Historical Perspectives	1
<i>Hugo Fechtig, Christoph Leinert, Otto E. Berg</i>	
I. Introductory Overview	1
II. Early Reports on the Zodiacal Light	2
III. Zodiacal Light Observations Until the Beginning of the Space Age	10
IV. After the Beginning of the Space Age	17
IV.A. Rise and Fall of the Earth's Dust Belt	17
IV.B. Zodiacal Light Studied from Near-Earth Space	26
V. Microcraters on Lunar Surface Samples and the Lunar Ejecta and Micrometeorite Experiment	30
VI. Experiments on Satellites and Space Probes	36
VII. Important Results of the Dust Experiments PIA/PUMA and DIDSY on the Missions GIOTTO and VeGa to Comet Halley .	43
VIII. Outlook	45
References	47
Optical and Thermal Properties of Interplanetary Dust	57
<i>Anny-Chantal Levasseur-Regourd, Ingrid Mann, René Dumont, Martha S. Hanner</i>	
I. Zodiacal Scattered Light	57
I.A. Historical Survey	58
I.B. Zodiacal Light Measurements	59
I.C. Main Trends in the Data	60
I.D. Zodiacal Brightness from 1 AU	63
I.E. Zodiacal Polarisation from 1 AU	66
II. F-Corona Scattered Light	67
II.A. Solar Corona Observations	67
II.B. Brightness and Polarisation of the F-Corona	69
III. Zodiacal and F-Coronal Thermal Emission	72
III.A. Thermal Emission Measurements	72
III.B. Zodiacal Thermal Emission from 1 AU	73
III.C. Thermal Emission from the F-Corona	74
IV. Local Scattering and Thermal Properties	76

IV.A. Need for Inversion	76
IV.B. Volume Scattering and Emitting Functions	77
IV.C. Inversion with Homogeneity Assumption	79
IV.D. Local Rigorous Inversion	79
IV.E. Local Inversion Through Mathematical Methods	80
IV.F Models of the Near Infrared F-Corona	85
V. Conclusions and Perspectives	86
References	88
Cometary Dust	95
<i>Zdenek Sekanina, Martha S. Hanner,</i>	
<i>Elmar K. Jessberger, Marina N. Fomenkova</i>	
I. Introduction	95
II. Dust Dynamical Properties	96
II.A. Ejection and Motion of Dust Grains	96
II.B. Dust Features in Cometary Heads	101
II.C. Dust Tails and Their Structure	108
II.D. Dust in Periodic Comet Shoemaker-Levy 9	115
III. Dust Optical and Physical Properties	120
III.A. Thermal Emission	120
III.B. Silicates	127
III.C. Infrared Spectral Features of Hydrocarbons	130
III.D. Scattering by Dust	132
III.E. Icy Grains	136
IV. Dust Chemical and Isotopic Composition	137
IV.A. Facts from Ion Spectra	138
IV.B. Bulk Composition	143
IV.C. Mineralogical Composition	144
V. The Future	145
References	147
Near Earth Environment	163
