Localization of mRNAs at Synaptic Sites on Dendrites

Oswald Steward and Paul Worley

1	Introduction	1
2	The Machinery for Translation in Dendrites.....	1
2.1	SPRCs Are Precisely Localized in the Postsynaptic Cytoplasm	2
2.2	SPRCs Are Present at Spine Synapses on Different Neuron Types	2
2.3	SPRCs Are Often Associated with Membranous Organelles in an RER-Like Configuration	3
2.4	SPRCs Are Also Present at Non-Spine Synapses	3
2.5	SPRCs Are Especially Prominent at Developing Synapses . . .	4
3	Types of Proteins That Are Synthesized at SPRCs	4
3.1	Biochemical Studies of Proteins Synthesized by Subcellular Fractions Enriched in Pinched-Off Dendrites	4
3.2	mRNAs in the Dendrites of Neurons in Vivo	6
3.3	Molecular Biological Analyses of the Complement of mRNAs in Isolated Dendrites from Neurons in Vitro	10
3.4	The Search for Novel Dendritic mRNAs	11
4	Activity-Dependent Regulation of mRNA Trafficking in Dendrites	11
4.1	Lessons from the Study of <i>Arc</i> : A Cellular Mechanism for Protein Synthesis-Dependent Synaptic Modification.	14
4.2	Post-Translational Processing Within Dendrites	14
5	Signals That Mediate mRNA Routing and Localization	16
5.1	Granules: Supramolecular Packets That May Be Involved in mRNA Transport	18
5.2	mRNA Translocation Mechanisms	19
5.3	Regulation of mRNA Translation at Synapses	20
5.3.1	Studies in Hippocampal Slices	20
5.3.2	Studies in Intact Animals	20
5.3.3	Studies in Synaptoneurosomes	21
6	Conclusion	22
	References	23

Long-Lasting Hippocampal Plasticity: Cellular Model for Memory Consolidation?
