

# Table of Contents

## Relations between Software and Performance Engineering

|   |     |
|---|-----|
| Conception of a Web-Based SPE Development Infrastructure .....                              | 1   |
| <i>Reiner Dumke, Reinhard Koeppe</i>  |     |
| Performance and Robustness Engineering and the Role of Automated Software Development ..... | 20  |
| <i>Rainer Gerlich</i>   |     |
| Performance Engineering of Component-Based Distributed Software Systems.....                | 40  |
| <i>Hassan Gomaa, Daniel A. Menascé</i>  |     |
| Conflicts and Trade-Offs between Software Performance and Maintainability .....             | 56  |
| <i>Lars Lundberg, Daniel Häggander, Wolfgang Diestelkamp</i>                                |     |
| Performance Engineering on the Basis of Performance Service Levels.....                     | 68  |
| <i>Claus Rautenstrauch, André Scholz</i>  |     |
| Possibilities of Performance Modelling with UML.....  | 78  |
| <i>Andreas Schmietendorf, Evgeni Dimitrov</i>   |     |
| Origins of Software Performance Engineering: Highlights and Outstanding Problems.....       | 96  |
| <i>Connie U. Smith</i>  |     |
| Performance Parameters and Context of Use .....   | 119 |
| <i>Chris Stary</i>  |     |

## Performance Modeling and Performance Measurement

|   |     |
|---|-----|
| Using Load Dependent Servers to Reduce the Complexity of Large Client-Server Simulation Models .....      | 131 |
| <i>Mariela Curiel, Ramon Puigjaner</i>  |     |
| Performance Evaluation of Mobile Agents: Issues and Approaches.....                                       | 148 |
| <i>Mario D. Dikaiakos, George Samaras</i>   |     |
| UML-Based Performance Modeling Framework for Component-Based Distributed Systems.....                     | 167 |
| <i>Pekka Kähkipuro</i>  |     |
| Scenario-Based Performance Evaluation of SDL/MSC-Specified Systems.....                                   | 185 |
| <i>Lennard Kerber</i>   |     |
| Characterization and Analysis of Software and Computer Systems with Uncertainties and Variabilities ..... | 202 |
| <i>Shikharesh Majumdar, Johannes Lüthi, Günther Haring, Revathy Ramadoss</i>                              |     |
| The Simalytic Modeling Technique .....  | 222 |
| <i>Tim R. Norton</i>  |     |

Resource Function Capture for Performance Aspects of Software Components  
and Sub-systems .....239  
*M. Woodside, V. Velland, M. Courtois, S. Bayarov*

**Practical Experience**

Shared Memory Contention and Its Impact on Multi-processor Call Control  
Throughput .....257  
*T. Drwiega*

Performance and Scalability Models for a Hypergrowth e-Commerce Web  
Site.....267  
*Neil J. Gunther*

Performance Testing for IP Services and Systems .....283  
*Frank Huebner, Kathleen Meier-Hellstern, Paul Reeser*

Performance Modelling of Interaction Protocols in Soft Real-Time Design  
Architectures .....300  
*Carlos Juiz, Ramon Puigjaner, Ken Jackson*

A Performance Engineering Case Study: Software Retrieval System.....317  
*José Merseguer, Javier Campos, Eduardo Mena*

Performance Management of SAP® Solutions.....333  
*Thomas Schneider*

**Author Index**.....349

Performance Engineering

State of the Art and Current Trends

Dumke, R.; Rautenstrauch, C.; Schmietendorf, A.;

Scholz, A. (Eds.)

2001, XIV, 349 p., Softcover

ISBN: 978-3-540-42145-0
