

Preface

The story is the richest heritage of human civilizations. One can imagine the first stories being told, several thousand centuries ago, by wise old men huddled around campfires. Since this time, the narrative process has been considerably developed and enriched: sounds and music have been added to complement the speech, while scenery and theatrical sets have been created to enhance the story environment. Actors, dancers, and technicians have replaced the lone storyteller. The story is no longer the sole preserve of oral narrative but can be realized in book, theatrical, dance, or movie form. Even the audience can extend up to several million individuals.

And yet in its many forms the story lies at the heart of one of the world's most important industries.

The advent of the digital era has enhanced and accelerated this evolution: image synthesis, digital special effects, new Human-Computer interfaces, and the Internet allow one not only to realize more sophisticated narrative forms but also to create new concepts such as video gaming and virtual environments. The art of storytelling is becoming evermore complex. Virtual reality offers new tools to capture, and to interactively modify the imaginary environment, in ever more intuitive ways, coupled with a maximum sensory feedback. In fact, virtual reality technologies offer enhanced and exciting production possibilities for the creation and non-linear manipulation in real time, of almost any story form. This has lead to the new concept of **Virtual Storytelling**.

The first International Conference on Virtual Storytelling gathers researchers from the scientific, artistic, and industrial communities to demonstrate new methods and techniques, show the latest results, and to exchange concepts and ideas for the use of Virtual Reality technologies for creating, scripting, populating, rendering, and interacting with stories, whatever their form, be it theatre, movie, cartoon, advertisement, puppet show, multimedia work, video-games...

We hope that ICVS 2001 will be of great interest to all the participants and that it will be the first conference in a long series of international conferences on this fascinating topic.

September 2001

Olivier Balet
G rard Subsol
Patrice Torguet

Acknowledgements

The creation of this international conference on Virtual Storytelling is a joint initiative of the Virtual Reality Department of the *Communication et Systèmes* Group and the French Working Group on Virtual Reality (GT-RV).

However, this conference would not have existed without the official support of the European Commission and the active contribution of sponsors, organizations, and individuals.

Therefore, the conference organizers would like to thank the European Commission's IST Program for contributing to the conference funding as well as both the *Immersion SA* and *RealViz* companies for offering wonderful prizes to the best papers.

We would also like to thank the members of the Scientific and Application Boards for supporting the conference from the very beginning, helping us to indentify the most relevant topics, and proposing names of experts to sit on the Program Committee.

The members of the Program Committee deserve special acknowledgment for their superb job in reviewing all the papers with such remarkable care and moreover... by the deadline!

Finally, we wish to thank the people from *Sophie et Associés* and the Computer Science laboratories of the Universities of Avignon and Toulouse for their help during the preparation of this conference.

Organization

Chair

Olivier Balet
G rard Subsol
Patrice Torguet

Communication & Syst mes Group, France
LIA, University of Avignon, France
IRIT, University of Toulouse, France

Scientific Board

Bruno Arnaldi
Eric Badiqu 
Norman I. Badler
Andrew Berend
Bruce Blumberg
Michael F. Cohen
Enrico Gobbetti
Martin G bel
Alain Grumbach
Barbara Hayes-Roth
Ryohei Nakatsu
Philippe Qu  au
Paul Siebert
Kristian Simsarian
Frank Van Reeth

SIAMES Project, IRISA, France
European Commission, Brussels, Belgium
University of Pennsylvania, USA
Anthropics Technology Ltd., UK
Media Lab, MIT, USA
Microsoft Research, Redmond, USA
CRS4, Italy
GMD, St Augustin, Germany
ENST Paris, France
Stanford University/Extempo Systems, USA
ATR, Kyoto, Japan
UNESCO, Paris, France
University of Glasgow, UK
IDEO, San Francisco, USA
Limburgs Universitair Centrum, Belgium

Application Board

Jean-Francis Balaguer
Maurice Benayoun
Franz Fischnaller
Andrew Glassner
Tran Anh Hung
Paul Kafno
Mathieu Kassovitz
Sally Jane Norman
David Parfitt
Ulrike Spierling
Vittorio Storaro

Largeur, Switzerland
Z-A Productions, Paris, France
F.A.B.R.I.CATORS, Milano, Italy
Writer Director, USA
Director, Vietnam
HD Thames, UK
Director, Actor, France
Ecole Sup rieure de l'Image, Angoul me, France
Producer, Actor, UK
ZGDV, Darmstadt, Germany
Cinematographer, Italy

Program Committee

Edward Altman	Kent Ridge Digital Labs, Singapore
Cynthia Breazeal	Sociable Machines Project, MIT, USA
Marc Cavazza	University of Teesside, UK
Jean-Luc Dugelay	EURECOM Sophia Antipolis, France
John Funge	iKuni Inc., Palo Alto, USA
Petra Gemeinboeck	University of Illinois at Chicago, USA
Jonathan Gratch	University of Southern California, USA
Jean-Pierre Jessel	IRIT, France
Vali Lalioti	University of Pretoria, Republic of South Africa
Wim Lamotte	Limburgs Universitair Centrum, Belgium
Keith Miller	University of Illinois at Chicago, USA
Sina Mostafawy	rmh, Köln, Germany
Jean-Christophe Nebel	University of Glasgow, UK
Tim Regan	Microsoft Research, Redmond, USA
Agnès Saulnier	Institut National de l'Audiovisuel, France
Nikitas Sgouros	University of Piraeus, Greece
Danaë Stanton	University of Nottingham, UK
Marie-Luce Viaud	Institut National de l'Audiovisuel, France
R. Michael Young	North Carolina State University, USA

Virtual Storytelling. Using Virtual Reality Technologies
for Storytelling

International Conference ICVS 2001 Avignon, France,
September 27-28, 2001 Proceedings
