

Contents

Part I Invited Lectures

Progress in Unstructured-Grid CFD

Kazuhiro Nakahashi 3

Gas-Kinetic Schemes for Fluid Simulations

Kun Xu 14

Defect and Adjoint Error Correction

Michael B. Giles 28

A Vertex-Centroid (V-C) Scheme for the Gas-Dynamics Equations

Antony Jameson, John C. Vassberg 37

Part II Adaptive Mesh

A Solution-Adaptive Technique Using Unstructured Hexahedral Grids

M. Sun, K. Takayama 55

Local Mesh Refinement in the Space-Time CE/SE Method

S.C. Chang, Y.H. Wu, X.Y. Wang, V. Yang 61

3-D Grid Adaptation Using a Sensor

Based on Directed Divergence between Maxwellians

Raghavendra N.V., Mohan Varma, Biju Uthup, Deshpande S. M. 67

Anisotropic Cartesian Grid Adaptation

Paulus R. Lahur, Yoshiaki Nakamura 73

Part III Unstructured Grid

Directional Refinement for Viscous Flows Using Adaptive Unstructured Quadrilaterals

Kazuyuki Yada, Mingyu Sun, Kazuyoshi Takayama 81

All Hexahedra Unstructured Mesh Adaptative Solver for Turbulent Flow Simulations

Benoit Leonard, Alpesh Patel, Michel Delanaye, Charles Hirsch 87

A Class of Matrix-Free Implicit Methods for Compressible Flows on Unstructured Grids

Hong Luo, Dmitri Sharov, Joseph D. Baum, Rainald Löhner 93

Large-Scale Parallel Unstructured Mesh Computations Using a Multigrid Approach

Dimitri. J. Mavriplis 99

An Adaptive Unstructured Explicit/Implicit Numerical Technique for Unsteady Viscous Flows with Shock Waves

E.V. Timofeev, P.A. Voinovich, K. Takayama, Yu.P. Golovachov 105

Part IV Mesh Generation

A Three-Dimensional Hybrid Grid: DRAGON Grid

Meng-Sing Liou, Yao Zheng 113

Grids and Solutions from Residual Minimisation

Hiroaki Nishikawa, Mani Rad, Philip Roe 119

Part V Compressible Flows

Calculations of Low-Mach-Number Viscous Flows without Preconditioning by the Space-Time CE/SE Method

Z.-C. Zhang, S.T. John Yu, S.-C. Chang, P.C.E. Jorgenson 127

Time-Marching Method for Complicated Compressible Flow Equations with Source Term

Satoru Yamamoto 133

Numerical Prediction of Shear Flows by Upwind Methods

Maurizio Pandolfi, Domenic D'Ambrosio 139

Numerical Modeling of Discontinuous Gas Dynamic and MHD Astrophysical Flows

Nikolai V. Pogorelov 145

A Computational Study of the Wake Structure of a Plunging Airfoil

J. Young, J.C.S. Lai 151

Numerical Study of Transonic Shock/Boundary Layer Interactions on an Oscillating Airfoil Using a Third-Order Scheme and Nonlinear Turbulence Models <i>Paola Cinnella</i>	157
Numerical Study on Oscillation Modes of Supersonic Multijets <i>Nobuyoshi Fujimatsu, Kojiro Suzuki</i>	163

Part VI Hypersonic and Reactive Flows

Computation of Görtler Vortices in Separated Hypersonic Flows <i>Heinrich Lüdeke</i>	171
Numerical Simulations of Shock/Vortex Interaction in Non-Circular Jets <i>Zonglin Jiang, Kazuyoshi Takayama</i>	177
Nonequilibrium Effects on Shock Wave/Bounday Layer Interaction in High Enthalpy Flow <i>Akira Matsumoto, Shigeru Aso</i>	183
Numerical Investigation on the Transition between Regular and Mach Reflections in Shock Waves <i>Domenic D'Ambrosio, Maurizio Pandolfi</i>	189
Numerical Study on Flame Propagation along a Vortex Tube <i>Tatsuya Hasegawa, Shinnosuke Nishiki, Ryosuke Nakamichi</i>	195
The Numerical Analysis of Cellular Premixed Flames Based on the Diffusive-Thermal and Navier-Stokes Equations <i>Satoshi Kadowaki, Shin-ichirow Goma</i>	201
Space-Time Method for Chemically Reacting Flows with Detailed Kinetics <i>Yuhui Wu, Vigor Yang, Sin-Chung Chang</i>	207
Condensed Burning Simulation in a Tube with Heated Wall Using Splitting and Pade Approximations <i>Andrei A. Markov</i>	213

Part VII Unsteady Flows

A Visualization Technique to Identify the Flow Mechanism of Complicated Unsteady Flows <i>Susumu Teramoto, Kozo Fujii</i>	221
---	-----

Unsteady Three-Dimension Flow in Curved Distensible Tubes <i>Matthew Nelsenador, Angela Cheer, Harry Dwyer, Thomas Rutaganira</i> ...	227
---	-----

Unsteady and Three-Dimensional Flow Simulations in the Human Aorta <i>Nader Shahcheraghi, Harry A. Dwyer, Angela Y. Cheer, Thomas Rutaganira, Abdul Barakat</i>	233
---	-----

Numerical Simulation of Unsteady Internal Flows Using Dual Time Stepping Method <i>Olivier Rouzaud, Sylvie Plot</i>	239
---	-----

Part VIII Incompressible Flows

High-Reynolds Number Solutions of Incompressible Navier-Stokes Equations using Vectorial Operator Splitting <i>Rossitza Marinova, Christo Christov, Tchavdar Marinov</i>	247
--	-----

Numerical Simulation of Incompressible Laminar Flow over Three-Dimensional Cavity <i>H Yao, R K Cooper, S R Raghunathan</i>	253
---	-----

Numerical Study on Aerodynamic Mechanism of Hovering Flight of Dragonfly <i>Koji Isogai, Yasuhisa Shinmoto</i>	259
--	-----

Multigrid Solutions for the Three-Dimensional Incompressible Navier-Stokes Equations in Artificial Compressibility Formulation <i>Li Yuan</i>	265
---	-----

Direct 3D Simulation for Falling Leaves <i>Takayuki Aoki</i>	271
--	-----

Part IX Stability of Boundary Layer

Multigrid Methods for Thin Liquid Film Spreading Flows <i>Neil Daniels, Pascal Ehret, Philip H. Gaskell, Harvey M. Thompson, Michel Decré</i>	279
---	-----

Instabilities of Dynamic Thermo- and Solutocapillary Liquid Layers <i>Gunar Schmidt, Hendrik C. Kuhlmann, Hans J. Rath</i>	285
--	-----

Part X Flows with Free Surface

**Numerical Approach to Free Surface Generation
Using Cut Cell Method**
Kouichi Sakurai, Takayuki Aoki 293

**Numerical Simulations of Curtain Coating
with a Moving Contact Line**
*M.C.T. Wilson, J.L. Summers, P.H. Gaskell, Y.D. Shikhmurzaev,
T.D. Blake, A. Clarke* 299

Numerical Solution of Steady Free-Surface Navier-Stokes Flow
E.H. van Brummelen, H.C. Raven, B. Koren 305

Part XI Numerical Techniques

A Navier-Stokes Solver Using Edge-Based Smoothing
J.J. Liu, T.P. Hynes 313

**Iterative Space-Marching Method
for Incompressible and Compressible Full Navier-Stokes Equa-
tions**
Leonid I. Skurin 319

**Effective Accuracy and Conservation Consistency
of Gridless Type Solver**
Koji Morinishi 325

**An Artificial Boundary Condition for Subsonic Flows
Governed by Compressible Navier-Stokes Equations**
Charles-Henri Bruneau, Emmanuel Creusé 331

**An Efficient Numerical Algorithm
for the Tree-data Based Flow Solver**
Takanobu Ogawa 337

**Imposing Boundary Conditions with the Injection, the Projec-
tion
and the Simultaneous Approximation Term Methods**
Ken Mattsson 343

**DNS of the Incompressible Flows around a Sphere
Using Cartesian Grid Approach with Virtual Boundary Method**
Hidetoshi Nishida, Katsunori Horii, Nobuyuki Satofuka 349

**Artificial Wind - a New Framework to Construct Simple
and Efficient Upwind Shock-Capturing Schemes
for Complex Hydrodynamic Problems**
I.V. Sokolov, E.V. Timofeev, J. Sakai, K. Takayama 355

Entropy Splitting for High Order Numerical Simulation of Compressible Turbulence <i>N.D. Sandham, H.C. Yee</i>	361
An Implicit Fluctuation Splitting Scheme for Compressible Flows <i>A. Bonfiglioli, P. De Palma, G. Pascazio, M. Napolitano</i>	367
A Compact Residual-Based Scheme for Solving the Compressible Euler and Navier-Stokes Equations <i>Christophe Corre, Alain Lerat</i>	373
Some Properties of Residual Distribution Schemes for the Euler Equations <i>Mani Rad, Hiroaki Nishikawa, Philip L. Roe</i>	379
<hr/>	
Part XII Domain Decomposition and Parallel Algorithms	
<hr/>	
Time-Accurate Implicit ALE Algorithm for Shared-Memory Parallel Computers <i>Dmitri Sharov, Hong Luo, Joseph D. Baum, Rainald Löhner</i>	387
Detailed Computations of Laminar Reactive Flows Using Multigrid Methods on Parallel Computers <i>Sébastien Pazon, Dominique Thévenin, Achim Gordner, Romain Baron, Peter Bastian</i>	393
Massively Parallel Computing with Coupled Algorithm for Introduction of Large-Eddy Simulation <i>Chuichi Arakawa, Kenji Saito, Kenjiro Shimano</i>	399
Numerical Simulation of Vacuum Plume Using Coupled-Parallel Computation <i>Cai Guobiao, Zhuang Fenggan</i>	405
Large-Scale Parallel Simulations in Computational Electromagnetics <i>Vijaya Shankar, Adour Kabakian, Chris Rowell, Touraj Sahely</i>	411
Simulation of Turbomachinery Flows by a Parallel Solver with Sub-iteration Recoupling <i>Vittorio Michelassi, Paolo Giangiacomo</i>	417
Parallel CE/SE Computations via Domain Decomposition <i>Ananda Himansu, Philip C.E. Jorgenson, Xiao-Yen Wang, Sin-Chung Chang</i>	423

Domain Decomposition Method and Fast Diagonalization Solver for Spectral Element Simulations

Dirk Wilhelm, Leonhard Kleiser 429

Part XIII Transition and Turbulence

Simulation of a Wake-Blade Interaction in Moving Grids

M. Opiela, M. Meinke, W. Schröder 437

Large Eddy Simulation Analysis of Lobed Mixer Nozzle

Yoshinori Ooba, Hidekazu Kodama, Yoshiya Nakamura, Tsutomu Ooishi, Makoto Yamamoto, Chuichi Arakawa, Osamu Nozaki, Kazuo Kikuchi, Toshio Nishizawa, Yuichi Matsuo 443

Numerical Simulation of Transitional Turbomachinery Flows

P. De Palma 449

Numerical Modeling of Internal Waves Generated by Turbulent Wakes behind Self-Propelled and Towed Bodies in Stratified Media

G.G. Chernykh, N.P. Moshkin, O.F. Voropayeva 455

LES Using a Parallel Multidimensional Upwind Solver

D. Caraeni, L. Fuchs 461

Large Eddy Simulation by Lagrangian Block Method

Wihel Altai, Vincent H. Chu 467

Proper Orthogonal Decomposition of Turbulent Channel Flow

Giancarlo Alfonsi, Leonardo Primavera, Giuseppe Passoni, Carlo Restano 473

A Finite Volume Formulation for Compact Schemes on Arbitrary Meshes with Applications to LES

Chris Lacor, Sergey Smirnov, Martine Baelmans 479

A 3D Turbulent Boundary Layer Test for LES Models

Antonella Abbà, Carlo Cercignani, Gianluca Picarella, Lorenzo Valdetaro 485

Part XIV Lattice Boltzmann Method

Numerical Analysis of the Pressure Drop in Porous Media Flow Using the Lattice Boltzmann Computational Technique

Jörg Bernsdorf, Gunther Brenner, Thomas Zeiser, Peter Lammers, Franz Durst 493

Lattice Boltzmann Simulations of Drop Deformation and Breakup in a Simple Shear Flow <i>Takaji Inamuro, Takayuki Miyahara, Fumimaru Ogino</i>	499
Comparison between Volume of Fluid Method and Lattice Boltzmann Method for Numerical Simulation of Droplet <i>Taro Imamura, Kojiro Suzuki</i>	505
Lattice Boltzmann Simulation of Magnetohydrodynamic Flows <i>Ramesh K. Agarwal</i>	511
Convergence Acceleration in Lattice Boltzmann Method <i>Nobuyuki Satofuka, Mitsuru Ishikura</i>	517
Flow Prediction by Lattice-Boltzmann Methods <i>Olga Filippova, Dieter Hänel</i>	523
Numerical Simulation of Fluid Motions in a Rotating Field by the Lattice Boltzmann Method <i>Michihisa Tsutahara, Masaaki Okabayashi, Takeshi Kataoka</i>	529
<hr/> Part XV Aeroacoustics <hr/>	
DNS of Sound Generated by Cylinder Wakes <i>Nozomu Hatakeyama, Hiroyuki Hosoya, Osamu Inoue</i>	537
Numerical Simulation of Aeroacoustic Field in a 2D Cascade Involving a Downstream Moving Grid Using the Space-Time CE/SE Method <i>X.Y. Wang, S.C. Chang, P. Jorgenson</i>	543
An Accurate Method for Computing Propagation of Sound Waves in Non-Uniform Moving Fluid <i>Igor Men'shov, Yoshiaki Nakamura</i>	549
Computation of Feedback Aeroacoustic System by the CE/SE Method <i>Ching Y. Loh, Xiao Y. Wang, Sin-Chung Chang, Philip C.E. Jorgenson</i> ..	555
Numerical Studies of the Separated Flow around a 2-D Airfoil at Moderate Angle of Attack by Acoustic Excitation <i>Satoshi Suzuki, Katsuya Ishii</i>	561

Part XVI Adjoint Method

Quality and Level of the Airfoil Shapes Obtained by Using Genetic Algorithms and Evolutional Strategies - Meso-evolution Certified by the Degeneracy Structure Method	
<i>Ken Naitoh, Egon Krause, Guido Dietz, Kunio Kuwahara</i>	569
Application of the Adjoint Method to the Localization of Sources of Thermocapillary Instabilities	
<i>O. Bouizi, E. Chénier, C. Delcarte</i>	575
Aerodynamic Optimization of Supersonic Transport Wing Using Unstructured Adjoint Method	
<i>Hyoung-Jin Kim, Daisuke Sasaki, Shigeru Obayashi, Kazuhiro Nakahashi</i>	581

Part XVII Vortex Method

Three-Dimensional Vortex Method for Near-Wall Boundary-Layer Flow Structure	
<i>Zinedine Khafir, Peter W. Carpenter</i>	589
Vortex Breakdown in Confined Swirling Flow: Numerical Simulation and PIV Measurement	
<i>Ying Zheng Liu, Han Ping Chen, Hide S. Koyama</i>	595
Fluid-Structure Interaction under the Vortex Lock-in Regime	
<i>Jun-Ho Hong, Norio Arai</i>	601
Computation of Active Control of Flow past a Circular Cylinder	
<i>K. Srinivas</i>	607
Numerical Investigations of Vortex-Shedding Flowmeters	
<i>Ernst von Lavante, Stephan Perpét</i>	613

Part XVIII Two-phase Flows

Flux Schemes for the Numerical Simulation of Two Phase Flows	
<i>A. Kumbaro, I. Toumi, V. Seignole</i>	621
High Resolution KFVS Methods for Multi-Fluid Dynamics	
<i>Hua-Mo Wu, Hua-Zhong Tang</i>	627
Numerical Simulation of Two-Phase Flows with Stiff Source Terms	
<i>H. Städtke, G. Franchello, B. Worth</i>	633

Numerical Simulation on the Propagation of an Internal Wave in Multifluid	
<i>Hideyuki Oka, Tetuya Kawamura, Katsuya Ishii</i>	639
Conservative Interface-Capturing Approaches for Multi-component Flows	
<i>Yang-Yao Niu</i>	645
Numerical Analysis of Cavitating Flow through a 2-D Decelerating Cascade	
<i>Byeong Rog Shin, Yuka Iga, Toshiaki Ikohagi</i>	651
<hr/>	
Part XIX Fluid Structure Interaction	
<hr/>	
A Coupled CFD/CSD Methodology for Simulating Structural Response to Airblast and Fragment	
<i>Joseph D. Baum, Hong Luo, Eric L. Mestreau, Rainald Löhner, Daniele Pelessone, Charles Charman</i>	659
KFMG based Euler Formulation for Computational Aeroelasticity	
<i>R. Krishnamurthy, B.S. Sarma, S.M. Deshpande</i>	665
A Unified Wall Boundary Treatment for Viscous and Inviscid Flows in the CE/SE Method	
<i>S.-C. Chang, Z.-C. Zhang, S.T. John Yu, P.C.E. Jorgenson</i>	671
<hr/>	
Part XX Optimization and Design	
<hr/>	
An Improved Aerodynamic Inverse Design Method for Complex SST Configuration Combined with 3D NS Solver	
<i>Kisa Matsushima, Tshiyuki Iwamiya</i>	679
Non-Generational Multiobjective Evolution Strategy for Aerofoil Design and Optimisation Problems in CFD	
<i>E.J. Whitney, K. Srinivas</i>	685
CFD Design Study for Modified HOPE-X Aerodynamic Characteristics	
<i>Yukimitsu Yamamoto</i>	691
Transonic Airfoil Optimization Using a Gradient Method	
<i>Yasuyoshi Horibata</i>	697

Part XXI Moving Boundaries

A Moving-Mesh Finite-Volume Scheme for Compressible Flows <i>Kenichi Matsuno, Kiyotaka Mihara, Nobuyuki Satofuka</i>	705
A Moving Grid Algorithm Based on the Deformation Method <i>Zhong Lei, Guojun Liao, Gary C. de la Pena</i>	711
A Method for Computing Flows about Complex Configurations with Moving Boundaries <i>Yoko Takakura</i>	717
Development of a New Higher Order Kinetic Boundary Condition and a New Algorithm for Moving Grid Using q-LSKUM <i>P. Chandra Sekhar, A.K. Ghosh, S.M. Deshpande</i>	723

Part XXII Level Set / VOF

Numerical Simulation of Droplet and Bubble Flows Using Fast Level Set Method <i>Ruquan Liang, Nobuyuki Satofuka</i>	731
A Front Tracking Concept on Arbitrary Grids <i>F. Bet, D. Hänel, O. Gloth, L. Tran, R. Vilsmeier</i>	737
Three Dimensional Computer Simulation of Mould Filling with N Fluids by VOF PLIC and Projection Methods <i>Jérôme Breil, Jean Paul Caltagirone</i>	743
Theoretical Aspects of Composite Grid Methods in Computational Fluid Dynamics <i>Zi-Niu Wu</i>	749

Part XXIII Technical Notes

Numerical Simulation of Particle Motion in Steady Inspiratory Airflow <i>Tony W.H. Sheu, S.K. Wang, S.F. Tsai</i>	757
Extension of Zonal, Spectral Solutions for the Compressible Boundary Layer to the Navier-Stokes Equations <i>Adriana Nastase</i>	759
Analysis and Minimization of Flow Noise in a Centrifugal Pump <i>M.A. Langthjem, N. Olhoff</i>	761

The Instability of Natural Convection Boundary Layer around a Vertical Heated Flat Plate <i>Fenggan Zhuang, Jianjun Tao</i>	763
Semi-implicit and Implicit Solutions of Pulsatile Flow in the Axisymmetric Tube Using a Staggered Grid <i>Pavel Burda, Josef Kořenář</i>	765
Application of the CIP Method to the Simulation of the Laser-Matter Interaction <i>Takayuki Utsumi, Akira Sasaki, Tomoaki Kunugi, Sadao Fujii, Mikio Akamatsu</i>	767
Numerical Analysis of Transport Properties in Turbulent Premixed Flames <i>Shinnosuke Nishiki, Tatsuya Hasegawa, Ryutaro Himeno</i>	769
Lagrangian Block Method <i>Vincent H. Chu, Wihel Altai</i>	771
Grid Generation Based on Harmonic Maps <i>Reijo Lehtimäki</i>	773
Global Stability Analysis of Two-Dimensional Incompressible Flows around an Elliptic Cylinder at Various Incidences <i>Asei Tezuka, Kojiro Suzuki</i>	775
Fundamental Study on Propagation of Blade-Vortex Interaction Noise by CFD/FW-H Method <i>Takashi Aoyama, Shigeru Saito</i>	777
Turbulence Modelling of Strongly Swirling Flows <i>L.K. Yeh, C.A. Lin</i>	779
Cytofluid Dynamic Theory for Calculating Two-phase Flows and Bio-chemical Reactions <i>Ken Naitoh</i>	781
Euler Computations on Arbitrary Grids Using LSKUM <i>Ramesh V., Deshpande S.M.</i>	783
Numerical and Analytical Investigation of the Large Scale Flow due to an "Energy Tower" <i>Moshe Isareli, Noa Porrat, Irad Yavneh</i>	785
Numerical Simulation of Axisymmetric Super- and Hypersonic Separated Flows in Vicinity of Cylinder-Flare Configuration <i>Igor A. Bedarev, Nataliya N. Fedorova</i>	787

Computational Experiment of a Complex Dusted Plasma Flow <i>Takehiko Sato, Hideya Nishiyama</i>	789
Numerical Study of the Flow around Savonius Rotors under its Operation <i>Kazuko Miyashita, Tetuya Kawamura</i>	791
Wake Structure around a Decelerated Cylinder <i>Nobu. Nishikawa, T. Shimizu, H. Maeda, F. Mikami</i>	793
Numerical Solution of 3D Flow Fields Utilized for Problems of Flow Through Transonic Stages <i>Jiří Dobeš, Jaroslav Fořt, Jiří Fürst, Jan Halama, Karel Kozel</i>	795
On a Generalised Finite Difference Framework and its Order of Accuracy <i>N. Balakrishnan, Sridar D.</i>	797
Numerical Simulation of Multi-Dimensional Structure and Mach Reflection of Gaseous Detonation Waves <i>Deliang Zhang, Wei Xie, Changmin Guo</i>	799
Robust Feedback Controllers for a Backward Facing Step Flow <i>Günter Bärwolff, Maiko Garwon, Rudibert King</i>	801
DNS of the Free-Surface Turbulent Flow with Constant Temperature at the Surface <i>Y. Yamamoto, T. Kunugi, A. Serizawa</i>	803
Finite Spectral Method for Non-Periodic Problems <i>Jian-Ping Wang</i>	805
Index	807

Computational Fluid Dynamics 2000

Proceedings of the First International Conference on
Computational Fluid Dynamics, ICCFD, Kyoto, Japan,

10-14 July 2000

Satofuka, N. (Ed.)

2001, XXI, 810 p. In 2 volumes, not available
separately., Hardcover

ISBN: 978-3-540-41459-9
