

# Contents

## Introduction

<i>K. Baberschke, M. Donath, W. Nolting</i> .....	1
---	---

---

## Part I Ground-State Properties

---

### On the Way to a Gutzwiller Density Functional Theory

<i>W. Weber, J. Bünenmann, F. Gebhard</i> .....	9
---	---

### Anisotropy in Magnetism

<i>K. Baberschke</i> .....	27
----------------------------	----

### Anisotropic Magnetic Ground-State Moments

#### Probed by Soft X-Ray Spectroscopy

<i>H.A. Dürr</i> .....	46
------------------------	----

### First Principles Determination of Magnetic Anisotropy and Magnetostriction in Transition Metal Alloys

<i>R. Wu</i> .....	60
--------------------	----

---

## Part II Finite-Temperature Electronic Structure

---

### Magnetism of Correlated Systems: Beyond LDA

<i>A.I. Lichtenstein, M.I. Katsnelson</i> .....	75
---	----

### Probing the Electronic States of Band Ferromagnets with Photoemission

<i>T. Greber</i> .....	94
------------------------	----

### Temperature Dependence of Spin- and Angle-Resolved Photoemission of Ni

<i>A. Kakizaki</i> .....	111
--------------------------	-----

### Spin Fluctuations in Itinerant Electron Systems

<i>P. Mohn, S. Khmelevskiy</i> .....	126
--------------------------------------	-----

<b>Itinerant Electron Magnets: Curie Temperature and Susceptibility in Density-Functional Theory</b> <i>J. Kübler</i> .....	143
<b>Band Magnetism near a Quantum Critical Point</b> <i>S.G. Mishra</i> .....	158
<b>Non-equilibrium Physics of Magnetic Solids: Time Dependent Changes of Magnetism</b> <i>K.H. Bennemann</i> .....	173
<hr/>	
<b>Part III Models of Band-Ferromagnetism</b>	
<hr/>	
<b>Metallic Ferromagnetism – An Electronic Correlation Phenomenon</b> <i>D. Vollhardt, N. Blümer, K. Held, M. Kollar</i> .....	191
<b>Ferromagnetism in the Hubbard Model</b> <i>W. Nolting, M. Potthoff, T. Herrmann, T. Wegner</i> .....	208
<b>Orbital Order Versus Orbital Liquid in Doped Manganites</b> <i>A.M. Oleś, L.F. Feiner</i> .....	226
<hr/>	
<b>Part IV Low-Dimensional Systems</b>	
<hr/>	
<b>First Principles Theory of Magnetism for Materials with Reduced Dimensionality</b> <i>O. Eriksson</i> .....	243
<b>Surface Electronic Structure of Band Ferromagnets</b> <i>M. Donath</i> .....	267
<b>Phase Transitions in Coupled Two-Dimensional Ferromagnetic Layers</b> <i>P. Pouloupoulos, K. Baberschke</i> .....	283
<b>Theory of Spin Excitations and the Microwave Response of Cylindrical Ferromagnetic Nanowires</b> <i>D. Mills</i> .....	297
<b>Transmission of Electron Beams Through Thin Magnetic Films</b> <i>W. Weber, S. Riesen, H.C. Siegmann</i> .....	320

---

**Part V Understanding Spectroscopies**

---

**New Developments in UPS and XPS  
from Ferromagnetic Materials***J. Braun* ..... 341**Theory of Electron Spectroscopies***M. Potthoff* ..... 356**Magnetic Dichroism in Electron Spectroscopy***H. Ebert, J. Minár, V. Popescu* ..... 371**Neutrons as a Probe of the Magnetic Moment Stability  
in Itinerant Electron Ferromagnets***K.-U. Neumann, K.R.A. Ziebeck* ..... 386

Band-Ferromagnetism

Ground-State and Finite-Temperature Phenomena

Baberschke, K.; Donath, M.; Nolting, W. (Eds.)

2001, IX, 394 p. 27 illus. in color., Hardcover

ISBN: 978-3-540-42389-8
