

Table of Contents

Non-determinism Analysis in a Parallel-Functional Language	1
<i>Ricardo Peña and Clara Segura</i>	
Exploiting Implicit Parallelism in Functional Programs with SLAM	19
<i>John Sargeant, Chris Kirkham, and Ian Watson</i>	
Verifying Generic Erlang Client–Server Implementations	37
<i>Thomas Arts and Thomas Noll</i>	
The Design and Implementation of Glasgow Distributed Haskell	53
<i>R.F. Poynton, P.W. Trinder, and H.-W. Loidl</i>	
Implementation Skeletons in Eden: Low-Effort Parallel Programming	71
<i>Ulrike Klusik, Rita Loogen, Steffen Priebe, and Fernando Rubio</i>	
ObjectCurry: An Object-Oriented Extension of the Declarative Multi-Paradigm Language Curry	89
<i>Michael Hanus, Frank Huch, and Philipp Niederau</i>	
Distributed Programming in Haskell with Ports	107
<i>Frank Huch and Ulrich Norbistrath</i>	
The Dynamic Properties of Hume: A Functionally-Based Concurrent Language with Bounded Time and Space Behaviour	122
<i>Kevin Hammond</i>	
A Usage Analysis with Bounded Usage Polymorphism and Subtyping	140
<i>Jörgen Gustavsson and Josef Svenningsson</i>	
Polygonizing Implicit Surfaces in a Purely Functional Way	158
<i>Thorsten H.-G. Zörner, Pieter Koopman, Marko van Eekelen, and Rinus Plasmeijer</i>	
Freja, Hat and Hood – A Comparative Evaluation of Three Systems for Tracing and Debugging Lazy Functional Programs	176
<i>Olaf Chitil, Colin Runciman, and Malcolm Wallace</i>	
Porting the Clean Object I/O Library to Haskell	194
<i>Peter Achten and Simon Peyton Jones</i>	
Organizing Speculative Computations in Functional Systems	214
<i>Raimund Schroeder and Werner Kluge</i>	

VIII Table of Contents

Improving Cache Effectiveness
through Array Data Layout Manipulation in SAC 231
Clemens Greck

The Collective Semantics in Functional SPMD Programming 249
John O'Donnell

Author Index 267

Implementation of Functional Languages

12th International Workshop, IFL 2000 Aachen,

Germany, September 4-7, 2000. Selected Papers

Mohnen, M.; Koopman, P. (Eds.)

2001, VIII, 272 p., Softcover

ISBN: 978-3-540-41919-8
