

I/16A: Low Energy Neutron Physics

Contents

- | | | |
|-----------|---|------------|
| 1 | Introduction | see Part 1 |
| 2 | The neutron as an elementary particle | see Part 1 |
| 3 | Neutron-matter interactions | see Part 1 |
| 4 | Neutron sources and spectrometers | see Part 1 |
| 5 | Neutron detectors | see Part 1 |
| 6 | Neutron scattering lengths | see Part 1 |
| 7 | Neutron induced reactions | see Part 1 |
| 8 | Thermal cross sections and resonance integrals | see Part 1 |
| 9 | Nuclear fission by neutrons | see Part 1 |
| 10 | Neutron reactions followed by charged particles
(Proton- and α-decay of the compound states) | see Part 1 |
| 11 | Average neutron resonance parameters
(A.V. IGNATYUK) | |
| 12 | Radiative capture cross sections for fast neutrons
(T.S. BELANOVA, A.V. IGNATYUK, A.B. PASHCHENKO, V.I. PLYASKIN) | |
| 13 | Neutron induced threshold reactions
(V.N. MANOKHIN, A.I. BLOKHIN) | |

Low Energy Neutrons and their Interaction with Nuclei
and Matter 2

2001, VII, 407 p. 714 illus. With CD-ROM., Hardcover

ISBN: 978-3-540-63266-5
