

Index

- K -Borel set, 106
- Šilov boundary, 30

- Baire function, 88
 - set, 17
 - space, 108
- Barycenter, 1
- Base (of a cone), 51
- Bauer, 66
- Bauer simplex, 66
- Bauer's maximum principle, 111
- Bauer's theorem, 6
- Bernstein's theorem, 9
- Bishop's approximation theorem, 106
- Bishop-de Leeuw peak point theorem, 39
- Bishop-de Leeuw representation theorem, 22
- Bochner's theorem, 103
- Boundary, 29
 - Šilov boundary, 30
 - Choquet boundary, 30

- Cap, 80
- Carathéodory's theorem, 7
- Cartier-Fell-Meyer theorem, 97
- Choquet boundary, 29
- Choquet's theorem (metrizable case), 14
- Choquet's uniqueness theorem, 60
- Choquet-Bishop-de Leeuw theorem, 17
- Choquet-Meyer uniqueness theorem, 56
- Completely monotonic function, 9

- Concave function, 13
- Convex function, 13

- Decomposition lemma (for lattices), 53
- Dilation, 93
- Discrete measure, 57
- Disintegration of measures, 96

- Edwards' separation theorem, 111
- Ergodic measure, 73
- Extreme ray, 79, 107

- face, 110
- Function
 - affine, 13
 - completely monotonic, 9
 - concave, 13
 - convex, 13
 - first Baire class, 88
 - oscillation of, 89
 - positive definite, 103
 - second Baire class, 91
 - upper envelope of, 13
 - upper semicontinuous, 13
- Function algebra, 32, 39

- Hardy-Littlewood, et al theorem, 94
- Haydon's theorem, 26
- Hereditary subcone, 55
- Herglotz's theorem, 103
- Homothetic image, 109

- Invariant measure, 73

- Klee's theorems, 107

- Korovkin's theorem, 47
- Krein-Milman theorem, 2
- Lattice, 52
- Least upper bound (in a lattice), 52
- Markov operator, 35
- Maximal measure, 18
- Mazur's theorem, 43
- Measure
 - discrete, 57
 - ergodic, 73
 - invariant, 73
 - maximal, 18
 - representing, 1
- Milman's theorem, 6
- Minkowski's theorem, 1, 7
- Mokobodski's example, 60
- Mokobodzki's theorem, 55
- Oscillation of a function, 89
- Peak points, 39
- Potential theory, 102
- Poulsen simplex, 108
- Radon-Nikodým property, 112
- Rainwater's theorem, 25
- Ray (of a cone), 79
- Representing measure, 1
- Resolvent, 35
- Resultant, 1
- Riesz representation theorem, 2, 28
- RNP, 112
- Simplex, 7
 - Bauer simplex, 66
 - Poulsen simplex, 108
- Simplexoid, 112
- Smooth point, 43
- State space, 27
- Subdivision (of a measure), 97
- Support of a measure, 2
- Uniform algebra, 39
- Universal cap, 80
- Upper envelope, 13
- Upper semicontinuous function, 13
