

Contents

Part I Introduction

Starbursts Near and Far: An Overview

George H. Rieke 3

Part II The Initial Mass Function

The Initial Mass Function in the Galactic Center

Donald F. Figer 13

The IMF of Starbursts Near and Far

Jorge Melnick 19

Evidence in Favour of IMF Variations

Frank Eisenhauer 24

Evidence Supporting the Universality of the IMF

Gerry Gilmore 34

The Stellar Content

of Obscured Galactic Giant HII Regions

Robert D. Blum, Peter S. Conti, and Augusto Damineli 45

Part III Star Formation in Different Environments

Star Formation in the Galactic Center and Nearby Nuclei

Mark Morris 53

Star Formation in Galactic Disks

Giuseppe Gavazzi 63

Nearby Dusty Starbursts

George H. Rieke 73

Starbursts, Dark Matter and Dwarf Galaxy Evolution

Gerhardt R. Meurer 81

VIII Contents

The Starburst-AGN Connection <i>Sylvain Veilleux</i>	88
Finding Signatures of the Youngest Starbursts <i>Henry A. Kobulnicky and Kelsey E. Johnson</i>	95
The BIGGEST Starbursts at the HIGHEST Redshifts <i>Wil van Breugel, Michiel Reuland, Carlos De Breuck, and Huub Röttgering</i>	101
Star Clusters in Merging Galaxies <i>Bradley C. Whitmore</i>	106
Spectroscopy of Compact Star Clusters in NGC 4038/4039 <i>Sabine Mengel, Matthew D. Lehnert, Niranjan Thatte, and Reinhard Genzel</i>	116
Near-IR Spectroscopy and Population Synthesis of Super Star Clusters in NGC 1569 <i>Andrea M. Gilbert, James R. Graham</i>	123
The Obscured Mid-Infrared Continuum of NGC 4418: A Dust- and Ice-Enshrouded AGN <i>Henrik Spoon, Jacqueline Keane, Xander Tielens, Dieter Lutz, and Alan Moorwood</i>	129
Modeling Starbursts in Interacting Galaxies <i>Chris Mihos</i>	136
Evidence for Large Stellar Disks in Elliptical Galaxies <i>Andreas Burkert and Thorsten Naab</i>	147
Starbursts in Ultraluminous Infrared Galaxies – Fueling and Properties <i>Paul P. van der Werf</i>	151
The Stellar Populations of Nearby Radiogalaxies <i>Itziar Aretxaga, Elena Terlevich, Roberto J. Terlevich, Garret Cotter, and Angeles I. Díaz</i>	157
Part IV Star Formation and the ISM	
Starbursting in Spiral Arms and ULIRGs <i>Nick Scoville and Maria Polletta</i>	165
Extreme Starbursts and Molecular Clouds in Galaxies <i>Philip M. Solomon</i>	173

Starbursts: Triggers and Evolution <i>Shardha Jogee</i>	182
The Genesis of Super Star Clusters as Self-Gravitating HII Regions <i>Jonathan C. Tan and Christopher F. McKee</i>	188
Part V Global Properties	
Stellar Features in Integrated Starburst Spectra as Stellar Population Diagnostics <i>Daniel Schaerer</i>	197
The Stellar Population of Nearby Starbursts <i>Rosa M. González Delgado and Claus Leitherer</i>	206
Star Formation Histories of Starbursts <i>Natascha M. Förster Schreiber, Michele D. Thornley, Dieter Lutz, Reinhard Genzel, Henrik W.W. Spoon, Amiel Sternberg, and Dietmar Kunze</i>	212
Chemical Evolution and Starbursts <i>Uta Fritze-von Alvensleben</i>	218
Chemical Abundances and Evolution in Nearby Starbursts <i>Michael A. Dopita, Lisa J. Kewley, Ralph S. Sutherland, and Charlene A. Heisler</i>	225
Can We Date Starbursts? <i>Ariane Lançon</i>	231
Investigating ULIRGs in the Near-Infrared: Imaging and Spectroscopy <i>Ric Davies, Amanda Burston, and Martin Ward</i>	237
Post-Starburst Populations Near and Far – The Potential of Near-IR Spectroscopy <i>Ariane Lançon and Mustapha Mouhcine</i>	243
Optical Spectra of Dusty Starbursts <i>Bianca M. Poggianti</i>	249
The Nature of ISOCAM Galaxies in the Hubble Deep Field South <i>Dimitra Rigopoulou, Alberto Franceschini, and Reinhard Genzel</i>	255
Hard X-rays from Starburst Galaxies Near and Far <i>Edward C. Moran</i>	261

Distribution of Star Formation Between Starbursts and Normal Galaxies <i>Rodger I. Thompson</i>	267
How to Correct for Dust Absorption in Starbursts <i>Gerhardt R. Meurer and Mark Seibert</i>	272
HST Ultraviolet Spectra of Nearby Starbursts: Benchmarks for High Redshift Galaxies <i>Christy Tremonti, Claus Leitherer, Daniela Calzetti, and Tim Heckman</i> . . .	278
Part VI Cosmic Star Formation History	
Deep NICMOS/HST and Radio 1.4 GHz Observations of Galaxies at High Redshifts <i>Lin Yan</i>	287
Star Forming Galaxies at $z \geq 2$ <i>Alan Moorwood, Paul P. van der Werf, Jean Gabriel Cuby, and Tino Oliva</i>	293
Identification of ISOPHOT Deep Field Sources <i>David B. Sanders, Sylvain Veilleux, Min Yun, Lennox L. Cowie, Kimiaki Kawara, Yoshiaki Taniguchi, Shinki Oyabu, Takashi Murayama, and Haruyuki Okuda</i>	297
The History of Starburst Galaxies <i>Andrew W. Blain</i>	303
Radio Observations of High Redshift Star Forming Galaxies <i>Chris L. Carilli</i>	309
The Cosmic Star-Formation History: The UV Finds Most <i>Kurt Adelberger</i>	318
The Cosmic Star-Formation History: The Far-IR and Sub-mm View <i>Alberto Franceschini</i>	328

Starburst Galaxies: Near and Far
Proceedings of a Workshop Held at Ringberg Castle,
Germany, 10-15 September 2000
Tacconi, L.; Lutz, D. (Eds.)
2001, XVIII, 338 p., Hardcover
ISBN: 978-3-540-41472-8
