

Table of Contents

1. Introduction	1
1.1 “Believe It or Not” – The Handling of Uncertain Knowledge	1
1.2 Overview	5
1.3 Basic Definitions and Notations	8
1.3.1 Propositional and Conditional Expressions	8
1.3.2 Probabilistic Logics	9
2. Belief Revision and Nonmonotonic Reasoning – State of the Art	11
2.1 Nonmonotonic Reasoning	12
2.2 Belief Revision	13
2.3 Nonmonotonic Reasoning and Belief Revision – Two Sides of the Same Coin?	17
2.4 Iterated Revision, Epistemic States, and Conditionals	17
2.5 Probabilistic Reasoning – The ME-Approach	23
3. Conditionals	27
3.1 Conditionals and Epistemic States	27
3.2 Conditional Valuation Functions	31
3.3 Conditional Valuation Functions and Beliefs	34
3.4 A Dynamic View on Conditionals	36
3.5 Conditional Structures	39
3.6 Conditional Indifference	48
4. Revising Epistemic States by Conditional Beliefs	53
4.1 Postulates for Revising by Conditional Beliefs	54
4.2 Representation Theorems	56
4.3 Conditional Valuation Functions and Revision	57
4.4 A Revision Operator for Ordinal Conditional Functions	60
4.5 The Principle of Conditional Preservation	62
4.6 C-Revisions and C-Representations	66

5. Characterizing the Principle of Minimum Cross-Entropy .	73
5.1 Conditional Preservation	75
5.2 The Functional Concept	80
5.3 Logical Coherence	85
5.4 Representation Invariance	87
5.5 Uniqueness and the Main Theorem	89
6. Reasoning at Optimum Entropy	91
6.1 Probabilistic Consequence and Probabilistic Inference	92
6.2 Basic Properties of the ME-Inference Operation	93
6.3 ME-Logic and Conditionals	95
6.4 ME-Deduction Rules	97
6.4.1 Chaining Rules	98
6.4.2 Cautious Monotonicity and Cautious Cut	99
6.4.3 Conjoining Literals in Antecedent and Consequent	100
6.4.4 Reasoning by Cases	101
7. Belief Revision and Nonmonotonic Reasoning – Revisited	103
7.1 Universal Inference Operations	104
7.2 Simultaneous and Successive Revision	108
7.3 Separating Background from Evidential Knowledge	109
7.4 Revising Epistemic States by Sets of Conditionals	112
7.5 Revision versus Updating	114
7.6 Focusing in a Probabilistic Framework	116
8. Knowledge Discovery by Following Conditional Structures	119
8.1 Probabilistic Knowledge Discovery	120
8.2 Discovering Conditional Structures	122
8.3 Examples – ME-Knowledge Discovery	131
8.4 Open Problems and Concluding Remarks	134
9. Algorithms and Implementations	137
9.1 ME-Reasoning with Probabilistic Conditionals	137
9.2 Probabilistic Knowledge Discovery	138
9.3 Possibilistic Belief Revision	139
10. Conclusion	141
A. Proofs	145
Bibliography	175
Index	187

Conditionals in Nonmonotonic Reasoning and Belief
Revision

Considering Conditionals as Agents

Kern-Isberner, G.

2001, X, 194 p., Softcover

ISBN: 978-3-540-42367-6
