

Table of Contents

0. Introduction. Description of contents	1
1. Von Neumann's inequality and Ando's generalization	14
Notes and Remarks	29
2. Non-unitarizable uniformly bounded group representations	31
Notes and Remarks	52
3. Completely bounded maps	58
Notes and Remarks	74
4. Completely bounded homomorphisms and derivations	75
Notes and Remarks	95
5. Schur multipliers and Grothendieck's inequality	99
Notes and Remarks	112
6. Hankelian Schur multipliers. Herz-Schur multipliers	114
Notes and Remarks	119
7. The similarity problem for cyclic homomorphisms on a C^*-algebra	124
Notes and Remarks	140
8. Completely bounded maps in the Banach space setting	142
Notes and Remarks	151
9. The Sz.-Nagy-Halmos similarity problem	152
Notes and Remarks	167
10. The Kadison Similarity Problem	168
Notes and Remarks	181
References	182
Subject Index	194
Notation Index	197

Similarity Problems and Completely Bounded Maps

Pisier, G.

2001, VII, 202 p., Softcover

ISBN: 978-3-540-41524-4
