

Table of Contents

Invited Paper

Analysis of Multithreaded Programs	1
<i>Martin Rinard</i>	

Program Transformation

Communication and Parallelism Introduction and Elimination in Imperative Concurrent Programs	20
<i>Miquel Bertran, Francesc Babot, August Climent, Miquel Nicolau</i>	
Using Slicing to Identify Duplication in Source Code	40
<i>Raghavan Komondoor, Susan Horwitz</i>	
Soft Scheduling for Hardware	57
<i>Richard Sharp, Alan Mycroft</i>	

Strictness and Termination

Effective Strictness Analysis with HORN Constraints	73
<i>Kevin Glynn, Peter J. Stuckey, Martin Sulzmann</i>	
Applying Static Analysis Techniques for Inferring Termination Conditions of Logic Programs	93
<i>Fred Mesnard, Ulrich Neumerkel</i>	
An Abstract Analysis of the Probabilistic Termination of Programs	111
<i>David Monniaux</i>	

Semantics Abstraction

Watchpoint Semantics: A Tool for Compositional and Focussed Static Analyses	127
<i>Fausto Spoto</i>	

Logic and Constraint Programming

Parameterizing a Groundness Analysis of Logic Programs	146
<i>Lunjin Lu</i>	
Finite-Tree Analysis for Constraint Logic-Based Languages	165
<i>Roberto Bagnara, Roberta Gori, Patricia M. Hill, Enea Zaffanella</i>	

Invited Paper

Applications of Extended Static Checking	185
<i>K. Rustan M. Leino</i>	

Data Structures

Cleanness Checking of String Manipulations in C Programs via Integer Analysis	194
<i>Nurit Dor, Michael Rodeh, Mooly Sagiv</i>	
Solving Regular Tree Grammar Based Constraints	213
<i>Yanhong A. Liu, Ning Li, Scott D. Stoller</i>	
Static Analyses of the Precision of Floating-Point Operations	234
<i>Eric Goubault</i>	

Pointer Analysis

Estimating the Impact of Scalable Pointer Analysis on Optimization.....	260
<i>Manuvir Das, Ben Liblit, Manuel Fähndrich, Jakob Rehof</i>	
Efficient Computation of Parameterized Pointer Information for Interprocedural Analyses	279
<i>Donglin Liang, Mary Jean Harrold</i>	

Model Checking

Parametric Optimization of Open Real-Time Systems	299
<i>Farn Wang, Hsu-Chun Yen</i>	
Embedding Chaos.....	319
<i>Natalia Sidorova, Martin Steffen</i>	

Abstract Model Checking

Analyzing Fair Parametric Extended Automata	335
<i>Ahmed Bouajjani, Aurore Collomb-Annichini, Yassine Lakhnech, Mihaela Sighireanu</i>	
Incompleteness, Counterexamples, and Refinements in Abstract Model-Checking	356
<i>Roberto Giacobazzi, Elisa Quintarelli</i>	

Invited Talk

Language-Based Security: What's Needed and Why (Abstract)	374
<i>Fred Schneider</i>	

Mobility

A Behavioral Module System for the Pi-Calculus	375
<i>Sriram K. Rajamani, Jakob Rehof</i>	
An Abstract Interpretation Framework for Analysing Mobile Ambients . . .	395
<i>Francesca Levi, Sergio Maffei</i>	
Abstract Interpretation-Based Static Analysis of Mobile Ambients	412
<i>Jérôme Feret</i>	

Invited Session on Security

Static Analysis and Software Assurance (Abstract)	431
<i>David Wagner</i>	
A Type and Effect Analysis of Security Protocols (Abstract)	432
<i>Andrew D. Gordon, Alan Jeffrey</i>	
Abstracting Cryptographic Protocols by Prolog Rules (Abstract)	433
<i>Bruno Blanchet</i>	
Security-Typed Languages and Distributed Computation (Abstract)	437
<i>Andrew Myers</i>	
Author Index	439

Static Analysis

8th International Symposium, SAS 2001, Paris, France,

July 16-18, 2001. Proceedings

Cousot, P. (Ed.)

2001, XI, 439 p., Softcover

ISBN: 978-3-540-42314-0
