

# Contents

---

## Part I Introduction

---

### 1 Introduction to Spin Electronics

*J. F. Gregg* ..... 3

---

## Part II Basic Concepts

---

### 2 An Introduction to the Theory of Normal and Ferromagnetic Metals

*G. A. Gehring* ..... 35

### 3 Basic Electron Transport

*B. J. Hickey, G. J. Morgan and M. A. Howson* ..... 52

### 4 Phenomenological Theory of Giant Magnetoresistance

*J. Mathon* ..... 71

### 5 Electronic Structure, Exchange and Magnetism in Oxides

*D. Khomskii* ..... 89

### 6 Transport Properties of Mixed-Valence Manganites

*M. Viret* ..... 117

### 7 Spin Dependent Tunneling

*F. Guinea, M. J. Calderón and L. Brey* ..... 159

### 8 Basic Semiconductor Physics

*H. J. Jenniches* ..... 172

### 9 Metal–Semiconductor Contacts

*D. I. Pugh* ..... 199

### 10 Micromagnetic Spin Structure

*R. Skomski* ..... 204

### 11 Electronic Noise in Magnetic Materials and Devices

*B. Raquet* ..... 232

---

**Part III Materials, Techniques and Devices**

---

<b>12 Materials for Spin Electronics</b>	
<i>J. M. D. Coey</i> .....	277
<b>13 Thin Film Deposition Techniques (PVD)</b>	
<i>E. Steinbeiss</i> .....	298
<b>14 Magnetic Imaging</b>	
<i>A. K. Petford-Long</i> .....	316
<b>15 Observation of Micromagnetic Configurations in Mesoscopic Magnetic Elements</b>	
<i>K. Ounadjela, I. L. Prejbeanu, L. D. Buda, U. Ebels, and M. Hehn</i> .....	332
<b>16 Micro- and Nanofabrication Techniques</b>	
<i>C. Fermon</i> .....	379
<b>17 Spin Transport in Semiconductors</b>	
<i>M. Ziese</i> .....	396
<b>18 Circuit Theory for the Electrically Declined</b>	
<i>J. F. Gregg and M. J. Thornton</i> .....	416
<b>19 Spin-Valve and Spin-Tunneling Devices: Read Heads, MRAMs, Field Sensors</b>	
<i>P. P. Freitas</i> .....	464
<b>Index</b> .....	489
