Papers

Dudeney Dissections of Polygons and Polyhedrons - A Survey -	1
<i>J. Akiyama and G. Nakamura</i>	
Universal Measuring Devices without Gradations.	31
<i>J. Akiyama, H. Fukuda, G. Nakamura, T. Sakai, J. Urrutia, and C. Zamora-Cura</i>	
A Note on the Purely Recursive Dissection for a Sequentially n -Divisible Square	41
<i>J. Akiyama, G. Nakamura, A. Nozaki, and K. Ozawa</i>	
Sequentially Divisible Dissections of Simple Polygons	53
<i>J. Akiyama, T. Sakai, and J. Urrutia</i>	
Packing Convex Polygons into Rectangular Boxes	67
<i>H. Alt and F. Hurtado</i>	
On the Number of Views of Polyhedral Scenes	81
<i>B. Aronov, H. Brönnimann, D. Halperin, and R. Schifffenbauer</i>	
Problems and Results Around the Erdős-Szekeres Convex Polygon Theorem	91
<i>I. Bárány and G. Károlyi</i>	
On Finding Maximum-Cardinality Symmetric Subsets	106
<i>P. Brass</i>	
Folding and Unfolding Linkages, Paper, and Polyhedra	113
<i>E.D. Demaine</i>	
On the Skeleton of the Metric Polytope	125
<i>A. Deza, K. Fukuda, D. Pasechnik, and M. Sato</i>	
Geometric Dissections That Swing and Twist	137
<i>G.N. Frederickson</i>	
On Convex Decompositions of Points	149
<i>K. Hosono, D. Rappaport, and M. Urabe</i>	
Volume Queries in Polyhedra	156
<i>J. Iacono and S. Langerman</i>	

Sum of Edge Lengths of a Graph Drawn on a Convex Polygon	160
<i>H. Ito, H. Uehara, and M. Yokoyama</i>	
On Double Bound Graphs with Respect to Graph Operations	167
<i>S. Iwai, K. Ogawa, and M. Tsuchiya</i>	
Generalized Balanced Partitions of Two Sets of Points in the Plane	176
<i>A. Kaneko and M. Kano</i>	
On Paths in a Complete Bipartite Geometric Graph	187
<i>A. Kaneko and M. Kano</i>	
Approximating Uniform Triangular Meshes for Spheres	192
<i>N. Katoh, H. Kojima, and R. Taniguchi</i>	
The Construction of Delaunay Diagrams by Lob Reduction	205
<i>P. Kauffmann and J.C. Spehner</i>	
Geometric Transformations in Plane Triangulations	217
<i>K. Kawarabayashi, A. Nakamoto, Y. Oda, and M. Watanabe</i>	
Separation Sensitive Kinetic Separation Structures for Convex Polygons ..	222
<i>D. Kirkpatrick and B. Speckmann</i>	
On Acute Triangulations of Quadrilaterals	237
<i>H. Maehara</i>	
Intersecting Red and Blue Line Segments in Optimal Time and Precision .	244
<i>A. Mantler and J. Snoeyink</i>	
Tight Error Bounds of Geometric Problems on Convex Objects with Imprecise Coordinates	252
<i>T. Nagai and N. Tokura</i>	
Triangle Contact Systems, Orthogonal Plane Partitions and their Hit Graphs 264	
<i>A. Nakamoto</i>	
Note on Diagonal Flips and Chromatic Numbers of Quadrangulations on Closed Surfaces	274
<i>A. Nakamoto and S. Negami</i>	
An Extension of Cauchy's Arm Lemma with Application to Curve Development	280
<i>J. O'Rourke</i>	
On the Complexity of the Union of Geometric Objects	292
<i>J. Pach</i>	

Structure Theorems for Systems of Segments	308
<i>J. Pach and J. Solymosi</i>	
3-dimensional Single Active Layer Routing	318
<i>A. Recski and D. Szeszlér</i>	
Nonregular Triangulations, View Graphs of Triangulations, and Linear Programming Duality	330
<i>F. Takeuchi</i>	
Efficient Algorithms for Searching a Polygonal Room with a Door	339
<i>X. Tan</i>	
A New Structure of Cylinder Packing	351
<i>Y. Teshima, Y. Watanabe, and T. Ogawa</i>	
Efficient Algorithms for the Minimum Diameter Bridge Problem	362
<i>T. Tokuyama</i>	
Illuminating Both Sides of Line Segments	370
<i>C.D. Tóth</i>	
Author Index	381

Discrete and Computational Geometry
Japanese Conference, JCDCG 2000, Tokyo, Japan,
November, 22-25, 2000. Revised Papers
Akiyama, J.; Kano, M.; Urabe, M. (Eds.)
2001, XII, 388 p., Softcover
ISBN: 978-3-540-42306-5
