Table of Contents

Papers

A Memetic Pareto Evolutionary Approach to Artificial Neural Networks
Hussein A. Abbass 1

Relating Defeasible and Default Logic
Grigoris Antoniou, David Billington 13

Resolving Minsky's Paradox: The *d*-Dimensional Normal Distribution Case
Luis Rueda, B. John Oommen 25

Solving Overconstrained Temporal Reasoning Problems
Matthew Beaumont, Abdul Sattar, Michael Maher, John Thornton 37

How the Level of Interchangeability Embedded in a Finite Constraint Satisfaction Problem Affects the Performance of Search
Amy M. Beckwith, Berthe Y. Choueiry, Hui Zou 50

Towards Learning Naive Physics by Visual Observation: Qualitative Spatial Representations
Paul A. Boxer 62

Phased Array Sub-beam Optimisation
N. J. Bracken, R. I. McKay 71

Generation of Facial Expressions from Emotion Using a Fuzzy Rule-Based System
The Duy Bui, Dirk Heylen, Mannes Poel, Anton Nijholt 83

An Efficient Form Classification Method Using Partial Matching
Yungcheol Byun, Sungsoo Yoon, Yeongwoo Choi, Gyeonghwan Kim, Yillbyung Lee . . 95

Gradient Descent Style Leveraging of Decision Trees and Stumps for Misclassification Cost Performance
Mike Cameron-Jones 107

Postdiction problems in Dynamic Logic
Samir Chopra, Dongmo Zhang 119

A Method for Reasoning with Ontologies Represented as Conceptual Graphs
Dan Corbett 130

Selection of Tasks and Delegation of Responsibility in a Multiagent System for Emergent Process Management
John Debenham 142

State Minimization Re-visited
Norman Foo, Abhaya Nayak, Maurice Pagnucco, Dongmo Zhang 153

Decidability of Quantified Propositional Branching Time Logics
Tim French 165

Improved Techniques for an Iris Recognition System with High Performance
Gyundo Kee, Yungcheol Byun, Kwanyong Lee, Yillbyung Lee 177

An Investigation of an Adaptive Poker Player
Graham Kendall, Mark Willdig 189

Acquiring Adaptation Knowledge for CBR with MIKAS
Abdus Salam Khan, Achim Hoffmann 201

A Real-Time Region-Based Motion Segmentation and Tracking Using Adaptive Thresholding and K-means Clustering
Jong Bae Kim, Hye Sun Park, Min Ho Park, Hang Joon Kim 213

Automatic Cell Classification in Human‘s Peripheral Blood Images Based on Morphological Image Processing
Kyungsu Kim, Jeonghee Jeon, Wankyoo Choi, Pankoo Kim, Yo-Sung Ho 225

Formal Concept Analysis for Domain-Specific Document Retrieval Systems
Mihye Kim, Paul Compton 237

Learner’s Self-Assessment: A Case Study of SVM for Information Retrieval
Adam Kowalczyk, Bhavani Raskutti 249

A Semiotic Model of Communication and Its Implications for the Digital City Development
Victor V. Kryssanov, Masayuki Okabe, Koh Kakusho, Michihiko Minoh 261

Simulations for Comparing Knowledge Acquisition and Machine Learning
Achim Hoffmann, Rex Kwok, Paul Compton 273

Application of Genetic Algorithms to the Optimisation of Neural Network Configuration for Stock Market Forecasting
Daniel Hulme, Shuxiang Xu 285

Updating Epistemic States
Jérôme Lang, Pierre Marquis, Mary-Anne Williams 297

Fast Text Classification Using Sequential Sampling Processes
Michael D. Lee 309

Agents in a Multi-cultural World: Towards Ontological Reconciliation
Kendall Lister, Leon Sterling 321

Logical Foundations for Reasoning about Trust in Secure Digital Communication
Chuchang Liu 333

Phe-Q : A Pheromone Based Q-Learning
Ndedi Monekosso, Paolo Remagnino 345

Specification of Kansei Patterns in an Adaptive Perceptual Space
Tomoko Murakami, Ryohei Orihara, Naomichi Sueda 356

Embodying the JACK Agent Architecture
Emma Norling, Frank E. Ritter 368

Towards an Ontology of Part-of
Chris Nowak, Richard Raban 378

Actions Made Explicit in BDI
Vineet Padmanabhan, Guido Governatori, Abdul Sattar 390

Wrapping Boosters against Noise
Bernhard Pfahringer, Geoffrey Holmes, Gabi Schmidberger 402

Continuous Temporal Models
Mark Reynolds 414

Language and Commonsense Knowledge
Walid S. Saba 426

Simulation of Network Security with Collaboration among IDS Models
Hee Suk Seo, Tae Ho Cho 438

Programming Spoken Dialogs Using Grammatical Inference
Bradford Starkie 449

Towards Genetic Programming for Texture Classification
Andy Song, Thomas Loveard, Vic Ciesielski 461

Using Design Information to Identify Structural Software Faults
Markus Stumptner 473

The Application of AI to Automatically Generated Animation
Adam Szarowicz, Juan Amiguet-Vercher, Peter Forte, Jonathon Briggs
Petros Gelepithis, Paolo Remagnino 487

Planning with Noisy Actions (Preliminary Report)
Michael Thielscher 495

Getting the Job Done in a Hostile Environment
Steven Versteeg, Alan Blair 507

Solving the Qualification Problem (In the Presence of the Frame Problem)
Quoc Bao Vo, Norman Y. Foo 519

Dialogue Modeling for a Conversational Agent
Peter Wallis, Helen Mitchard, Jyotsna Das, Damian O'Dea 532

Candidate Elimination Criteria for Lazy Bayesian Rules
Geoffrey I. Webb 545

Simplifying the Development of Intelligent Agents
Michael Winikoff, Lin Padgham, James Harland 557

An Operational Semantics for a PRS-like Agent Architecture
Wayne Wobcke 569

A Model for Unconstrained Digit Recognition Based on Hypothesis Testing and Data Reconstruction
Sungsoo Yoon, Yungcheol Byun, Gyeonghwan Kim, Yeongwoo Choi Yillbyung Lee 581

Collecting Quality Data for Database Mining
Chengqi Zhang, Shichao Zhang 593

Further Pruning for Efficient Association Rule Discovery
Songmao Zhang, Geoffrey I. Webb 605

Pattern Discovery in Probabilistic Databases
Shichao Zhang, Chengqi Zhang 619

The Complexity of Logic Program Updates
Yan Zhang 631

Reasoning with Multimedia Information Using Symbolic Projection
Zili Zhang, Chengqi Zhang 643

Invited Contribution

Confidence Relations as a Basis for Uncertainty Modeling, Plausible Reasoning, and Belief Revision
Didier Dubois 655

Author Index 665
