpress and Flexographic Printing
12	Print Media and Electronic Media	13.2.1.5	Environmental Protection in Screen Printing
12.1	Examples of Print Media and Electronic Media	13.2.1.6	Environment-oriented Business Management
12.2	The Production of Print Media and Electronic Media	13.2.1.7	Legal Foundations
12.3	“Electronic” Books, “Electronic” Ink, “Electronic” Paper	13.2.1.8	Support and Advice for Environment-relevant Measures
12.3.1	“Electronic” Books (E-Books)	13.2.2	Safety Resources
12.3.2	“Electronic” Ink (E-Ink), “Electronic” Paper (E-Paper)	13.2.2.1	Health and Safety
12.4	Market Shares and Trends	13.2.2.2	International and European Directives (Laws) and Standards
13	Special Topics	13.2.2.3	Safety-conscious Design
13.1	History, Education, Research	13.2.2.4	Requirements for Separating Protective Devices
13.1.1	History of Technology (Press and Prepress)	13.2.2.5	Hazard Evaluation, Risk Assessment
13.1.1.1	Offset Printing and Offset Printing Presses	13.2.2.6	CE Mark and GS Label
13.1.1.2	Gravure Printing and Gravure Printing Presses	13.2.2.7	Intended Use
13.1.1.3	Letterpress Printing and Letterpress Printing Presses	13.2.3	Industry Standards, Codes of Practice and National/International Standards
13.1.1.4	The Historical Relationship of the Printing Press Manufacturers	13.3	Markets and Development Trends for Print Media
13.1.1.5	Prepress	13.3.1	Newspaper Market
13.1.2	Education and Qualifications (Career Profiles, Courses)	13.3.2	Magazine Market
13.1.2.1	The Printing Industry as an Employer	13.3.3	Book Market
13.1.2.2	Educational Requirements and Options	13.3.4	Catalogue Market
13.1.2.3	Vocational Training	13.3.5	Advertising Printing Market
13.1.2.4	Course of Study	13.3.6	Packaging Market
13.1.2.5	Scholarships for International Study Programs	13.3.7	SOHO Market
13.1.2.6	Heidelberg Print Media Academy	14	Appendix
13.1.3	Science and Research (selected Examples)	14.1	Explanation of Specific Terms
13.1.3.1	Subjects, Methods and Cooperations	14.1.1	Glossary
13.1.3.2	Inking Units	14.1.2	Abbreviations and their Meaning
13.1.3.3	Printing Units	14.1.3	Abbreviations of Source Data
13.1.3.4	Sheet Transfer	14.2	Physical-Technical Quantities and Conversions
13.1.3.5	Joint Industrial Research	14.2.1	Quantities and Units in the SI-System (Selection)
		14.2.2	Conversion between the SI-System and the Imperial System (Metric/Imperial)
		14.3	Bibliography
		14.3.1	Bibliographical References to Readings on the Chapters and sections in this Handbook ...

14.3.2	Selected Literature on Print Media related Topics (General Bibliography and Individual Topics)	14.5	Research Associations and Educational Institutions for the Graphic Arts Industry (Selection)
14.4	Standards (Selection)	14.5.1	Universities
14.4.1	Prepress	14.5.2	Research Institutes and Research Centers
14.4.2	Printing Ink	14.5.3	Institutions for Training and Education
14.4.3	Substrates	14.6	Associations and Organizations in the Printing and Publishing Industry (Selection)
14.4.4	Materials (Printing Plates, Blankets)	14.6.1	Associations and Organizations
14.4.5	Printing Technologies and Printing Presses	14.6.2	Commercial Joint Research
14.4.6	Finishing	14.7	International Conferences for the Graphic Arts Industry (Selection)
14.4.7	Quality, Quality Specifications, and Measurement Techniques		
14.4.8	Safety of Machinery		
14.4.9	Environmental Management		

Handbook of Print Media

Technologies and Production Methods

Kipphan, H. (Ed.)

2001, XL, 1207 p. 1249 illus., 1230 illus. in color. In 2
volumes, not available separately., Hardcover

ISBN: 978-3-540-67326-2
