

# Contents

<b>Executive Summary</b> .....	1
<b>1 Lenses and Mirrors for Solar Energy</b> .....	3
1.1 Photovoltaic or Thermal Concentration? .....	3
1.2 Classification of Solar Concentrators .....	7
<b>2 Nonimaging Optics</b> .....	15
2.1 Nonimaging Concentration .....	15
2.2 Generalized Ideal Concentration .....	22
2.3 Lagrange Invariant .....	26
2.4 Nonimaging Mirrors .....	28
<b>3 Fresnel Lens Optics</b> .....	35
3.1 Reflection and Refraction .....	35
3.2 Total Internal Reflection .....	39
3.3 Deviation .....	41
3.4 Refractive Indices .....	44
3.5 Minimum Dispersion .....	50
<b>4 Earlier Fresnel Lenses</b> .....	53
4.1 History of Fresnel Lenses .....	53
4.2 Recent Developments .....	58
4.3 Simple Fresnel Lenses .....	66
4.4 Domed or Arched Fresnel Lenses .....	72
<b>5 Nonimaging Fresnel Lens Design</b> .....	77
5.1 Applied Nonimaging Lens Design .....	77
5.2 The Optimum Linear Lens .....	79
5.3 Rotational Symmetry .....	92
5.4 Arbitrary Shapes .....	93
5.5 Diverger Lens for Lighting .....	97

<b>6</b>	<b>Lens Evaluation</b>	101
6.1	Losses	101
6.2	Transmittance	104
6.3	Geometrical Losses	106
6.4	Concentration Ratios	113
6.5	Nonideal Concentration	119
<b>7</b>	<b>Optimization of Stationary Concentrators</b>	127
7.1	Choice of Stationary Collector	127
7.2	Solar Radiation Model	129
7.3	Radiation on a Tilted Plane	136
7.4	Acceptance by a Solar Concentrator	139
7.5	Compound Parabolic Concentrators	142
7.6	Quasi-3D Concentrators	149
<b>8</b>	<b>Prototype Design, Manufacturing, and Testing</b>	155
8.1	Prototypes of Choice	155
8.2	Prism Size	159
8.3	Lens Redesign	161
8.4	Lens Manufacturing	166
8.5	Sample	170
8.6	Preliminary Tests	171
8.7	Partial Absorber Illumination	173
8.8	Tracking	175
<b>9</b>	<b>Concentrated Sunlight and Photovoltaic Conversion</b>	179
9.1	Flux Density	179
9.2	Solar Disk Size and Brightness	185
9.3	Spectral Color Dispersion	187
9.4	Concentrator Cells	192
9.5	Multijunction Devices	195
9.6	Photovoltaic System Performance	208
9.7	Concentration and Cost	211
<b>10</b>	<b>Solar Thermal Concentrator Systems</b>	217
10.1	Solar Resources	217
10.2	Solar Sorption Air Conditioning	222
10.3	Energy and Exergy	229
10.4	Exergy of a Concentrating Collector	236

<b>11 Solar Concentration in Space</b> .....	245
11.1 Space Concentrator Arrays .....	245
11.2 Design Challenges in Space .....	251
11.3 Lenses and Mirrors! .....	255
<b>References</b> .....	257
<b>Index</b> .....	269

Nonimaging Fresnel Lenses

Design and Performance of Solar Concentrators

Leutz, R.; Suzuki, A.

2001, XI, 274 p., Hardcover

ISBN: 978-3-540-41841-2
