1 The Cardiovascular Continuum – Pathophysiology and Targets for Therapy	
T. UNGER	1
2 Anti-Adrenergic Therapy in Hypertensive Patients with Concomitant Disease	
W.T. ABRAHAM	16
3 The Effects of β-Blockade on the Cardiovascular System – Not All β-Blockers are Created Equal	
F.H. MESSERLI AND E. GROSSMAN	29
4 The Role of Multiple Adrenergic Blockade in Coronary Artery Disease and Myocardial Infarction	
A. LAHIRI	39
5 Epidemiology and Problems with Diagnosis of Heart Failure	
J.G.F. CLELAND	54
6 The Future of the Diagnosis of Left Ventricular Dysfunction and Heart Failure	
H.J. DARGIE	69
7 Are All β-Blockers the Same for Heart Failure? Insights from Clinical Trials and Future Research Directions	
M.B. FOWLER	80
8 The Therapeutic Role of β-Adrenoceptor-Blocking Agents in Severe Heart Failure	
H. KRUM	96
9 Tolerability of Anti-Adrenergic Treatment of Congestive Heart Failure in Daily Practice	
H. KRUM	107
10 Adrenergic Blockade in Heart Failure – Official Guidelines and Practical Recommendations on Optimal Use	
L.E. RYDÉN	117
11 The Future of Heart Failure Management	
J.G.F. CLELAND	131
Subject Index	145

Prevention of Disease Progression Throughout the
Cardiovascular Continuum

The Role of Adrenergic β -blockade
