Keynote Speech

Language, Objects, and Intentionality	1
<i>Charles Simonyi (Microsoft Corporation)</i>	

Sharing and Encapsulation

Capabilities for Sharing: A Generalisation of Uniqueness and Read-Only	2
<i>John Boyland (University of Wisconsin-Milwaukee), James Noble (Victoria University of Wellington), and William Retert (University of Wisconsin-Milwaukee)</i>	
Sealing, Encapsulation, and Mutability	28
<i>Marina Biberstein (IBM Research Lab in Haifa), Joseph (Yossi) Gil (Technion and IBM), and Sara Porat (IBM Research Lab in Haifa)</i>	
Simple Ownership Types for Object Containment	53
<i>David G. Clarke (Utrecht University), James Noble (Victoria University of Wellington), and John M. Potter (University of New South Wales)</i>	

Type Inference and Static Analysis

Distinctness and Sharing Domains for Static Analysis of Java Programs	77
<i>Isabelle Pollet, Baudouin Le Charlier (University of Namur), and Agostino Cortesi (Ca' Foscari University)</i>	
Precise Constraint-Based Type Inference for Java	99
<i>Tiejun Wang and Scott F. Smith (The Johns Hopkins University)</i>	

Language Design

CCC: User-Defined Object Structure in C	118
<i>Yasunori Harada (Japan Science and Technology Corporation/NTT), Kenichi Yamazaki (NTT DoCoMo), and Richard Potter (Japan Science and Technology Corporation)</i>	
<i>Fickle</i> : Dynamic Object Re-classification	130
<i>Sophia Drossopoulou (Imperial College London), Ferruccio Damiani, Mariangiola Dezani-Ciancaglini (University of Torino), and Paola Giannini (University of Piemonte Orientale)</i>	

Invited Talk

Scripting .NET Using Mondrian	150
<i>Erik Meijer (Microsoft), Nigel Perry (Massey University), and Arjan van Yzendoorn (Utrecht University)</i>	

Implementation Techniques

A Quasi Optimal Bit-Vector Encoding of Tree Hierarchies. Application to Efficient Type Inclusion Tests	165
<i>Olivier Raynaud and Eric Thierry (Lirmm)</i>	
On the Usefulness of Liveness for Garbage Collection and Leak Detection .	181
<i>Martin Hirzel, Amer Diwan (University of Colorado at Boulder), and Antony Hosking (Purdue University)</i>	
Concurrent Cycle Collection in Reference Counted Systems	207
<i>David F. Bacon and V.T. Rajan (IBM T.J. Watson Research Center)</i>	

Reflection and Concurrency

A Bytecode Translator for Distributed Execution of “Legacy” Java Software	236
<i>Michiaki Tatsubori, Toshiyuki Sasaki (University of Tsukuba), Shigeru Chiba (University of Tsukuba, and PRESTO, Japan Science and Technology Corporation), and Kozo Itano (University of Tsukuba)</i>	
Reflections on MOPs, Components, and Java Security	256
<i>Denis Caromel and Julien Vayssière (University of Nice - CNRS, I3S/INRIA Sophia Antipolis)</i>	
The Optimistic Readers Transformation	275
<i>Robert Strom and Joshua Auerbach (IBM T.J. Watson Research Center)</i>	

Invited Talk

People and the Limits of Methodology	302
<i>Alistair Cockburn (Humans and Technology)</i>	

Language Design

Family Polymorphism	303
<i>Erik Ernst (University of Aalborg)</i>	
An Overview of AspectJ	327
<i>Gregor Kiczales (University of British Columbia),</i>	
<i>Erik Hilsdale, Jim Hugunin, Mik Kersten, Jeffrey Palm</i>	
<i>(Xerox Palo Alto Research Center), and</i>	
<i>William G. Griswold (University of California at San Diego)</i>	
True Modules for Java-like Languages	354
<i>Davide Ancona and Elena Zucca (University of Genova)</i>	

Testing and Design

Selecting an Efficient OO Integration Testing Strategy: An Experimental Comparison of Actual Strategies	381
<i>Vu Le Hanh (Irisa), Kamel Akif (France Telecom R&D),</i>	
<i>Yves Le Traon, and Jean-Marc Jézéquel (Irisa)</i>	
Quality and Understandability of Use Case Models	402
<i>Bente Anda, Dag Sjøberg, and Magne Jørgensen</i>	
<i>(University of Oslo)</i>	
Author Index	429

ECOOP 2001 - Object-Oriented Programming
15th European Conference, Budapest, Hungary, June
18-22, 2001, Proceedings
Lindskov Knudsen, J.
2001, XIV, 434 p., Softcover
ISBN: 978-3-540-42206-8
